

Data Dictionary, Egypt, HIECS 1999/2000

**Important notes:**  
 - All text in blue indicate formulas generated by ERF  
 - All text in green represent a recommendation  
 - All cells shaded in orange indicate country specific information, standard values generated by ERF or values of a scale variable  
 - All cells shaded in green, blue or purple indicates different levels of expenditure/income aggregates  
 - Under column "Key":  
 -A: indicates a variable that is available in/can be generated from the survey dataset  
 -/: indicates a variable that is not available in/cannot be generated from the survey dataset

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
FILE LEVEL: ALL										
IDEAL UNIVERSE: ALL OBSERVATIONS										
CATEGORY: IDENTIFICATION (FILE INFORMATION)										
COUNTRY	Unique country	String variable representing the country name	This variable exists both in the household and the person file and is necessary when concatenating files from different datasets. Use this variable when concatenating files from different datasets.	String variable			All HHs	A		Generated by ERF
YEAR	Survey Year	Year during which the survey was performed	This variable exists both in the household and the person file and is necessary when concatenating files from different datasets. Use this variable when concatenating files from different datasets.	Ordered discrete variable			All HHs	A		Generated by ERF
CASESER	Unique unit identifier	Sequential anonymous household identifier usually provided in the dataset	This variable exist both in the household and person file and is necessary when merging the two files. This identifier is unique only within each country/year dataset; when combining different countries or years it is necessary to use it in combination with the variables COUNTRY and YEAR in order to uniquely identify households. When merging household and individual level files from the same dataset, use this variable to link each individual to the right household.	Ordered discrete variable			All HHs	A	Serial	

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999					
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments	
<b>HOUSEHOLD COMPOSITION AND CHARACTERISTICS</b>		Gives information on the household composition and characteristics such as the number of children, their age and gender.. The dwelling conditions the access to public facilities ...									
<b>FILE LEVEL: HOUSEHOLD</b>											
<b>IDEAL UNIVERSE: ALL HOUSEHOLDS</b>											
<b>IDEAL REFERENCE PERIOD: AT PRESENT</b>											
<b>CATEGORY: FILE INFORMATION</b>											
<b>HWEIGHT</b>	Household weight	Data provider household weight	The household weight can correct just for sample bias, or also for non-sampling errors (such as response bias and adjustment to population distribution). In many cases, the weight is a population weight, which means that the weight will inflate the result to reflect the total population. <b>We strongly recommend that all statistical analysis be performed using the data weights</b>	Continuous variable			All HHs	A	weighthh		
<b>REG</b>	Region	Region of residence		Categorical variable			All HHs	A	gov		
<b>AREA</b>	Area	Second geographical variable identifying another aspect of the location of the unit not described in REG such as city or village		Categorical variable			All HHs	/			
<b>RURURB</b>	Urban/Rural residence	Indicate whether the region is urban/rural	In case the country has refugee camps (as in Palestine), the "refugee camp" category is coded "2"	Harmonized categorical/dummy variable	0 Rural 1 Urban 2 Refugee camps	2 Rural 1 urban	All HHs	A	urbrur		
<b>HNUM</b>	Number of persons	Total number of persons in the household (including children or any other individuals not included in individual-level survey for any reason)	<b>In general <math>\Sigma</math> over all individuals in household</b> <b>If the individual file does not include all household members, the variable is constructed directly from household level original information</b> <b>FEMLNUM+MALNUM = HNUM</b>	Ordered discrete variable			All HHs	A	de02	Generated by ERF	
<b>MALNUM</b>	Number of Males	Total number of Males in the household (including children)							A	de02	Generated by ERF
<b>FEMLNUM</b>	Number of Females	Total number of females in the household (including children)							A	de02	Generated by ERF
<b>CH14</b>	Number of persons under age 14	Number of persons under age 14 living in the household	This includes (ever) married children as well as heads and spouses under fourteen. If the individual file does not include all household members, the variable is constructed directly from household level original information						A	de04	Generated by ERF
<b>NUM65</b>	Number of persons aged 65 or more	Number of household members aged 65 or more including head and spouse.	<b>If the individual file does not include all household members, the variable is constructed directly from household level original information</b>						A	de04	Generated by ERF
<b>HCOMP</b>	Household composition	Indicates the composition of the household with the number of adults and of children using standardized family models: 2 adults no children, 2 adults 1-2 children etc..	This variables might not exist in all surveys and can be constructed using the information in the household and person files. <b>In case the variable is generated, the adult is defined as either a:</b> - HH member aged 18 years or older - HH head even if aged less than 18 years - a married HH member even if aged less than 18 years	Harmonized categorical variable	1 1-2 adults, no children 2 1-2 adults, 1-2 children 3 1-2 adult, 3 or more children 4 3 or more adults, 0-1children 5 3 or more adults, 2-3 children 6 3 or more adults, 4 or more children		All HHs	A	de04	Generated by ERF	
<b>MARRIED</b>	Head living in couple	Standardized code that indicates whether the head of the household has a partner and the type of partnership	The head may cohabit with his mother or sister and in this case the concept of No couple applies. Another possible status is when the head has several spouses. Here a problem should exist if the spouses live in different houses so two different households may have the same head. <b>Generated from individual files</b>	Harmonized categorical variable	0 No couple present in household 1 Married couple head and spouse 2 Several cohabiting spouses		All HHs	A	d03	Generated by ERF	
<b>EARN</b>	Number of earners	Number of household members who receives any earnings.	All individuals who have received any earnings during the reference period, only a subset may have been in employment at the time of the survey. <b>If the individual file does not include all household members, or if incomes are not available at the individual level, the variable is constructed either from other individual level variables (e.g. employment status), or directly from household level original information.</b> <b>Pensioners and any individual receiving any kind of income is considered as earner.</b>	Ordered discrete variable			All HHs	A	de14		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
INCS	Source of income	Main income source of the household	This variable may not exist in most of the surveys but can be constructed from the individual files	Harmonized categorical variable	1 Household business	4199 Income from agricultural activities 4299 Income from non-agricultural activities 4399 Income from real properties 4499 Income from financial assets	All HHs	A	income.4099 income.4199 income.4299 income.4399 income.4499 income.4599	The main source of Income for the household was generated using variables indicating the total net annual income per household by source of income, assuming that the maximum value of income by sources indicated is the main source of income, i.e., if the household income from wages is higher than that from agricultural activities, the main source of income is assumed to be wages and salaries.  Incomes generated from household business were first aggregated before computing INCS .  Income from other sources includes pensions, transfers and other regular income that were received aggregated under one code & could not be split.
					2 Salaries and wages	4099 Income from wages and salaries				
					3 Remittances from country or abroad					
					4 Pensions					
					5 Other	4599 Income from other sources				
HHTYPE	Household type	Identifying collective and non-collective households	Collective households are composed of a number of non-residents, having the same gender, living together, and are all employed. No head is identified for collective households, and the relationship to head variable will be recoded missing for all household members Non-collective households are mostly residents having the regular structure of a family (Head, spouse, ....etc)	Dummy variable	0 Non-collective		All HHs	/		
					1 Collective					
DWLTYP	Type of dwelling	Type of the dwelling	This variable mainly distinguishes between villa, apartments and others "House" includes traditional, modern or Arabic house etc. "Villa" includes palace, villa or a floor in a villa, duplex etc. "Other" includes clay/reed house, primitive house, caravan etc.	Harmonized categorical variable	1 House	4 A Countryside house	All HHs	A	house_01	
					2 Villa	3 Villa				
					3 Apartment	1 Apartment 2 More than one apartment				
					4 Others	5 One or more room in a housing unit 6 One or more separate rooms 7 Marital residence (tent, hut, ...etc)				
DWLTEN	Tenure of dwelling	Type of tenure	This variable distinguishes between owned or rented living quarters.	Harmonized categorical variable	1 Rented	1 rented 2 Furnished rent	All HHs	A	house_03	
					2 Owned	3 owned/ Unit bought				
					3 Provided free	4 Gift/granted 5 In-kind benefit				
					4 Others	6 Other				
ROOM	Number of rooms	Number of rooms excluding bathroom and kitchen	In some surveys there is no indication whether the bathroom and kitchen are counted in the number of rooms or not, we assume they are excluded	Ordered discrete variable			All HHs	A	house_02	
ELECT	Electrified	Indicates if the dwelling is electrified or not	This variable is often generated from the source of lighting. Using private generator is considered as electrified.	Dummy variable	0 No	2 Kerosene 3 Gas 4 Other	All HHs	A	house_07	
					1 Electrified	1 Electricity				
SLIGHT	Source of energy for lighting	Distinguish between public and private sources of electricity and other sources of lighting	Private electricity includes community and private generators and cooperative networks "Others" may include sources that are presented independently in the standardized value if the survey is not enough detailed (example it may include gas and kerosene)	Harmonized categorical variable	1 Public network	1 Electricity	All HHs	A	house_07	The source of electricity is assumed to be public since there is no distinction between public and private networks
					2 Private					
					3 Gas	3 Gas				
					4 Kerosene	2 Kerosene				
					5 Others	4 Other				

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
SCOOK	Source of energy for cooking	Distinguish between different sources of energy for cooking		Harmonized categorical variable	1 Electricity	4 Electricity	All HHs	A	house_08	
					2 Gas	1 Gas 2 Natural gas				
					3 Kerosene	3 Kerosene				
					4 Wood & coal	5 Wood/firewood				
					5 Others	6 Other				
WAT	Water facilities	Indicates from where the household get its drinking water	This variable indicates the main source of drinking water. Piped supply includes public and private networks; public tap includes fountains and springs; wells are either with or without pumps private or public etc. Tanker includes purchased water indoor or outdoor; other includes lakes, rivers, rainwater etc.	Harmonized categorical variable	1 Piped supply	house_04 = 1 Public network	All HHs	A	house_04 house_05	
					2 Public tap	house_04=2 Pump & house_05=1 or 2 (public tap inside home or building) OR house_04=1 Public network & house_05=2 Tap inside the building				
					3 Well	house_04=2 Pump & house_05=3 not connected house_04=3 Well				
					4 Tanker					
					5 Other	house_04=4 Other				
TFACIL	Transportation facilities	Indicates the proximity to public transportation	This variable indicates the distance range to public transportation In case we have different ordinal variables indicating proximity different transportation means (separately) such to taxi, bus, etc. we take the average.	Harmonized categorical variable	1 Less than 1 km		All HHs	/		
					2 1-5 km					
					3 More than 5 km					
SFACIL	Schooling facilities	Indicates the proximity to schools/universities	This variables is a summary of variables indicating the distance to elementary school, university etc. In case we have different ordinal variables indicating proximity to different education establishments (separately) such to elementary schools, secondary schools, etc. we take the average.	Harmonized categorical variable	1 Less than 1 km		All HHs	/		
					2 1-5 km					
					3 More than 5 km					
HFACIL	Health facilities	Indicates the proximity to health centers and hospitals	This variables is a summary of variables indicating the distance to health centre and hospital In case we have different ordinal variables indicating proximity to different health establishments (separately) such to private doctors, hospitals health centers, etc. we take the average.	Harmonized categorical variable	1 Less than 1 km		All HHs	/		
					2 1-5 km					
					3 More than 5 km					

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
TOIF	Toilet facility	Indicates whether the household has access to toilet facility	In case we don't have information on the connection to sewage system but we do know if the toilet is inside or outside the dwelling we can consider toilets outside the dwelling as not connected to sewage (option 2).	Harmonized categorical variable	1 Yes and connected to sewage	house_12=1 or 2 & house_15=1 (private or shared bathroom+toilet with sewage) OR house_14=1 or 2 & house_15=1 (private or shared separate toilet with sewage)	All HHs	A	house_12 house_14 house_15	
					2 Yes but not connected to sewage	house_12 =1 or 2 & house_15=2 (private or shared bathroom+toilet with no sewage) OR house_14=1 or 2 & house_15=2 (private or shared separate toilet with no sewage)				
					3 No facility	house_12=3 (no bathroom+toilet) & house_14=3 (no separate toilet )				
CAR	Has car/truck/tractor	Indicates if the household owns or has free access to car, scooter, taxi, boat, tractor etc..		Dummy variable	0 None	2 None	All HHs	A	prv_car bicycle mtrcycle	Includes: Private car, bicycle, and motorcycle.
					1 Own one or many	1 Owned				
TELV	Has television/radio	Indicates if the household owns or has free access to a television, video, radio, dish, receiver, CD player etc.		Dummy variable	0 None	2 None	All HHs	A	color_tv bw_tv vcr recorder dech	Includes: Colored TV, B&W TV, VCR, Stereo cassette, and satellite dish.
					1 Own one or many	1 Owned				
TELPH	Has telephone	Indicates if the household owns or has free access to a telephone, cell phone, fax machine, internet line, computer etc.		Dummy variable	0 None	2 None	All HHs	A	phone mobil fax prs_comp	Includes: Landline telephone, cell phone, Fax machine and personal computer.
					1 Own one or many	1 Owned				
REFRG	Has refrigerator/Freezer	Indicates if the household owns or has free access to a refrigerator, freezer, water cooler.		Dummy variable	0 None	2 None	All HHs	A	refrig deep_frz	Includes: Refrigerator and deep freezer.
					1 Own one or many	1 Owned				
COOKER	Has Cooker/ food processor	Indicates if the household owns or has free access to a gas or electric cooking stove, microwave, etc.		Dummy variable	0 None	2 None	All HHs	A	cooker	Includes: Gas/electrical stove
					1 Own one or many	1 Owned				
WASH	Has washing machine	Indicates if the household owns or has free access to a washing machine, dryer, dishwasher, etc.		Dummy variable	0 None	2 None	All HHs	A	washmach dishwash	Includes: Automatic washing machine and dishwasher.
					1 Own one or many	1 Owned				
COND	Has air conditioner	Indicates if the household owns or has free access to an air conditioner, electric fan, etc.		Dummy variable	0 None	2 None	All HHs	A	ac fan heater	Includes: Ac, fan, and electrical/gas/kerosene heater.
					1 Own one or many	1 Owned				
WAHEAT	Has water heater	Indicates if the household owns or has free access to a solar, gas, electric, etc. water heater		Dummy variable	0 None	2 None	All HHs	A	watr_htr	Includes: Electrical/gas water heater.
					1 Own one or many	1 Owned				
ODUR	Has other durables	Indicates if the household owns or has free access to a sewing machine, iron, vacuum, and any other household appliance		Dummy variable	0 None	2 None	All HHs	A	vacuum iron	Includes: Vacuum, and iron.
					1 Own one or many	1 Owned				
LIVESTOK	Has cattle/sheep/poultry	All kinds of livestock, donkey, horses, etc...		Dummy variable	0 None		All HHs	/		
					1 Own one or many					
OLAND	Own land	Indicates whether the household owns land or not		Dummy variable	0 None		All HHs	/		
					1 Own one or many					
ALAND	Area of Own land	Indicates the area of the owned land	ALAND=0 IF OLAND=0 (do not own a land), hence this variable should be complete for all households except those for which OLAND is missing. The area of land should be reported in m <sup>2</sup>	Continuous variable			All HHs	/		
FLAND	Free access to land	Indicates the area of the accessed land		Continuous variable			All HHs	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999					
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments	
<b>DEMOGRAPHIC INFORMATION OF HEAD AND SPOUSE</b> Information on Head and Spouse are constructed from the person-level files. For more information about a specific variable, refer to the person-level variable referred to in "Contents".											
<b>FILE LEVEL: HOUSEHOLD</b> <b>IDEAL UNIVERSE: ALL HOUSEHOLDS</b> <b>IDEAL REFERENCE PERIOD: AT PRESENT</b> <b>CATEGORY: DEMOGRAPHIC INFORMATION OF HEAD AND SPOUSE</b>											
AGEHD	Age - head	Age in years.	In some datasets, age may be calculated at a certain reference date (e.g., 31 December of last year). When the original dataset has only age categories, age is calculated as the midpoint of the range provided. In some datasets, AGE is top coded by the data provider (e.g., a value of 95 represents 95 years of age or over).	Ordered discrete variable				All Heads	A	d03 de04	
AGESP	Age - spouse							In case the head has multiple spouses a variable for each spouse will be generated, and named AGESP_# where # is the spouse number			
SEXHD	Gender - head	Gender	Indicator for gender of individual.  In case the head is male and has multiple spouses a variable for each spouse will be generated and will be named SEXSP_# where # is the spouse number. <i>For all spouses except the first spouse, gender will be always 2 (female)</i>	Harmonized categorical variable	1 Male  2 Female	Structured the same as PSEX		All Heads	A	de02 d03	
SEXSP	Gender - spouse							All Spouses			
MARTH	Marital status - head	Legal administrative status concerning marriage	Should not be imputed, it can be generated only for those to whom the question was asked (in other words, the youngest age at which information is collected may differ depending on the survey). Married refers to only formal marriages (including legally married). Polygamous unions includes males with multiple spouses. Number of spouses in household can be applied to compute polygamy.	Harmonized Categorical variable	1 Never married 2 Married monogamous 3 Married polygamous 4 Divorced/Separated 5 Widowed 99 Not stated	Structured the same as PMART		Male Heads aged 18+  Female Heads aged16+	A	d03 de06	
PARTH	Partnership and parenthood status - head	ERF recode that allows users to identify heads as having a partner (either married or unmarried) versus not having a partner, as well as parents as opposed to non-parents, using a single variable.	Partnership status for head may be restricted to civic status, parenthood status assumes that the children of the head are also children of the spouse.	Harmonized categorical variable	1 Head with partner or head's partner, with no children 2 Head with partner or head's partner, with children, youngest child < 18 3 Head with partner or head's partner, with children, youngest child 18+ 4 Single head, with no children 5 Single head, with children, youngest child < 18 6 Single head, with children, youngest child 18+			All Heads	A	d03 de04 de06	Generated by ERF. Single head is defined as never married, divorced, separated or widowed. Head with partner is defined as married head.
NATH	Ethnicity/nationality - head	Ethnicity or nationality	The content of this variable is not uniform. In many datasets where information on ethnicity or nationality is not available in the original survey, it can also contain country of birth, race, ancestry or mother tongue.  In case the head has multiple spouses a variable for each spouse will be generated and will be named NATSP_# where # is the spouse number.	Categorical variable				All Heads	/		
NATSP	Ethnicity/nationality - spouse							All Spouses			
IMMIGRHD	Immigration status - head	Ideally indicates whether an individual is born in the country or has an immigrant background, and if possible, how recently he/she arrived. Other migration status information may be included if available.	The content of this variable is not uniform. By other migration status we tempt to capture those who migrate from one region to another inside the country (if the place of birth is different from the place of residence inside the country)  In case the head has multiple spouses a variable for each spouse will be generated and will be named IMMIGRSP_# where # is the spouse number.	Harmonized categorical variable	1 Immigrant (from abroad)  2 Migrant (from another region inside the country)  3 No	Structured the same as PIMMIGR		All Heads	/		
IMMIGRSP	Immigration status - spouse							All Spouses			
BIRHD	Is the head born in his residence place	This variable indicates whether the person is born in his place of residence	In case the head has multiple spouses a variable for each spouse will be generated and will be named BIRSP_# where # is the spouse number.	Dummy variable	0 No  1 Yes	Structured the same as PBIR		All Heads	/		
BIRSP	Is the spouse born in her residence place							All Spouses			
BIRPLHD	Place of Birth of the head	This variable includes either the region, the area or the country of birth	Very few surveys contain this information  In case the head has multiple spouses a variable for each spouse will be generated and will be named BIRPLSP_# where # is the spouse number.	Categorical variable				All Heads	/		
BIRPLSP	Place of Birth of the Spouse							All Spouses			
LITHD	Literacy status of the head	This variable indicates whether the person is literate (can read and write) or not	see PLIT <i>If there are no questions about the read and write ability but the educational attainment is elementary or upper the individual is considered literate</i>  In case the head has multiple spouses a variable for each spouse will be generated and will be named LITSP_# where # is the spouse number.	Dummy variable	0 No  1 Can read & write	Structured the same as PLIT		Heads aged 10+	A	d03 de05	
LITSP	Literacy status of the spouse							Spouses aged 10+			

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
EDUHD	Educational level - head	Highest level of education attained.	see PEDUC	Harmonized categorical variable	1 None	Structured the same as PEDUC	Heads aged 10+	A	d03 de05	
EDUSP	Educational level - spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named EDUSP_# where # is the spouse number.		2 Primary 3 Lower secondary 4 Secondary 5 Post secondary or equivalent 6 University 7 Postgraduate 99 Not stated					
MASHD	Main activity status -Head	Main activity status during the survey period	See PCMAS	Harmonized categorical variable	1 Employed	Structured the same as PCMAS	All Heads aged 6+	A	de02 d03 de07	
MASSP	Main activity status - Spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named MASSP_# where # is the spouse number.		2 Unemployed 3 Homemaker (Housewife) 4 Student 5 Pensioners/retired/disabled 6 Others 99 Not stated					
EMSHD	Status of Employment of the head	Detailed description of the employment status	See PCEMS	Harmonized categorical variable	1 Employee	Structured the same as PCEMS	Active Heads aged 6+	A	d03 de08	
EMSSP	Status of Employment of the spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named EMSSP_# where # is the spouse number.		2 Employer 3 Own account, self-employed 4 Contributing (unpaid) family workers 5 Member of producers cooperatives 6 Workers not classifiable by status (other) 99 Not stated					
OCCHD	Classification of Occupations for main job of the Head	International Standard Occupational classification of the main (current or last held) job, with as much detail as possible (Ideally 4-digit ISCO-88 or 08 if available in original survey)	See POCC	Harmonized categorical variable	1 Legislators, senior officials and managers	Structured the same as POCC	Active Heads aged 6+	A	d03 de11	
OCCSP	Classification of Occupations for main job of the Spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named OCCSP_# where # is the spouse number.		2 Professionals 3 Technicians and associate professionals 4 Clerks 5 Service workers and shop and market sales 6 Skilled agricultural and fishery workers 7 Craft and related trades 8 Plant and machine operators and assemblers 9 Elementary occupations 10 Armed Forces 11 Other/unspecified 99 Not stated					
INDHD	International Standard Industrial Classification of main job of the Head	Industry classification of the main (current or last held) job, with as much detail as possible.	See PIND	Harmonized categorical variable	1 Agriculture and Fishing	Structured the same as PIND	Active Heads aged 6+	A	d03 de12	
INDSP	International Standard Industrial Classification of main job of the Spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named INDSP_# where # is the spouse number.		2 Mining 3 Manufacturing 4 Electricity and Utilities 5 Construction 6 Commerce 7 Transportation, Storage and Communication 8 Financial, Insurance and Real Estate 9 Public Administration 10 Other Services 11 Unspecified 99 Not stated					
TYPEWKHD	Sector of employment of the head	Sector of employment	see PTYPEWK	Harmonized categorical variable	1 Government	Structured the same as PTYPEWK	Active Heads aged 6+	A	d03 de13	
TYPEWKSP	Sector of employment of the spouse		In case the head has multiple spouses a variable for each spouse will be generated and will be named TYPEWKSP_# where # is the spouse number.		2 Public sector 3 Private sector 4 Joint/Cooperative 5 Foreign sector 6 Other 99 Not stated					

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
<b>HOUSEHOLD EXPENDITURES</b>		Including annual amounts of consumption expenditures; if possible split following the COICOP international standard classification).	All expenditure variables are recorded as yearly amounts. Amounts are annualized if not provided as such in original data. Due to lack of detail in many datasets, ERF constructs the expenditure variables, even if not all of the items are available. Any taxes included in the expenditure variables are deducted if possible. Some expenses/per month may be very high due to exceptional conditions (such as health care) and are not multiplied by 12 to be annualized (may be by 6). All corresponding survey documentation should be checked for expenditure periodicity reference <b>Annual</b> Expenditure amounts should be reported in <b>country national currency</b>							
<b>FILE LEVEL: HOUSEHOLD</b> <b>IDEAL UNIVERSE: ALL HOUSEHOLDS</b> <b>IDEAL REFERENCE PERIOD: INCOME REFERENCE PERIOD</b> <b>CATEGORY: EXPENDITURES</b>										
<b>FODEXP</b>	Food and non-alcoholic beverages	Expenses on food and non-alcoholic beverages. Ideally, corresponds to Code 01 of the COICOP classification (SUM of 01).	All food expenditures include also own grown products expenses and gifts/in-kind received food. Expenses on take away food and meals taken in restaurants are included under code 11 <b>TOTPFOD+TOTOWNP+TOTGIKD</b>	Continuous variable			All HHs	A		<ul style="list-style-type: none"> <li>Expenditure aggregates are based on the expenditure data already aggregated provided (no detailed amounts for expenditure items are available).</li> <li>Some items are missing in the expenditure data, such as the rent related variables, the majority of the housing expenditure, and durables.</li> <li>Items aggregated under each expenditure type are identified in "Expenditure Aggregates" sheet.</li> </ul>
<b>RICE</b>	Rice expenditures	Expenditures on rice in all forms	Purchased only	Continuous variable			All HHs	/		
<b>GRAIN</b>	Grains and flour expenditures	Wheat, Maize, Barely and all cereals in the grain or flour form	Purchased only	Continuous variable			All HHs	/		
<b>BREAD</b>	Bread and cakes	Bread in all forms, biscuits, cakes pizza..	Purchased only	Continuous variable			All HHs	/		
<b>PAST</b>	Pasta expenditures	Macaroni, Noodles, Couscous..	Purchased only	Continuous variable			All HHs	/		
<b>CERPRE</b>	Cereal preparation	Cornflakes, malt, tapioca..	Purchased only	Continuous variable			All HHs	/		
<b>CEREXP</b>	Purchased Bread and Cereals		<b>RICE+GRAIN+BREAD+PAST+CERPRE</b>	Continuous variable			All HHs	A		
<b>CEROWN</b>	Own-Produced Bread and Cereals			Continuous variable			All HHs	A		
<b>SMEAT</b>	Sheep and goats Meat expenditures	Fresh frozen and tinned goats and sheep meat	Purchased only	Continuous variable			All HHs	/		
<b>CMEAT</b>	Cow meat expenditures	Fresh frozen and tinned cow meat	Purchased only	Continuous variable			All HHs	/		
<b>OMEAT</b>	Other meat expenditures	Fresh frozen and tinned camel, rabbit, pork etc. meat	Purchased only	Continuous variable			All HHs	/		
<b>CHMEAT</b>	Chicken meat expenditure	Fresh frozen and tinned chicken, turkey, birds etc. meat	Purchased only	Continuous variable			All HHs	/		
<b>LMEAT</b>	Luncheon and Tinned meat	Fresh and frozen luncheon, tinned and others meat	Purchased only	Continuous variable			All HHs	/		
<b>MEATEXP</b>	Purchased Meat and Poultry		<b>SMEAT+CMEAT+OMEAT+CHMEAT+LMEAT</b>	Continuous variable			All HHs	A		
<b>MEATOWN</b>	Own-Produced Meat and Poultry			Continuous variable			All HHs	A		
<b>FISH</b>	Fish expenditures	Fresh and frozen fish expenditures, Tuna, sardines and tinned fish also smoked, salted, dried and processed fish	Purchased only	Continuous variable			All HHs	/		
<b>SEAF</b>	Seafood expenditures	Fresh, frozen and proceed seafood	Purchased only	Continuous variable			All HHs	/		
<b>FSHSEAEXP</b>	Purchased Fish and Seafood		<b>FISH+SEAF</b>	Continuous variable			All HHs	A		
<b>FSHSEAOWN</b>	Own-Produced Fish and Seafood			Continuous variable			All HHs	A		
<b>MILK</b>	Milk expenditures	Fresh, powder, condensed and infant powder milk expenses	Purchased only	Continuous variable			All HHs	/		
<b>YOGH</b>	Yogurt expenditures	Yogurt liquid, tinned, paste etc. cream, milk based deserts, milk based beverages	Purchased only	Continuous variable			All HHs	/		
<b>CHES</b>	Cheese expenditures	Processed, home made, tinned etc. cheese	Purchased only	Continuous variable			All HHs	/		
<b>EGG</b>	Eggs expenditures	Eggs and wholly made egg products	Purchased only	Continuous variable			All HHs	/		
<b>DAIRYEXP</b>	Purchased Dairy Products		<b>MILK+YOGH+CHES+EGG</b>	Continuous variable			All HHs	A		
<b>DAIRYOWN</b>	Own-Produced Dairy Products			Continuous variable			All HHs	A

<b>EDUCEXP</b>	Education	Expenses on education, including pre-primary and primary education, secondary education, post-secondary non-tertiary education, tertiary education, and education not definable by level. Ideally, corresponds to Code 10 of the COICOP classification. It covers educational services only and does not include expenditures on educational materials, such as books, catering and transport services etc.	PREDUC+SEDUC+TEDUC+OEDUC+EDUCABR	Continuous variable			All HHs	A		
<b>PREDUC</b>	Expenses on pre-primary and primary education	Includes also expenses on literacy programs for students too old for primary school, including private tutoring and tutoring groups		Continuous variable			All HHs	A		
<b>SEDUC</b>	Expenses lower and upper-secondary education	Includes also out-of-school secondary education for adults and young people, private tutoring and tutoring groups		Continuous variable			All HHs	A		
<b>TEDUC</b>	Expenses tertiary education	Expenses on first and second stage of tertiary education, including private tutoring and tutoring groups		Continuous variable			All HHs	A		
<b>OEDUC</b>	Expenses on education not defined by level	Educational programs, generally for adults, which do not require any special prior instruction, in particular vocational training and cultural development.		Continuous variable			All HHs	A		
<b>EDUCABR</b>	Expenses on Education Abroad	Includes all expenses on trips for education purposes other than those spent on transportation or accommodation		Continuous variable			All HHs	/		
<b>RESTOEXP</b>	Restaurants and hotels	Expenses on restaurants (catering services) and hotels (accommodation services). Ideally, corresponds to Code 11 of the COICOP classification.	CATSERV+SCHRST+ACCOM	Continuous variable			All HHs	A		
<b>CATSER</b>	Catering services	Meals, snacks, and drinks provided by restaurants, cafés, etc., including those provided: - in cultural, sporting or entertainment services: theatres, cinemas, sports stadiums, etc.; on public transport - ready to take food products and beverages, the sale of cooked dishes by catering contractors, -Catering services of works canteens, and canteens in schools, universities etc.		Continuous variable			All HHs	A		The variable: value.1099 includes spices and pre-prepared food, 20% of its value was allocated to spices expenses while the other 80% were allocated to catering expenses as per Egypt 2004 survey corresponding percentages.
<b>SCHRST</b>	School restaurants expenditures	Meals, snacks, and drinks provided in school restaurants	In many countries, those expenses are lumped with catering services.	Continuous variable			All HHs	/		
<b>ACCOM</b>	Accommodation and hotel expenses	Accommodation services of: - hotels, boarding houses, motels, inns and establishments offering "bed and breakfast"; - holiday villages and holiday centers, camping and caravan sites, youth hostels and mountain chalets; - boarding schools, universities and other educational establishments; - public transport (trains, boats, etc.) when priced separately; - hostels for young workers or immigrants.		Continuous variable			All HHs	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
<b>MISCEXP</b>	Miscellaneous goods and services	Expenses on miscellaneous goods and services, such as personal care, personal effects n.e.c., social protection, insurance, financial services n.e.c., other services n.e.c. Ideally, corresponds to Code 12 of the COICOP classification.	Some surveys may report information on taxes and remittances without clear specification of the nature of the tax expenses... these expenditures are included in this part. <b>PCEXP+SPEXP+FEXP+FEES+PTRANSF</b>	Continuous variable			All HHs	A		
<b>PCEXP</b>	Personal care and personal effects	Hairdressing salons and appliances for personal care, Jewellery, clocks and miscellaneous personal articles	Electric razors, hairdryers, electric toothbrushes etc. are included in this subgroup	Continuous variable			All HHs	A		Including expenses on ornamental plants, flowers, animals and birds that should be under recreational expenditure but couldn't be split.
<b>SPEXP</b>	Social protection	Covers assistance and support services provided to persons who are elderly, disabled, unemployed, homeless, low-income earners, immigrants, refugees, etc. It also covers assistance and support services provided to families and children.		Continuous variable			All HHs	/		
<b>FEXP</b>	Insurance and financial services	Service charges for insurance such as life insurance and non-life insurance (that is, insurance in connection with the dwelling, health, transport, etc.). Service charges for multi-risk insurance covering several risks should be classified on the basis of the cost of the principal risk if it is not possible to allocate the service charges to the various risks covered. Actual charges for the financial services of banks	Service charge for insurance is defined as the difference between claims due and premiums earned and premium supplement	Continuous variable			All HHs	A		The code 3599 includes expenses on financial services, different fees paid, funerals or weddings expenses, and expenses outside Egypt (Hajj, Umrah, subscriptions, magazines, ... etc). This amount was divided between Recreation and culture services financial services and fees.
<b>FEES</b>	Penalties and other fees	Financial penalties, traffic violation fees etc., fees for issuing passport ID cards, visas, birth certificate, driving license etc. membership fees.. And other non specified fees		Continuous variable			All HHs	A		
<b>PTRANSF</b>	Private transfers given	Remittances inside and outside the country, gifts to relatives cash or in-kind, charities, zakat, Alimony etc.		Continuous variable			All HHs	A		
<b>TOTFOOD</b>	Total food expenditures		In case where the own produced food items are also included in code 01 we need to abstract from OWINP <b>FOODEXP+CATSER+SCHRST</b>	Continuous variable			All HHs	A		
<b>TNFOOND</b>	Total expenditures on non-food and non-durables		Alcoholic and tobacco expenditures are included here <b>TOTEXP-(FOODEXP+TDUR+THOUS)</b>	Continuous variable			All HHs	A		Including expenses on all durables since they were received already aggregated with their corresponding categories, except those on cultural and recreational durables, added to TDUR.
<b>TDUR</b>	Total expenses on durables		<b>HSFUR+MHAPL+MHOPE+TAEQ+TRVEH+TTEQP+CULDUR</b>	Continuous variable			All HHs	A		Includes only expenses on cultural and recreational durables. Since expenses on other durables are already aggregated with their corresponding categories (furniture, housing, communication, ...etc) & could not be split.
<b>THOUS</b>	Actual and imputed rentals for housing		<b>ARHOUS+IMPREN</b>	Continuous variable			All HHs	/		
<b>TOTEXP</b>	Total expenditures	Individual consumption expenditure of household. Ideally, corresponds to Codes 01 to 12 of the COICOP classification	In cases where the original survey provides expenditures according to the COICOP classification, this variable is the sum over the expenditure variables above. Otherwise, it is either derived from the "total expenditures" variable in the original survey (if available) or is left blank. <b>FOODEXP+ALCOEXP+APPEXP+HOUSEXP+EQUIPEXP+MEDEXP+TRANEXP+COMMEXP+CULTEXP+EDUCEXP+RESTOEXP+MISCEXP</b>	Continuous variable			All HHs	A		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
LUMP	Lumpy expenses	Expenses on marriage, dowries, mahr, funeral, birth etc lump sum divorce (excluding alimony) payment and any other occasional expenses		Continuous variable			All HHs	A		
INTER	Interests paid on consumption and loans	Interest paid on loans for the purchase of consumption or durable goods	These expenses should not be part of consumption aggregates	Continuous variable			All HHs	A		Includes Code 3799 indicating installments paid for items acquired either prior or after the survey reference year.
TAX	Expenditures on taxes and levies	Taxes on consumption and durable goods, property taxes etc.	Taxes should be included in consumption aggregates only if they are closely related to services provided such as households that are paying more tax are receiving more services. In that latter case (if there is enough detail in the survey about taxes) this category should be disaggregated according to the nature of taxes paid.	Continuous variable			All HHs	A

						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
<b>HOUSEHOLD INCOME</b>		Including when possible annual amounts of earnings from labor and the contributions paid on them, capital income and property, taxes, social insurance benefits, social assistance benefits and other (private) transfers	All income variables are recorded as yearly amounts. ERF annualizes the amounts, if not provided as such in original data. <b>Annual</b> Income amounts should be reported in <b>country national currency</b>  As a rule, household-level income amounts are derived by summing the individual-level values for all individuals in the household. When individual data are not available, reported household amounts are used and these cases will be noted in the country-specific documentation. Where the household income variables are directly calculated from person-level income variables, these formulations are shown below, as are those instances when the variable is created by summing sub-categories within the household data.							
<b>FILE LEVEL: HOUSEHOLD</b>										
<b>IDEAL UNIVERSE: ALL HOUSEHOLDS</b>										
<b>IDEAL REFERENCE PERIOD: ONE YEAR</b>										
<b>CATEGORY: INCOME</b>										
<b>GWAG</b>	Gross wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), gross of employee social insurance contributions/taxes but net of employer social insurance contributions/taxes.	When employer-provided sick pay can not be separated, it is included in the wages. In case there is no precision about whether the wage is net or gross we classify it under gross wage If incomes are not available at the individual level, the variable is constructed directly from household level original information.	Continuous variable			All HHS	/		
<b>NWAG</b>	Net wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), net of employer and employee social insurance contributions and taxes.		Continuous variable			All HHS	A	income.4099	= Net Income from salaries and wages
<b>IKEAR</b>	In-kind earnings	In-kind income as a substitute or complement for cash wages. Includes, for example, the value of company cars, meals, housing, electricity, medical expenses, child care etc. paid or partly paid by the employer.	It does not exist on its own at the person level.	Continuous variable			All HHS	/		
<b>SINC</b>	Self-employment income	Profit/loss from unincorporated enterprises. The income is recorded gross of social insurance contributions (but net of expenses).	Self-employment income is often collected with a different reference period than other more regular incomes; for example, it could refer to the last financial year for which business accounts for the purposes of taxation were prepared. Includes imputed income from owner occupied dwellings and own produced food for home consumption If farm and non-farm self-employment income are not supplied separately, users can try to split them at the individual level	Continuous variable			All HHS	A	income.4199 income.4299	= Income from agricultural projects + Income from non-agricultural projects
<b>RENTAL</b>	Income less expenses from rentals	Rentals from dwellings, business buildings, vehicles, equipment, etc excludes rent from land		Continuous variable			All HHS	A		
<b>PROINC</b>	Property income	Interest received less interest paid Dividends Rent from land		Continuous variable			All HHS	A	income.4499 income.4399	= Income from financial assets + Income from real properties
<b>TRANSF</b>	Current transfers received	Social insurance, assistance, inter-household transfers, regular support received such as charities, remittances received, gifts received Disability pensions, allowances, benefits etc. Child/family benefits		Continuous variable			All HHS	A	income.4599	= other income including pensions, transfers and other regular incomes.
<b>TRPAID</b>	Current transfers paid	Employers' social insurance contributions Employees' social insurance contributions Taxes on income less refund Regular taxes on wealth Regular inter-household cash transfers Regular cash transfers to charities	In some datasets mandatory social insurance contributions are recorded together with the taxes and are, therefore, included here. If the original data only has one tax variable with all the taxes lumped together, the variable is included here. If the original survey only asked for net incomes, this variable usually remains empty. In many datasets, income taxes are not asked directly to the respondents but simulated through a taxation micro simulation model.	Continuous variable			All HHS	/		
<b>TOTDINC</b>	Total disposable income		<b>GWAG+SINC+RENTAL+PROINC+TRANSF</b>	Continuous variable			All HHS	A		Total disposable income includes net wages and salaries instead of the gross wages and salaries since the net amount is the only one available
<b>TOTINC</b>	Total income		<b>TOTDINC+TRPAID</b>	Continuous variable			All HHS	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
PERSONS										
FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: IDENTIFICATION										
PNUM	Person identifier	Person identification number (usually the person line number in the household)	This identifier is unique within each household. In order to uniquely identify an individual, both CASENUM and PNUM are required.	Ordered discrete variable			All INDS	A	de00	
FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: FILE INFORMATION										
PWEIGHT	Person weight	Data-provider person weight.	Very few data providers construct a different weight for each member of the household. If a person weight exists in the original dataset, we do report it here (even though it turns out to be the same for all household members in most cases), otherwise we assign the household weight to all household members. All statistical analysis performed should use the appropriate weight.	Continuous variable			All INDS	/		
FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: DEMOGRAPHICS										
PAGE	Age	Age in years.	In some datasets, age may be calculated at a certain reference date (e.g., 31 December of last year). When the original dataset has only age categories, age is calculated as the midpoint of the range provided. In some datasets, AGE is top coded by the data provider (e.g., a value of 95 represents 95 years of age or over).	Ordered discrete variable			All INDS	A	de04	
PSEX	Gender	Indicator for gender of individual.		Harmonized Categorical variable	1 Male 2 Female	1 Male 2 Female	All INDS	A	de02	
PMART	Marital status	Legal administrative status concerning marriage & partnership (even if not married, a person can be still legally recognized as being in a relationship).	There is no Polygamous status for females. Generally the information about polygamous status is available only for the head (male). For the other individuals we consider those having the status married as monogamous.	Harmonized Categorical variable	1 Never married 2 Married monogamous 3 Married polygamous 4 Divorced/Separated 5 Widowed 99 Not stated	2 Never married 3 Legally Married 4 Married 5 Divorced 6 Widowed (Male HH members aged >= 18 years and for whom the variable is missing) (Female HH members aged >= 16 years and for whom the variable is missing)	Male INDS aged18+ Female INDS aged16+	A	de06	The code "1" in the original variable indicating those below the question age category were recoded missing.
PREL	Relationship to head	Relationship to the head of household, where the value '1' always stands for the head of the household him/herself. The value "Other relatives " includes Nephew and Niece, Grandparents, son/daughters in law etc...		Harmonized Categorical variable	1 Head of household 2 Spouse 3 Son/Daughter 4 Father/mother (parents) 5 Brother/sister 6 Grandchildren 7 Other relatives 8 Other non-relatives	1 Head of household 2 Spouse 3 Son/Daughter 5 Father/mother (parents) 7 Brother/sister 6 Grandchildren 4 Son/Daughter in-law 8 Other relatives 9 Non-relatives	All INDS	A	d03

IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: FATHER AND MOTHER INFORMATION										
PFPRES	Father present at home	Indicates whether the father is present at home, not a household member or dead.	In case there is no information available about whether the father is dead or not we just use code 2 (not a HH member). In case, the relationship to head variable indicates that the brother of the head is living in the HH with nephews/nieces of the head we assume that these last are the sons/daughters of the head's brother.	Harmonized categorical variable	1 Yes 2 Father is not a household member 3 Father is dead		All INDS	A	d03	<ul style="list-style-type: none"> <li>All parents related variables were generated by ERF including the presence status generated using the relationship to head variable, therefore those dead could not be identified.</li> <li>Father's and Mother's variables were generated for the head of the household's children, the head him/herself whenever his/her parent(s) are household members, for head's siblings if parents' data is available, and for head's grandchildren if he/she has married sons/daughters or in laws living in the household. In some cases, children were linked to their parents based on the HH data entry order.</li> <li>In case the head has multiple spouses, the identification of the children's mothers among different spouses is judgmental whether on age basis, or on members' order in the household.</li> </ul>
PMPRES	Mother present at home	Indicates whether the mother is present at home, not a household member or dead.	There might be a problem identifying the mother from the Roster in case of multiple spouses. This variable can be clearly identified only in the fathers'/mothers' ID is provided in the dataset. In case of only one spouse she is assumed to be the mother, unless the age checking is could identify those living with their step mother (mother died or divorced).	Harmonized categorical variable	1 Yes 2 Mother is not a household member 3 Mother is dead		All INDS	A		
PFATHID	ID of the father	Indicates the PNUM (the line number in the HH) of the father	This information is available for the son/daughter of the head, partially available for the head and brother/sister of the head and is missing for the other individuals (exception for Iraq). In case we have the brother of the head living in the HH with the nephew/niece of the head we assume that these last are the son (daughter) of the head's brother. Since very few surveys report this information. Value can be imputed from the roster (or individual file) but might be available only if PFPRES = 1.	Ordered discrete variable			All INDS	A	de00	
PMOTHID	ID of the Mother	Indicates the PNUM (the line number in the HH) of the mother	Same as PMPRES Since very few surveys report this information. Value can be imputed from the roster (or individual file) but might be available only if PMPRES = 1.	Ordered discrete variable			All INDS

FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: EDUCATION										
PLIT	Literacy status	This variable indicates whether the person is literate (can read and write) or not	A person is considered literate if they can both read and write and not just one or the other. A semi-literate person (one who can read, but cannot write) is said to be illiterate. In the case where the survey asks only whether a person can read but does not ask if they can write, and in case there no information in the questionnaire about the reading and writing ability literacy cannot be determined, these are coded as missing. If there are no questions about the read and write ability but the educational attainment is elementary or upper the individual is considered literate	Dummy variable	0 No	2 Illiterate	INDs aged 10+	A	de05	The code "1" in the original variable indicating those below the question age category were recoded missing.
					1 Can read & write	3 Read and Write 4 Below intermediate (Primary-Preparatory) 5 Intermediate (secondary or equivalent) 6 Above Intermediate 7 University 8 Post graduate				
EVERATTD	Ever attended school	This variable indicates whether the individual have ever attended school, academic, "Coranic" or any other formal or informal school	All persons of pre-primary school age or above. Primary school age will vary by country. Value must be missing for others. This is country-specific and depends on how school attendance is defined. Pre-school is included here. Also, in some countries, ever attended is yes only if the person attended for some minimum amount of time. The differences need to be carefully documented. One is not required to have completed any level of education to answer this question positively. By logic, EVERATTD, PEDUC and PATSCH have the following relationship: If PATSCH=1, EVERATTD=1 If PEDUC>=2 (and ≠ 99), EVERATTD=1 If PEDUC=99 & PATSCH=0, EVERATTD=0	Dummy variable	0 No	2 Illiterate	INDs aged 10+	A	de05	The code "1" in the original variable indicating those below the question age category were recoded missing.
					1 Yes	3 Read and Write 4 Below intermediate (Primary-Preparatory) 5 Intermediate (secondary or equivalent) 6 Above Intermediate 7 University 8 Post graduate				
					99 Not stated	(members aged >=10 years and for whom the variable is missing)				
TYPSCHE	What type of school	Type of school attended by the individual		Harmonized categorical variable	1 Coranic		INDs aged ....+	/		
					2 Academic					
					3 Adult education or literacy program					
					4 Vocational or other					
PEDUC	Educational level	Highest level of education attained.	Primary corresponds to elementary, and lower secondary to preparatory/second stage of basic education In case there is no distinction in the survey between primary and preparatory education level and the individual is not currently enrolled in school we consider his education level primary If there is no information on highest level of education completed, the variable can be constructed using diploma level and/or years of education. The selection of the variable must be based on a careful review of the data. When using currently attending information (level or grade) to construct the variable, it must correspond to the grade (or level) presently attending minus one (1). This is country specific- not all countries require the same number of school years to complete a given level. The value "None" does not mean that the person never attended school it means that the individual did not complete the first level of education (elementary) None corresponds either to those currently enrolled in primary but didn't get the diploma or those illiterate, Read and Write, in informal school such as Coranic school, traditional, vocational training or adult etc.(cross tabulation with type of school will allow to identify those without education level) If there is no question on highest level of education completed for those not attending school and there is no information on diploma and/or years of education completed, then the variable cannot be constructed. University education level refers to any higher education after successfully completing secondary level of education regardless of whether this was completed. Not stated is for cases where no education level is stated- this should be checked and avoided as much as possible. This classification should be documented. If no information on the completeness of the education level, classify as incomplete and add specific comment to documentation. If person is illiterate and there is no information on school level, cases are coded 1 "None". If there is no information on the literacy status all levels other than formal education grades and not stated can be coded 1 "None".	Harmonized categorical variable	1 None	de05= 2 Illiterate de05=3 Read and Write	INDs aged 10+	A	de05	The code "1" in the original variable indicating those below the question age category were recoded missing.  In the highest level of education variable provided, primary and preparatory levels are aggregated, therefore, in the case of Egypt, the harmonized variable " highest level of education attained" is modified accordingly by adding a category indicating Primary and Preparatory levels combined. This category will be coded 23 and labeled "Primary and Preparatory".
					2 Primary					
					23 Primary & Preparatory	de05=4 Below intermediate (Primary-Preparatory)				
					3 Lower secondary					
					4 Secondary	de05=5 Intermediate education (secondary or equivalent)				
					5 Post secondary or equivalent	de05=6 Above Intermediate				
					6 University	de05=7 University				
					7 Postgraduate	de05=8 Post-graduate				
					99 Not stated	(members aged >=10 years and for whom the variable is missing)				

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
PTYPSEC	Type of secondary school attended		Only individuals who answered codes 4 in PEDUC are eligible. For all others, it will be missing. If there is no indication about the type of secondary school the variable will be missing	Harmonized categorical variable	1 Academic 2 Technical or vocational		INDs aged ....+	/		
PYEDUC	Number of effective years of schooling	This is a continuous variable of the number of years of formal schooling completed.	The lower age cut-off at which information is collected will vary from country to country. If no grade level information exists, this variable will be missing. The variable does not take into account the actual number of years required to reach this level, in other words, first grade repeated three times still only counts as 1 year of schooling. If a person has completed a BA/BSc, MA/MSc or PhD, but no number of years is known, use country specific information for the number of years.	Ordered discrete variable			INDs aged 10+	A	de05	Since we could not identify those who completed primary from those who completed preparatory education due to the combined categories of the original variable provided- aggregating both levels, the number of years of education completed assigned to those who completed primary and preparatory will be the minimum number of years of education that could be accomplished in such a category, i.e. "6 years of education" - this is to avoid probable inconsistencies with the person age. Though, this assumption may result in an underestimation of 3 years for those who completed preparatory and for whom the original data would not enable this distinction.
PATSCH	School attendance status	Indicates whether the individual is currently attending school	If person on short school holiday when interviewed, he or she is considered to be at school. However, if the person is on the holiday between two years of schooling, one cannot assume that he/she will continue schooling into the next year. Variable can be created using either attendance or enrolment question (since typically just one of them is available in each survey). In the case that both questions were available, attendance question MUST be used. This variable must ALWAYS have a note specifying which question (attendance/enrolment) had been used to create it. Does not include pre-school or kindergarten programs. Value must be missing for others. Does not require one to have completed any level. Adults currently attending literacy programs are considered as attending school (PATSCH = 1) In case the person is not currently attending school but there is no information on whether he attended school and left or never attended school use information from PEDUC to impute the right value.	Dummy variable	0 No 1 Yes	1 Employed 2 Unemployed ever worked 3 Unemployed never worked 5 Working Housewife 6 Out of labor force 7 Out of human force 4 Working student	All INDS	A	de07	Since there is no variable indicating school enrollment status, this variable is ONLY generated for those currently attending school and reported as working students in the main activity status variable (de07).this variable might be underestimating for those who are currently enrolled at school and not working reported outside labor force but couldn't be distinctively identified.

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
PENROL	Level of schooling presently attending	PENROL ideally provides information on the level of education in which the individual is enrolled.	For persons presently attending school (PATSCH=1), value missing for others. For secondary school, if not specified in the questionnaire, it is assumed that it is an academic secondary school. For the surveys where is no distinction between university and post university they are considered as university As with PEDUC, we recommend that PENROL be restructured as a categorical variable appropriate to the analysis.	Harmonized Categorical variable	1 Primary	de07=4 & de05=2 & de04<=12 de07=4 & de05=3 & de04<=12	Currently enrolled INDS aged 10+	A	de04 de05 de07	Generated only for those currently attending school and reported as working in the main activity status variable. The variable is generated using the highest level of education attained+1, therefore it is only generated for individuals aged 10+, i.e., if the highest level attained is primary for example, normally the individual should be attending in preparatory, except for postgraduates remained postgraduates since no higher levels could be attained. Those who were illiterate and are currently students were recoded into "primary" or "other" education, based on their age group since per Egyptian law if the student is above 12 years old he/she is admitted to preparatory, together with those indicated "read and write" in the educational status. "Secondary" and "above Intermediate" graduates were classified into "university" since no distinction between academic/vocational/technical secondary.
					2 Lower secondary	de07=4 & de05=4 & de04<15				
					3 Higher secondary- academic	de07=4 & de05=4 & de04>=15				
					4 Higher Secondary-technical/vocational					
					5 Post secondary technical					
					6 University	de07=4 & de05=5 de07=4 & de05=6				
					7 Postgraduate	de07=4 & de05=7 de07=4 & de05=8				
					8 Other	de07=4 & de05=2 & de04>12 de07=4 & de05=3 & de04>12				
ATYPSCH	Type of school attending	Provides information on the type of school the person is currently attending	Only for persons currently at school (PATSCH=1). Value must be missing for others. Public includes fully government owned as well as semi-public organization. Private are facilities run by non-governmental organizations (e.g. NGOs, religious institutions) or by private entities. Other refers to schools that cannot be categorized in the above classification such as community schools run by local parent groups. Does not include pre-school or kindergarten. For adults attending literacy programs use "Other"	Harmonized Categorical variable	1 Public		Currently enrolled INDS aged .....+	/		
					2 Private					
					3 Coranic					
					4 Adult literacy					
					5 Other

FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: LABOUR STATUS										
PCLFS	Labor force status in the current period	Current labor force status that distinguishes between the employed, the unemployed, and those not in the labor force.	Variable is constructed for all persons administered this module in each questionnaire. For this reason the lower age cut-off (and perhaps upper age cut-off) at which information is collected will vary from country to country. All persons are considered active in the labor force if they presently have a job (formal or informal, i.e. are employed) or do not have a job but are actively seeking work (i.e. unemployed). Variable is constructed for all persons administered this module in each questionnaire. For this reason the age cut-offs at which information is collected will vary from country to country.	Harmonized Categorical variable	1 Active 2 Inactive 99 Not stated	1 Employed 2 Unemployed ever worked 3 Unemployed never worked 4 Working Student 5 Working Housewife 6 Out of labor force 7 Out of human force (members aged >= 6 years and for whom the variable is missing)	INDs aged 6+	A	de07	Housewives and students reported in the employment status variable (de07) are "working" housewives/ students as identified in the original variable, hence they were recoded active in the relationship to labor force and classified by work status, occupation, economic activity, and sector of employment as well.
PCMAS	Main activity status in the current period	Main activity status with respect to the labor force, that distinguishes between the employed and the not employed. The employed are those for whom work is the main activity, while for all the others, the main activity should attempt to distinguish between pensioners, students, and homemakers.	The reference period might be the last 12 months or the current time period. Unlike PCLFS, the main distinction in PCMAS is between: - "Employed" -those who, during the reference period, carried out ANY employment (any type or any extent) - even just one occasional hour of paid work or irregular unpaid family work (ILO definition). Among the employed, the variable should distinguish, if available, between those employed at work and those on leave - "Not Employed". The rationale is that individuals do not generally spend their time "being unemployed", but use the time in unemployment to participate in other activities (e.g., attending school or being a housewife). Unemployment will generally be considered the primary activity only if the individual states that unemployment is his/her primary activity (e.g., unemployed and actively searching for a job) or if the individual is registered as unemployed and does not indicate significant participation in any other activity. In these cases, the individuals will be assigned to their own category among the "Not Employed". Accordingly, "Not Employed" are classified into: - Unemployed - individuals who are not employed according to the definition above, and who report that they are unemployed. - Not in Labor Force / Inactive – individuals identifiable as being neither employed nor unemployed, by the definitions above. If possible, the inactive category should distinguish between the retired, students, and homemakers. - Not Employed / Unemployed or Not in Labor Force - In some cases, it is not possible to distinguish between those who are unemployed and those who are inactive, but it is possible to determine that they are not employed. In those cases where it is not feasible to determine unemployed versus inactive status, these individuals will be coded as "Not Employed". In some surveys individuals are classified as employed students (or employed housewives) in that case they are considered as active in PCLFS and classified student (or housewives) in PCMAS. A cross tab between the two variables will permit to distinguish employed students (or housewives) from inactive ones. A proper documentation should particularly be done for those cases during harmonization process	Harmonized Categorical variable	1 Employed 2 Unemployed 3 Homemaker (Housewife) 4 Student 5 Pensioners/retired/disabled 6 Others 99 Not stated	de07=1 Employed de07=2 Unemployed ever worked de07=3 Unemployed never worked de07=5 Working Housewife de02=2 & de06=4 female married de07=4 Working Student (members aged >= 6 years and for whom the variable is missing)	INDs aged 6+	A	de02 de06 de07	<ul style="list-style-type: none"> <li>Matching the datasets in other countries, and for consistency purposes, for those reported as unemployed ever or never previously worked in de07, the work status, occupation, economic activity and sector of activity were recoded 99 with those who are active and for whom the above mentioned variables are not available, while all employment related variables were only recoded missing for those who are identified as inactive in the relation to labor force.</li> <li>Those reported as housewives are in 45 cases below 16 years of age (11-15 years old), and for whom normally no marital status is indicated, furthermore they are reported unpaid family workers, those are then assumed to be homemakers and not housewives in the sense of being married and outside the labor market.</li> <li>Pensioners/retired/disabled could not be identified since there is no question available indicating this information.</li> </ul>

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
PCEMS	Status of Employment	Detailed description of the employment status (employee, own-account workers, employer, unpaid family worker, etc.) in (current or last held) job, ideally following the ICSE classification.	The lower age cutoff (and perhaps upper age cutoff) at which information is collected will vary from country to country. Definitions taken from the International Labor Organizations Classification of Status in Employment with some revisions to take into account the data available. Employee includes anyone whose basic remuneration is not directly dependent on the revenue of the unit they work for, typically remunerated by wages and salaries but may be paid for piece work or in-kind. The continuous criteria used in the ILO definition is not used here as data are often absent and due to country specificity. Public includes quasi-government organizations. Employer is a business owner (whether alone or in partnership) with employees. If the only people working in the business are the owner and contributing family workers, the person is not considered an employer (as has no employees) and is, instead classified as own account. Own account or self-employment: jobs are those where remuneration is directly dependent from the goods and service produced (where home consumption is considered to be part of the profits) and have not engaged any permanent employees to work for them on a continuous basis during the reference period. Members of producers cooperatives are workers who hold a self-employment job in a cooperative producing goods and services. Contributing family workers are those workers who hold a self-employment job in a market-oriented establishment operated by a related person living in the same households who cannot be regarded as a partner because of their degree of commitment to the operation of the establishment, in terms of working time or other factors, is not at a level comparable to that of the head of the establishment. Workers not classifiable by status (code 6) include those for whom insufficient relevant information is available and/or who cannot be included in any of the preceding categories. The variable should generally cover the active sample (employed and unemployed). Active sample reported as "not stated (code 99)" should normally include employed for whom the status was not identified and unemployed if status in last job is not reported.	Harmonized Categorical variable	1 Employee	1 Employee	Active INDs aged 6+	A	de08	
					2 Employer	2 Employer				
					3 Own account, self-employed	3 Self-employed				
					4 Contributing (unpaid) family workers	4 Unpaid family workers				
					5 Member of producers cooperatives					
					6 Workers not classifiable by status (other)					
					99 Not stated	(active members aged >=6 years and for whom the variable is missing)				
POCC	Classification of Occupations for main job	International Standard Occupational classification of the main (current or last held) job, with as much detail as possible (ideally 4-digit ISCO-88/08 if available in original survey).  The lower age cut-off (and perhaps upper age cut-off) at which information is collected will vary from country to country. Classifies the main job of any individual with a job (EMPLOYED=1) and is missing otherwise. As most surveys collected detailed information and then coded it using national classifications, and the original data is not in the data bases, no attempt has been made to correct or check the original coding. The variable should generally cover the active sample (employed and unemployed). Active sample reported as "not stated (code 99)" should normally include employed for whom the occupation was not identified and unemployed if occupation in last job is not reported.	Harmonized Categorical variable	1 Legislators, senior officials and managers	11 thru 18	Active INDs aged 6+	A	de11	Labels for codes of de11 were not defined, therefore a guidance of coding instructions provided with the 2000 survey methodology was used. accordingly, Occupation classification was recoded as per the occupation classification index of the Egyptian statistical office (CAPMAS) Rev 1996. The 1996 classification follows the international classification (ISCO-88).	
				2 Professionals	21 thru 29					
				3 Technicians and associate professionals	31 thru 39

					5 Construction	45				
					6 Commerce	50 thru 52				
					7 Transportation, Storage and Communication	55 thru 64				
					8 Financial, Insurance and Real Estate	65 thru 74				
					9 Public Administration	75				
					10 Other Services	80 thru 99				
					11 Unspecified					
	99 Not stated	(active members aged >=6 years and for whom the variable is missing)								
PTYPEWK	Sector of employment	Sector of employment (i.e. private versus public sector workers) of the (current or last held) primary job.	Cooperative includes also employee in joint ventures. Other include workers in national NGOs and in private households Foreign includes workers in international NGOs Quai public sectors are considered as public. In case there is no distinction between Government and public (the survey mixes both categories) we use the classification used in the original data. The variable should generally cover the active sample (employed and unemployed). Active sample reported as "not stated (code 99)" should normally include employed for whom the sector was not identified and unemployed if sector of last job is not reported.	Harmonized categorical variable	1 Government	1 Government	Active INDS aged 6+	A	de13	
					2 Public sector	2 Economic institutions 3 Public				
					3 Private sector	4 Private				
					4 Joint/Cooperative	5 Cooperative				
					5 Foreign sector	7 Foreign				
					6 Other	6 Non governmental organizations				
						99 Not stated				
PTENURE	Tenure in current job	Duration of time worked in main (current or last held) job.	PTENURE may be provided directly in the data or may be calculated from calendar data or a combination of questions. The variable should generally cover the active sample (employed and unemployed).	Semi-standardized continuous variable when information is provided in continuous years			Active INDS aged ..... +	/		
PWEEKTL	Total weeks worked	Number of weeks worked in a year	PWEEKTL provides the number of weeks worked in any job (full- or part-time) during the reference period. The variable should generally cover the active sample (employed and unemployed).	Semi-standardized continuous variable when provided weeks are continuous			Active INDS aged ..... +	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	EGYPT, 1999				
						Survey Values and Value Labels	Universe	Key	Variable (s) used from the survey	Country specific comments
<b>FILE LEVEL: PERSON</b>  <b>IDEAL UNIVERSE: ALL INDIVIDUALS</b>  <b>IDEAL REFERENCE PERIOD: ONE YEAR</b>  <b>CATEGORY: ANNUAL INCOME</b>			1) All income variables are recorded as yearly amounts. Amounts are annualized, if not provided in original survey. 2) All income variables are recorded in national currency amounts. 3) Non-existing social benefits or other income sources are recorded as 0. As a rule, household-level income amounts are derived by summing the individual-level values for all individuals in the household. When individual data are not available, reported household amounts are used. In these cases, the person-level variables will not be available and these cases will be noted in the country-specific documentation. Where the household income variables are directly calculated from LIS person-level income variables, these are noted below. Annual Income amounts should be reported in country national currency							
PGWAG	Gross wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), gross of employee social insurance contributions/taxes but net of employer social insurance contributions/taxes.	When employer-provided sick pay can not be separated, it is included in the wages. In case there is no precision about whether the wage is net or gross we assume it is gross wage <b>If incomes are not available at the individual level, the variable is constructed directly from household level original information.</b>	Continuous variable			Income earners	/		
PNWAG	Net wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), net of employer and employee social insurance contributions and taxes.		Continuous variable			Income earners	/		
PIKEAR	In-kind earnings	In-kind income as a substitute or complement for cash wages. Includes, for example, the value of company cars, meals, housing, electricity, medical expenses, child care etc. paid or partly paid by the employer.	It does not exist on its own at the person level.	Continuous variable			Income earners	/		
PSINC	Self-employment income	Profit/loss from unincorporated enterprises. The income is recorded gross of social insurance contributions (but net of expenses).	Self-employment income is often collected with a different reference period than other more regular incomes; for example, it could refer to the last financial year for which business accounts for the purposes of taxation were prepared. Includes imputed income from owner occupied dwellings and own produced food for home consumption <b>If farm and non-farm self-employment income are not supplied separately, users can try to split them at the individual level</b>	Continuous variable			Income earners	/		
PRENTAL	Income less expenses from rentals	Rentals from dwellings, business buildings, vehicles, equipment, etc excludes rent from land		Continuous variable			Income earners	/		
PPROINC	Property income	Interest received less interest paid Dividends Rent from land		Continuous variable			Income earners	/		
PTRANSF	Current transfers received	Social insurance, assistance, inter-household transfers, regular support received such as charities Disability pensions, allowances, benefits etc. Child/family benefits		Continuous variable			Income earners	/		
PTRPAID	Current transfers paid	Employers' social insurance contributions Employees' social insurance contributions Taxes on income less refund Regular taxes on wealth Regular inter-household cash transfers Regular cash transfers to charities	In some datasets mandatory social insurance contributions are recorded together with the taxes and are, therefore, included here. If the original data only has one tax variable with all the taxes lumped together, the variable is included here. If the original survey only asked for net incomes, this variable usually remains empty. In many datasets, income taxes are not asked directly to the respondents but simulated through a taxation micro simulation model.	Continuous variable			Income earners	/		
PTOTDINC	Total disposable income		<b>PGWAG+PSINC+PRENTAL+PPROINC+PTRANSF</b>	Continuous variable			Income earners	/		
PTOTINC	Total income		<b>PTOTDINC+PTRPAID</b>	Continuous variable			Income earners	/
