DATA DICTIONARY (Version 2), Tunisia, EBCNV 2005

Important notes:										
- All text in blue indicate formulas generated by ERF - All text in green represent a recommendation - All cells shaded in orange indicate country specific information, standard values generated by ERF or values of a scale variable - All cells shaded in green, blue or purple indicate different levels of expenditure/income aggregates - All cells shaded in light blue indicate new variables or those added to include detailed/composite coding - Under column "Key": -A: indicates a variable that is available in/can be generated from the survey dataset -/: indicates a variable that is not available in/cannot be generated from the survey dataset										
Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
FILE LEVEL: ALL										
IDEAL UNIVERSE: ALL OBSERVATIONS										
CATEGORY: IDENTIFICATION (FILE INFORMATION)										
COUNTRY	Country	A numeric variable representing the country and coded following UN recent country classification in Dec. 2012.	This variable exists both in the household and the person file and is necessary when concatenating files from different datasets. Use this variable when concatenating files from different datasets.	Numeric discrete variable			All HHS	A		Generated by ERF
YEAR	Survey Year	Year during which the survey was performed	This variable exists both in the household and the person file and is necessary when concatenating files from different datasets. Use this variable when concatenating files from different datasets.	Ordered discrete variable			All HHS	A		Generated by ERF
CASESER	Unique unit identifier	Sequential anonymous household identifier usually provided in the dataset	This variable exists both in the household and person file and is necessary when merging the two files. This identifier is unique only within each country/year dataset; when combining different countries or years it is necessary to use it in combination with the variables COUNTRY and YEAR in order to uniquely identify households. When merging household and individual level files from the same dataset, use this variable to link each individual to the right household.	Ordered discrete variable			All HHS	A	v_001	

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005							
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments			
<b>HOUSEHOLD COMPOSITION AND CHARACTERISTICS</b>						Gives information on the household composition and characteristics such as the number of children, their age and gender. The dwelling conditions the access to public facilities ...							
<b>FILE LEVEL: HOUSEHOLD</b>													
<b>IDEAL UNIVERSE: ALL HOUSEHOLDS</b>													
<b>IDEAL REFERENCE PERIOD: AT PRESENT</b>													
<b>CATEGORY: FILE INFORMATION</b>													
HWEIGHT	Household weight	Data provider household weight	The household weight can correct just for sample bias, or also for non-sampling errors (such as response bias and adjustment to population distribution). In many cases, the weight is a population weight, which means that the weight will inflate the result to reflect the total population. <i>We strongly recommend that all statistical analysis be performed using the data weights</i>	Continuous variable			All HHS	A	V700				
REG	Region	Region of residence		Categorical variable			All HHS	A	v_850				
AREA	Area	Second geographical variable identifying another aspect of the location of the unit not described in REG such as city or village		Categorical variable			All HHS	A	v_010				
RURURB	Urban/Rural residence	Indicates whether the region is urban/rural	In case the country has refugee camps (as in Palestine), the "refugee camp" category is coded "2"	Harmonized categorical/dummy variable	0 Rural	3 Rural	All HHS	A	v_010				
					1 Urban	1 Large cities 2 Other cities							
					2 Refugee camps								
HNUM	Number of persons	Total number of persons in the household (including children or any other individuals not included in individual-level survey for any reason)	<i>In general <math>\Sigma</math> over all individuals in household</i> <i>If the individual file does not include all household members, the variable is constructed directly from household level original information</i> <i>FEMLNUM+MALNUM = HNUM</i>	Ordered discrete variable			All HHS	A	v_205	Generated by ERF			
MALNUM	Number of Males	Total number of Males in the household (including children)									A	v_205	Generated by ERF
FEMLNUM	Number of Females	Total number of females in the household (including children)									A	v_205	Generated by ERF
CH14	Number of persons under age 14	Number of persons under age 14 living in the household	This includes (ever) married children as well as heads and spouses under fourteen. If the individual file does not include all household members, the variable is constructed directly from household level original information								A	v_210	Generated by ERF
NUM65	Number of persons aged 65 or more	Number of household members aged 65 or more including head and spouse.	<i>If the individual file does not include all household members, the variable is constructed directly from household level original information</i>								A	v_210	Generated by ERF
HCOMP	Household composition	Indicates the composition of the household with the number of adults and of children using standardized family models: 2 adults no children, 2 adults 1-2 children etc..	This variables might not exist in all surveys and can be constructed using the information in the household and person files. <i>In case the variable is generated, the adult is defined as either a:</i> <i>- HH member aged 18 years or older</i> <i>- HH head even if aged less than 18 years</i> <i>- a married HH member even if aged less than 18 years</i>	Harmonized categorical variable	1 1-2 adults, no children 2 1-2 adults, 1-2 children 3 1-2 adult, 3 or more children 4 3 or more adults, 0-1children 5 3 or more adults, 2-3 children 6 3 or more adults, 4 or more children		All HHS	A	v_203 v_210 v_215	Generated by ERF			
MARRIED	Head living in couple	Standardized code that indicates whether the head of the household has a partner and the type of partnership	The head may cohabit with his mother or sister and in this case the concept of No couple applies. Another possible status is when the head has several spouses. Here a problem should exist if the spouses live in different houses so two different households may have the same head. <i>Generated from individual files</i>	Harmonized categorical variable	0 No couple present in household 1 Married couple head and spouse 2 Several cohabiting spouses		All HHS	A	v_203	Generated by ERF			

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
EARN	Number of earners	Number of household members who receives any earnings.	All individuals who have received any earnings during the reference period, only a subset may have been in employment at the time of the survey. If the individual file does not include all household members, or if incomes are not available at the individual level, the variable is constructed either from other individual level variables (e.g. employment status), or directly from household level original information. Pensioners and any individual receiving any kind of income is considered as earner.	Ordered discrete variable			All HHS	A	v_230 v_232 v_245	Generated by ERF by summing the total number of household members who were working during the week preceding the survey (v_230), in addition to the number of those who didn't work during the reference period due to illness, in rest leave, in leave because of bad weather, temporary stop of enterprise activity (v_232). Those who have income or managing own property in addition to the number of pensioners (retired) were also counted among earners. Unpaid family workers were excluded. When the employment status is missing, unpaid family workers could not be identified, hence, they were not classified among income earners.
INCS	Source of income	Main income source of the household	This variable may not exist in most of the surveys but can be constructed from the individual files	Harmonized categorical variable	10 Household business		All HHS	/		
					20 Salaries and wages					
					30 Remittances from country or abroad					
					40 Pensions					
					50 Other					
HHTYPE	Household type	Identifying collective and non-collective households	Collective households are composed of a number of non-residents, having the same gender, living together, and are all employed. No head is identified for collective households, and the relationship to head variable will be recoded missing for all household members Non-collective households are mostly residents having the regular structure of a family (Head, spouse, ....etc)	Dummy variable	0 Non-collective		All HHS	/		
					1 Collective					
DWLTYP	Type of dwelling [Standardized version]	Type of the dwelling	This variable mainly distinguishes between villa, apartments and others "House" includes traditional, modern or Arabic house etc. "Villa" includes palace, villa or a floor in a villa, duplex etc. "Other" includes clay/reed house, primitive house, caravan etc.	Harmonized categorical variable	1 House	1 Arabic House 3 Small house, part of a villa 5 House in oukala	All HHS	A	v_051	
					2 Villa	2 Villa or a floor in a villa				
					3 Apartment	4 Apartment				
					4 Others	6 Humble house (Tent...) 7 Other housing type (cave,...) 8 A place not designed for housing				

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
DWLTYP_D	Type of dwelling [Detailed version]	Type of the dwelling	This variable is the detailed version of the above type of dwelling variable (DWLTYP), it mainly distinguishes between different types of houses, villas, apartments and other residential units.	Harmonized categorical variable	100 House		All HHS	A	v_051	
					110 Countryside house					
					120 Arabic house	1 Arabic House				
					130 Traditional house					
					140 Modern house					
					150 Public or part of a public house					
					160 Small house (part of a villa)	3 Small house, part of a villa				
					170 House in an agency	5 House in oukala				
					180 House built in bricks or rocks or concrete					
					190 "1" Floor building					
					200 Villa					
					210 Villa or floor in a villa	2 Villa or a floor in a villa				
					220 Part of a villa					
					230 Palace					
					300 Apartment	4 Apartment				
					310 More than one apartment					
					400 Others					
					410 One or more separate room					
					420 One or more room in a housing unit					
430 Tent, hut, shack, slum, grotto, shebra, caravan, Barakia (marginal), ..	6 Humble house (Tent,...) 7 Other housing type (cave,...)									
440 Clay or reed house										
450 Other place not suitable for residence	8 A place not designed for housing									
DWLTEN	Tenure of dwelling [Standardized version]	Type of tenure	This variable distinguishes between owned or rented living quarters.	Harmonized categorical variable	1 Rented	2 Tenant	All HHS	A	v_060	
					2 Owned	1 Owner				
					3 Provided free	3 Provided free				
					4 Others					

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
DWLTEN_D	Tenure of dwelling [Detailed version]	Type of tenure	This variable distinguishes between different types of owned, rented, provided free or other forms of tenure for living quarters.	Harmonized categorical variable	100 Rented	2 Tenant	All HHS	A	v_060	
					110 Unfurnished rent					
					120 Furnished rent					
					130 Old law rent					
					140 New law rent					
					150 Rent with key money					
					200 Owned	1 Owner				
					210 Unit owned (privately or jointly)					
					220 Unit bought					
					230 In the process of being acquired					
					240 Mortgage with or without rent					
					300 Provided free	3 Provided free				
					310 Provided free by employer, by work					
					320 Subsidized rent, without payment, from work					
					330 Gift/granted					
					340 In-kind benefit					
					350 Without payment					
400 Others										
410 Free agreement										
420 No agreement										
430 Provided for work										
ROOM	Number of rooms	Number of rooms excluding bathroom and kitchen	In some surveys there is no indication whether the bathroom and kitchen are counted in the number of rooms or not, we assume they are excluded	Ordered discrete variable			All HHS	A	v_055	
ELECT	Electrified	Indicates if the dwelling is electrified or not	This variable is often generated from the source of lighting. Using private generator is considered as electrified.	Dummy variable	0 No	4 Kerosene lamp 5 Oil lamp	All HHS	A	v_071	It is indicated in the Arabic/French questionnaire that code "6: other source" includes private generator. Therefore, code "6" is recoded "electrified".
					1 Electrified	1 Electricity (STEG) and the household pays the bill 2 Electricity (STEG) and the invoice is included in the rent 3 Electricity (STEG) For free (STEG agent..) 6 Other source (private generator..)				
SLIGHT	Source of energy for lighting	Distinguish between public and private sources of electricity and other sources of lighting	Private electricity includes community and private generators and cooperative networks "Others" may include sources that are presented independently in the standardized value if the survey is not enough detailed (example it may include gas and kerosene)	Harmonized categorical variable	1 Public network	1 Electricity (STEG) and the household pays the bill 2 Electricity (STEG) and the invoice is included in the rent 3 Electricity (STEG) For free (STEG agent..)	All HHS	A	v_071	It is notable that in the provided Arabic/French questionnaire code "6" includes other source and specified private generator as a result code "6" is recoded as a private source of energy for lighting .
					2 Private	6 Other source (private generator..)				
					3 Gas	5 Oil lamp				
					4 Kerosene	4 Kerosene lamp				
					5 Others					

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
SCOOK	Source of energy for cooking	Distinguish between different sources of energy for cooking		Harmonized categorical variable	1 Electricity	1 Electricity (STEG company)	All HHS	A	v_126	Code "6" includes wood and other sources as stated in the questionnaires (Arabic and French). Therefore, code"6" is recoded "4:wood and coal" in source of energy for cooking.
					2 Gas	2 Natural gas (STEG company) 3 Gas cylinder				
					3 Kerosene	4 kerosene				
					4 Wood & coal	5 Coal 6 Wood and other				
					5 Others					
WAT	Water facilities	Indicates from where the household get its drinking water	This variable indicates the main source of drinking water. Piped supply includes public and private networks; public tap includes fountains and springs; wells are either with or without pumps private or public etc. Tanker includes purchased water indoor or outdoor; other includes lakes, rivers, rainwater etc.	Harmonized categorical variable	1 Piped supply	1 National network (SONEDE) with Payment of the bill 2 National network (SONEDE) and the bill is included in the rent 3 National network (SONEDE) For free	All HHS	A	v_100	
					2 Public tap	4 Public tap				
					3 Well	7 Well				
					4 Tanker	6 Private tank				
					5 Other	5 Water fountain of NGO or water seller 8 Wadi...				
TFACIL	Transportation facilities	Indicates the proximity to public transportation	This variable indicates the distance range to public transportation In case we have different ordinal variables indicating proximity different transportation means (separately) such to taxi, bus, etc. we take the average.	Harmonized categorical variable	1 Less than 1 km		All HHS	/		
					2 1-5 km					
					3 More than 5 km					
SFACIL	Schooling facilities	Indicates the proximity to schools/universities	This variables is a summary of variables indicating the distance to elementary school, university etc. In case we have different ordinal variables indicating proximity to different education establishments (separately) such to elementary schools, secondary schools, etc. we take the average.	Harmonized categorical variable	1 Less than 1 km		All HHS	/		
					2 1-5 km					
					3 More than 5 km					
HFACIL	Health facilities	Indicates the proximity to health centers and hospitals	This variables is a summary of variables indicating the distance to health centre and hospital In case we have different ordinal variables indicating proximity to different health establishments (separately) such to private doctors, hospitals health centers, etc. we take the average.	Harmonized categorical variable	1 Less than 1 km		All HHS	/		
					2 1-5 km					
					3 More than 5 km					
TOIF	Toilet facility	Indicates whether the household has access to toilet facility	In case we don't have information on the connection to sewage system but we do know if the toilet is inside or outside the dwelling we can consider toilets outside the dwelling as not connected to sewage (option 2).	Harmonized categorical variable	1 Yes and connected to sewage	1 Toilet is connected to sewerage network	All HHS	A	v_124	The category "No toilet facility" could not be indicated since it is not reported in any of the dwelling characteristics collected in the questionnaire.
					2 Yes but not connected to sewage	2 Toilet is not connected to sewerage network				
					3 No facility					
TOIF_SH	Toilet facility shared	Indicates whether the household shares the toilet facility or no	In case we don't have information on whether the toilet is shared or not but we do know if the toilet is inside or outside the dwelling we can consider that all toilets outside the dwelling are shared toilets	Harmonized categorical variable	1 Private toilet	1 Toilet with water flush 2 Toilet without water flush	All HHS	A	v_123	
					2 Shared toilet	3 Toilet outside dwelling				
					3 No toilet facility					

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
GRBG_DSP	Garbage disposal method	Indicates the method the household uses for garbage disposal		Harmonized categorical variable	100 Collected		All HHS	/		
					110 Collected by a private worker					
					120 Collected by a private company					
					130 Collected by government services					
					200 Thrown in a public bin					
					210 Thrown in a closed public bin					
					220 Thrown in an unclosed public bin					
					300 Thrown in a garbage area					
					400 Thrown in the streets					
					500 Thrown randomly					
					600 Burnt					
					700 Other					
					710 Heap					
					720 Pit					
730 Recycled										
CAR	Has a car, van, taxi, cart, etc ...	Indicates if the household owns or has free access to a car, van, taxi, cart ... or any other type of vehicles		Dummy variable	0 None	v_401=2	All HHS	A	v_401 v_402 v_403 v_404	This variable is constructed using 4 variables, where v_401 and v_403 indicate status of ownership and v_402 and v_404 indicate type of vehicle owned.  Includes: Private car or cart
					1 Own one or many	v_401 =1 & v_402= 1,2,6 (HH owns a car or cart) OR v_403 =1 & v_404= 1,2,6 (HH owns a second car or cart)				
CAR_N	Number of cars, vans, taxies, carts, etc ...	Indicates the number of cars, taxies, carts ... or any other type of vehicles the household owns or has free access to		Continuous variable			HHS reported ownership	/		
TRUCK	Has a truck, tractor, etc ...	Indicates if the household owns or has free access to truck, tractor, etc..		Dummy variable	0 None	2 No	All HHS	/		
					1 Own one or many	1 Yes				
TRUCK_N	Number of trucks, tractors, etc ...	Indicates the number of trucks, tractors, etc.. the household owns or has free access to		Continuous variable			HHS reported ownership	/		
MBCYCLE	Has bicycle, scooter, motorcycle, etc...	Indicates if the household owns or has free access to bicycle, scooter, motorcycle, etc...		Dummy variable	0 None	401=2	All HHS	A	v_401 v_402 v_403 v_404	This variable is constructed using 4 variables, where v_401 and v_403 indicate status of ownership and v_402 and v_404 indicate type of vehicle owned.  Includes: Bicycle or motorcycle
					1 Own one or many	v_401 =1 the HH owns a vehicle & v_402= 3 or 4 or 5 ( the type of vehicle owned is bicycle or motorcycle) OR v_403 =1 the HH owns other vehicle & v_404= 3 or 4 or 5 ( the type of vehicle owned is bicycle or motorcycle)				
MBCYCLE_N	Number of bicycles, scooters, motorcycles, etc... the household owns or has free access to	Indicates the number of bicycles, scooters, motorcycles, etc... the household owns or has free access to		Continuous variable			HHS reported ownership	/		
TELTV	Has a TV, LCD, LED, etc...	Indicates if the household owns or has free access to a TV, LCD, LED, etc..		Dummy variable	0 None	2 No	All HHS	A	v_138	Includes: TV
					1 Own one or many	1 Yes				
TELTV_N	Number of TVs, LCDs, LEDs, etc...	Indicates the number of TVs, LCDs, LEDs, etc... the household owns or has free access to		Continuous variable			HHS reported ownership	/		
RADIO	Has radio or radio-cassette	Indicates if the household owns or has free access to a radio or radio-cassette		Dummy variable	0 None	2 No	All HHS	A	v_136 v_137	Includes: Radio and radio cassette
					1 Own one or many	1 Yes				
RADIO_N	Number of radios or radio-cassettes	Indicates the number of radios radio-cassettes the household owns or has free access to		Continuous variable			HHS reported ownership	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
SATD_REC	Has satellite dish, receiver, etc...	Indicates if the household owns or has free access to a satellite dish, receiver, etc...		Dummy variable	0 None	2 No	All HHS	A	v_142 v_176	Includes: Satellite dish and channel cable services
					1 Own one or many	1 Yes				
SATD_REC_N	Number of satellite dishes, receivers, etc...	Indicates the number of satellite dishes, receivers etc... the household owns or has free access to		Continuous variable			HHS reported ownership	/		
PLAYER	Has DVD, VCR, CD player, audio player, etc...	Indicates if the household owns or has free access to a DVD, VCR, CD player, radio-cassette, recorder, audio player etc...		Dummy variable	0 None	2 No	All HHS	A	v_139	Includes: Video player
					1 Own one or many	1 Yes				
PLAYER_N	Number of VCRs/CD players, audio players, etc...	Indicates the number of DVDs, VCRs, CD players, radio-cassettes, recorders, audio players, etc... the household owns or has free access to		Continuous variable			HHS reported ownership	/		
CAMERA	Has photo or video camera	Indicates if the household owns or has free access to a photo or video camera		Dummy variable	0 None	2 No	All HHS	A	v_140 v_141	Includes: Photo or video camera
					1 Own one or many	1 Yes				
CAMERA_N	Number of photo or video cameras	Indicates the number of photo or video cameras the household owns or has free access to		Continuous variable			HHS reported ownership	/		
GAME	Has any type of video or electronic games	Indicates if the household owns or has free access to any type of video or electronic games (playstation, gameboy, Wii, ....)		Dummy variable	0 None		All HHS	/		
					1 Own one or many					
GAME_N	Number of video or electronic games	Indicates the number of any type of video or electronic games (playstation, gameboy, Wii, ....) the household owns or has free access to		Continuous variable			HHS reported ownership	/		
TELPH	Has telephone, cell phone, etc...	Indicates if the household owns or has free access to a telephone, cell phone etc...		Dummy variable	0 None	v_160= 5 and v_166=3 and v_167=2	All HHS	A	v_160 v_166 v_167	Includes: Landline or cell phone
					1 Own one or many	v_160= 1 to 4 or v_166= 1 to 2 or v_167=1				
TELPH_N	Number of telephones, cell phones, etc...	Indicates the number of telephones, cell phones etc... the household owns or has free access to		Continuous variable			HHS reported ownership	/		
FAX	Has fax line or fax machine	Indicates if the household owns or has free access to a fax line or fax machine		Dummy variable	0 None		All HHS	/		
					1 Own one or many					
FAX_N	Number of fax lines or fax machines	Indicates the number of fax lines or fax machines the household owns or has free access to		Continuous variable			HHS reported ownership	/		
COMPUTER	Has computer or laptop connected or not to an internet line	Indicates if the household owns or has free access to a computer or laptop connected or not to an internet line		Dummy variable	0 None	2 No	All HHS	A	v_152	Includes: Personal computer or laptop.
					1 Own one or many	1 Yes				
COMPUTER_N	Number of computers or laptops connected or not to an internet line	Indicates the number of computers or laptops connected or not to an internet line the household owns or has free access to		Continuous variable			HHS reported ownership	/		
INTERNET	Has internet line and related equipments (router, USB, etc...)	Indicates if the household owns or has free access to an internet line and related equipments (router, USB, etc...)		Dummy variable	0 None	2 No	All HHS	A	v_173	Includes: Internet connection
					1 Own one or many	1 Yes				
INTERNET_N	Number of internet lines and related equipments (router, USB, etc...)	Indicates the number of internet lines and related equipments (router, USB, etc...) the household owns or has free access to		Continuous variable			HHS reported ownership	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
REFRG	Has refrigerator, freezer, water cooler, etc...	Indicates if the household owns or has free access to a refrigerator, freezer, water cooler, etc...		Dummy variable	0 None	2 No	All HHS	A	v_143 v_144	Includes: Refrigerator and deep freezer.
					1 Own one or many	1 Yes				
REFRG_N	Number of refrigerators, freezers, water coolers, etc...	Indicates the number of refrigerators, freezers, water coolers, etc... the household owns or has free access to		Continuous variable			HHS reported ownership	/		
COOKER	Has cooker, stove, oven, etc...	Indicates if the household owns or has free access to a gas or electric cooker, stove, oven, etc...		Dummy variable	0 None	2 No	All HHS	A	v_147 v_148	Includes: Stove with or without oven
					1 Own one or many	1 Yes				
COOKER_N	Number of cookers, stoves, ovens, etc...	Indicates the number of gas or electric cookers, stoves, ovens, etc... the household owns or has free access to		Continuous variable			HHS reported ownership	/		
MICROWAVE	Has microwave, grill, fryer, etc...	Indicates if the household owns or has free access to a microwave, grill, fryer, etc...		Dummy variable	0 None	2 No	All HHS	A	v_149	Includes: Microwave
					1 Own one or many	1 Yes				
MICROWAVE_N	Number of microwaves, grills, fryers, etc...	Indicates the number of microwaves, grills, fryers, etc... the household owns or has free access to		Continuous variable			HHS reported ownership	/		
SKITAPP	Has food processor, kitchen machine, blender, grinder etc...	Indicates if the household owns or has free access to any of small kitchen appliances like a food processor, kitchen machine, blender, grinder etc...		Dummy variable	0 None		All HHS	/		
					1 Own one or many					
SKITAPP_N	Number of food processors, kitchen machines, blenders, grinders, etc...	Indicates the number of small kitchen appliances like a food processor, kitchen machine, blender, grinder etc... the household owns or has free access to		Continuous variable			HHS reported ownership	/		
WASH	Has washing machine	Indicates if the household owns or has free access to a manual or an automatic washing machine		Dummy variable	0 None	2 No	All HHS	A	v_145	Includes: Washing machine
					1 Own one or many	1 Yes				
WASH_N	Number of washing machines	Indicates the number of manual or automatic washing machines the household owns or has free access to		Continuous variable			HHS reported ownership	/		
DRYER	Has a clothes dryer	Indicates if the household owns or has free access to a clothes dryer		Dummy variable	0 None		All HHS	/		
					1 Own one or many					
DRYER_N	Number of clothes dryers	Indicates the number of clothes dryers the household owns or has free access to		Continuous variable			HHS reported ownership	/		
DSHWSH	Has a dishwasher	Indicates if the household owns or has free access to a dishwasher		Dummy variable	0 None	2 No	All HHS	A	v_146	Includes: Dishwasher
					1 Own one or many	1 Yes				
DSHWSH_N	Number of dishwashers	Indicates the number of dishwashers the household owns or has free access to		Continuous variable			HHS reported ownership	/		
COND	Has an air conditioner	Indicates if the household owns or has free access to an air conditioner		Dummy variable	0 None	2 No	All HHS	A	v_150	Includes: AC
					1 Own one or many	1 Yes				
COND_N	Number of air conditioners	Indicates the number of air conditioners the household owns or has free access to		Continuous variable			HHS reported ownership	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
FAN	Has an electric fan	Indicates if the household owns or has free access to an electric fan		Dummy variable	0 None	2 No	All HHS	A	v_151	Includes: Electric fan
					1 Own one or many	1 Yes				
FAN_N	Number of electric fans	Indicates the number of electric fans the household owns or has free access to		Continuous variable			HHS reported ownership	/		
HEATER	Has a heater	Indicates if the household owns or has free access to a gas, electric or solar heater		Dummy variable	0 None		All HHS	/		
					1 Own one or many					
HEATER_N	Number of heaters	Indicates the number of gas, electric or solar heaters the household owns or has free access to		Continuous variable			HHS reported ownership	/		
WAHEAT	Has a water heater	Indicates if the household owns or has free access to a solar, gas or electric water heater		Dummy variable	0 None		All HHS	/		
					1 Own one or many					
WAHEAT_N	Number of water heaters	Indicates the number of solar, gas or electric water heaters the household owns or has free access to		Continuous variable			HHS reported ownership	/		
SEWING	Has a sewing machine	Indicates if the household owns or has free access to a sewing machine		Dummy variable	0 None	2 No	All HHS	A	v_153	Includes: Sewing machine
					1 Own one or many	1 Yes				
SEWING_N	Number of sewing machines	Indicates the number of sewing machines the household owns or has free access to		Continuous variable			HHS reported ownership	/		
VACUUM	Has a vacuum cleaner	Indicates if the household owns or has free access to a vacuum cleaner		Dummy variable	0 None		All HHS	/		
					1 Own one or many					
VACUUM_N	Number of vacuum cleaners	Indicates the number of vacuum cleaners the household owns or has free access to		Continuous variable			HHS reported ownership	/		
IRON	Has an iron	Indicates if the household owns or has free access to an iron		Dummy variable	0 None	2 No	All HHS	A	v_154	Includes: Electric iron
					1 Own one or many	1 Yes				
IRON_N	Number of irons	Indicates the number of irons the household owns or has free access to		Continuous variable			HHS reported ownership	/		
ODUR	Has other durables	Indicates if the household owns or has free access to any other household appliance		Dummy variable	0 None	2 No	All HHS	A	v_155	Includes: Hair dryer
					1 Own one or many	1 Yes				
ODUR_N	Number of other durables	Indicates the number of any other appliances the household owns or has free access to		Continuous variable			HHS reported ownership	/		
LIVESTOK	Has livestock	Indicates if the household owns any kind of livestock (cattle, sheep, poultry, horse, donkey etc...)		Dummy variable	0 None		All HHS	/		
					1 Own one or many					
LIVESTOK_N	Number of livestock	Indicates the total number of all kinds of livestock (cattle, sheep, poultry, horse, donkey etc...) the household owns		Continuous variable			HHS reported ownership	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
OLAND	Own land	Indicates whether the household owns land or not		Dummy variable	0 None		All HHS	/		
					1 Own one or many					
ALAND	Area of Own land	Indicates the area of the owned land	ALAND=0 IF OLAND=0 (do not own a land), hence this variable should be complete for all households except those for which OLAND is missing. The area of land should be reported in m <sup>2</sup>	Continuous variable			All HHS	/		
FLAND	Free access to land	Indicates the area of the accessed land		Continuous variable			All HHS	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
<b>HEAD'S AND SPOUSE'S CHARACTERISTICS</b>		Information on Head and Spouse are constructed from the person-level files. For more information about a specific variable, refer to the person-level variable referred to in "Contents".								
<b>FILE LEVEL: HOUSEHOLD</b>										
<b>IDEAL UNIVERSE: ALL HOUSEHOLDS</b>										
<b>IDEAL REFERENCE PERIOD: AT PRESENT</b>										
<b>CATEGORY: HEAD'S AND SPOUSE'S CHARACTERISTICS</b>										
AGEHD	Age of the head	Age in years.	In some datasets, age may be calculated at a certain reference date (e.g., 31 December of last year). When the original dataset has only age categories, age is calculated as the midpoint of the range provided. In some datasets, AGE is top coded by the data provider (e.g., a value of 95 represents 95 years of age or over).	Ordered discrete variable			All Heads	A	v_210	According to the provided methodology: 98 indicates those aged 98 years or older . 99 indicates that the respondent doesn't know his/her age and the interviewer is unable to estimate the age. Therefore, the 18 cases coded "99" were recoded "missing".
AGESP	Age of the spouse		In case the head has multiple spouses a variable for each spouse will be generated, and named AGESP_# where # is the spouse number				All Spouses			
SEXHD	Gender of the head	Gender	Indicator for gender of individual.	Harmonized categorical variable	1 Male	Structured the same as PSEX	All Heads	A	v_205	
SEXSP	Gender of the spouse		In case the head is male and has multiple spouses a variable for each spouse will be generated and will be named SEXSP_# where # is the spouse number. For all spouses except the first spouse, gender will be always 2 (female)				All Spouses			
MARTH	Marital status of the head [Standardized version]	Legal administrative status concerning marriage	Should not be imputed, it can be generated only for those to whom the question was asked (in other words, the youngest age at which information is collected may differ depending on the survey). Married refers to only formal marriages (including legally married). Polygamous unions includes males with multiple spouses. Number of spouses in household can be applied to compute polygamy.	Harmonized Categorical variable	1 Never married 2 Married monogamous 3 Married polygamous 4 Divorced/Separated 5 Widowed 99 Not stated	Structured the same as PMART	Heads aged 18 +	A	v_215	
MARTH_D	Marital status of the head [Detailed version]	Legal administrative status concerning marriage (detailed version of coding)		Harmonized Categorical variable		Structured the same as PMART_D	Heads aged 18 +	A	v_215	
PARTH	Partnership and parenthood status of the head	ERF recode that allows users to identify heads as having a partner (either married or unmarried) versus not having a partner, as well as parents as opposed to non-parents, using a single variable.	Partnership status for head may be restricted to civic status, parenthood status assumes that the children of the head are also children of the spouse.	Harmonized categorical variable	1 Head with partner or head's partner, with no children 2 Head with partner or head's partner, with children, youngest child < 18 3 Head with partner or head's partner, with children, youngest child 18+ 4 Single head, with no children 5 Single head, with children, youngest child < 18 6 Single head, with children, youngest child 18+		All Heads	A	v_203 v_210 v_215	Generated by ERF. Single head is defined as never married, divorced, separated or widowed. Head with partner is defined as a married head.
NATHD	Ethnicity/nationality of the head [Standardized version]	Ethnicity or nationality	The content of this variable is not uniform. In many datasets where information on ethnicity or nationality is not available in the original survey, it can also contain country of birth, race, ancestry or mother tongue.	Categorical variable		Structured the same as PETHNAT	All Heads	/		
NATSP	Ethnicity/nationality of the spouse [Standardized version]		In case the head has multiple spouses a variable for each spouse will be generated and will be named NATSP_# where # is the spouse number.				All Spouses			
NATHD_D	Ethnicity/nationality of the head [Detailed version]	Ethnicity or nationality (detailed version of coding)		Harmonized Categorical variable		Structured the same as PETHNAT_D	All Heads	/		
NATSP_D	Ethnicity/nationality of the spouse [Detailed version]						All Spouses			

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005					
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments	
IMMIGRHD	Immigration status of the head	Ideally indicates whether an individual is born in the country or has an immigrant background, and if possible, how recently he/she arrived. Other migration status information may be included if available.	The content of this variable is not uniform. By other migration status we tempt to capture those who migrate from one region to another inside the country (if the place of birth is different from the place of residence inside the country)	Harmonized categorical variable	1 Immigrant (from abroad)	Structured the same as PIMMIGR	All Heads	/			
IMMIGRSP	Immigration status of the spouse				2 Migrant (from another region inside the country)		All Spouses				
		In case the head has multiple spouses a variable for each spouse will be generated and will be named IMMIGRSP_# where # is the spouse number.	3 No								
BIRHD	Is the head born in his residence place	This variable indicates whether the person is born in his place of residence	In case the head has multiple spouses a variable for each spouse will be generated and will be named BIRSP_# where # is the spouse number.	Dummy variable	0 No	Structured the same as PBIR	All Heads	/			
BIRSP	Is the spouse born in her residence place				1 Yes		All Spouses				
BIRPLHD	Place of Birth of the head	This variable includes either the region, the area or the country of birth	Very few surveys contain this information	Categorical variable			All Heads	/			
BIRPLSP	Place of Birth of the spouse				In case the head has multiple spouses a variable for each spouse will be generated and will be named BIRPLSP_# where # is the spouse number.		All Spouses				
LITHD	Literacy status of the head	This variable indicates whether the person is literate (can read and write) or not	see PLIT If there are no questions about the read and write ability but the educational attainment is elementary or upper the individual is considered literate	Dummy variable	0 No	Structured the same as PLIT	Heads aged 3+	A	v_220 v_223		
LITSP	Literacy status of the spouse				In case the head has multiple spouses a variable for each spouse will be generated and will be named LITSP_# where # is the spouse number.		1 Can read & write				Spouses aged 3+
EDUHD	Educational level of the head [Standardized version]	Highest level of education attained.	see PEDUC	Harmonized categorical variable	1 None	Structured the same as PEDUC	Heads aged 3+	A	v_220 v_221 v_222 v_223 v_224 v_228		
EDUSP	Educational level of the spouse [Standardized version]				In case the head has multiple spouses a variable for each spouse will be generated and will be named EDUSP_# where # is the spouse number.		2 Primary/ Lower secondary				Spouses aged 3+
							3 Secondary				
EDUHD_D	Educational level of the head [Detailed version]	Highest level of education attained (detailed version of coding)		Harmonized categorical variable		Structured the same as PEDUC_D	Heads aged 3+	A	v_220 v_221 v_222 v_223 v_224 v_228		
EDUSP_D	Educational level of the spouse [Detailed version]						Spouses aged 3+				
MASHD	Main activity status of the head [Standardized version]	Main activity status during the survey period	See PCMAS	Harmonized categorical variable	1 Employed	Structured the same as PCMAS	Heads aged 15+	A	v_230 v_232		
MASSP	Main activity status of the spouse [Standardized version]				In case the head has multiple spouses a variable for each spouse will be generated and will be named MASSP_# where # is the spouse number.		2 Unemployed				Spouses aged 15+
							3 Homemaker (Housewife)				
					4 Student						
					5 Pensioners/retired/disabled						
					6 Others						
					99 Not stated

						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
<b>HOUSEHOLD EXPENDITURES</b>		Including annual amounts of consumption expenditures; if possible split following the COICOP international standard classification).	All expenditure variables are recorded as yearly amounts. Amounts are annualized if not provided as such in original data. Annual expenditure amounts should be reported in country national currency. Due to lack of details in many datasets, ERF constructs the expenditure variables, even if not all of the items are available. Any taxes included in the expenditure variables are deducted if possible. A check for outliers is necessary before conducting any analysis on the expenditure data. Extreme cases were detected in the original variables; however the appropriate method to deal with it was left to the user's judgment.							
<b>FILE LEVEL: HOUSEHOLD</b>										
<b>IDEAL UNIVERSE: ALL HOUSEHOLDS</b>										
<b>IDEAL REFERENCE PERIOD: INCOME REFERENCE PERIOD</b>										
<b>CATEGORY: ANNUAL EXPENDITURE</b>										
<b>FOOEXP</b>	Food and non-alcoholic beverages	Expenses on food and non-alcoholic beverages. Ideally, corresponds to Code 01 of the COICOP classification (SUM of 01).	All food expenditures include also own grown products expenses and gifts/in-kind received food. Expenses on take away food and meals taken in restaurants are included under code 11 <b>TOTPFODD+TOTOWNP+TOTGIKD</b>	Continuous variable			All HHS	A	v611	Amounts of expenditure are provided in an aggregated form in Millime.  All "per capita" amounts were multiplied by the number of household members to compute amounts per household.  Amounts were divided by 1000 to convert it to dinar.  Some detailed household expenditures provided by item, source and in some cases occasion of expenditure were summated and compared to the aggregated amounts and found acceptably similar, hence the aggregates originally provided from the statistical office were used in the harmonized data file.  Aggregates under each expenditure type are identified in the "Expenditure Aggregates" file.
<b>RICE</b>	Rice expenditures	Expenditures on rice in all forms	Purchased only	Continuous variable			All HHS	/		
<b>GRAIN</b>	Grains and flour expenditures	Wheat, Maize, Barely and all cereals in the grain or flour form	Purchased only	Continuous variable			All HHS	/		
<b>BREAD</b>	Bread and cakes	Bread in all forms, biscuits, cakes pizza..	Purchased only	Continuous variable			All HHS	/		
<b>PAST</b>	Pasta expenditures	Macaroni, Noodles, Couscous..	Purchased only	Continuous variable			All HHS	/		
<b>CERPRE</b>	Cereal preparation	Cornflakes, malt, tapioca..	Purchased only	Continuous variable			All HHS	/		
<b>CEREXP</b>	Purchased Bread and Cereals		<b>RICE+GRAIN+BREAD+PAST+CERPRE</b>	Continuous variable			All HHS	/		
<b>CEROWN</b>	Own-Produced Bread and Cereals			Continuous variable			All HHS	/		
<b>SMEAT</b>	Sheep and goats Meat expenditures	Fresh frozen and tinned goats and sheep meat	Purchased only	Continuous variable			All HHS	/		
<b>CMEAT</b>	Cow meat expenditures	Fresh frozen and tinned cow meat	Purchased only	Continuous variable			All HHS	/		
<b>OMEAT</b>	Other meat expenditures	Fresh frozen and tinned camel, rabbit, pork etc. meat	Purchased only	Continuous variable			All HHS	/		
<b>CHMEAT</b>	Chicken meat expenditure	Fresh frozen and tinned chicken, turkey, birds etc. meat	Purchased only	Continuous variable			All HHS	/		
<b>LMEAT</b>	Luncheon and Tinned meat	Fresh and frozen luncheon, tinned and others meat	Purchased only	Continuous variable			All HHS	/		
<b>MEATEXP</b>	Purchased Meat and Poultry		<b>SMEAT+CMEAT+OMEAT+CHMEAT+LMEAT</b>	Continuous variable			All HHS	/		
<b>MEATOWN</b>	Own-Produced Meat and Poultry			Continuous variable			All HHS	/		
<b>FISH</b>	Fish expenditures	Fresh and frozen fish expenditures, Tuna, sardines and tinned fish also smoked, salted, dried and processed fish	Purchased only	Continuous variable			All HHS	/		
<b>SEAF</b>	Seafood expenditures	Fresh, frozen and proceed seafood	Purchased only	Continuous variable			All HHS	/		
<b>FSHSEAEXP</b>	Purchased Fish and Seafood		<b>FISH+SEAF</b>	Continuous variable			All HHS	/		
<b>FSHSEAOWN</b>	Own-Produced Fish and Seafood			Continuous variable			All HHS	/		
<b>MILK</b>	Milk expenditures	Fresh, powder, condensed and infant powder milk expenses	Purchased only	Continuous variable			All HHS	/		
<b>YOGH</b>	Yogurt expenditures	Yogurt liquid, tinned, paste etc. cream, milk based deserts, milk based beverages	Purchased only	Continuous variable			All HHS	/		
<b>CHES</b>	Cheese expenditures	Processed, home made, tinned etc. cheese	Purchased only	Continuous variable			All HHS	/		
<b>EGG</b>	Eggs expenditures	Eggs and wholly made egg products	Purchased only	Continuous variable			All HHS	/		
<b>DAIRYEXP</b>	Purchased Dairy Products		<b>MILK+YOGH+CHES+EGG</b>	Continuous variable			All HHS	/		
<b>DAIRYOWN</b>	Own-Produced Dairy Products			Continuous variable			All HHS	/

<b>TOTGIKD</b>	Total Gifts and in-kind food	Food and beverage products received from other households	In some datasets, this category may be aggregated with purchased food or own produced food	Continuous variable			All HHS	/		
<b>ALCOEXP</b>	Alcohol and tobacco	Expenses on alcoholic beverages, tobacco, and narcotics. Ideally, corresponds to Code 02 of the COICOP classification (SUM of 02).		Continuous variable	<b>ALC+TOB</b>		All HHS	/		
ALC	Alcoholic expenditures	Expenses on alcoholic beverages, spirits, wine, beer..		Continuous variable			All HHS	/		
TOB	Tobacco expenditures	Expenses on tobacco, cigarettes, etc.		Continuous variable			All HHS	/		
<b>APPEXP</b>	Clothing and footwear	Expenses on clothing and footwear. Ideally, corresponds to Code 03 of the COICOP classification.		Continuous variable	<b>CLOTH+MCLO+CHAR+FOOTW+SCHLTH</b>		All HHS	A	v613	
CLOTH	Clothes for men, women and children	Garments, dresses, shirts, blouse, capes, coats for men, women and children. Excluding school clothes and uniforms	In some countries, we have observations on own-produced clothes, but since these are very small amounts, they are lumped with purchased	Continuous variable			All HHS	/		
MCLO	Clothing material	Clothing material of all kind of fibers, tailoring and accessories		Continuous variable			All HHS	/		
CHAR	Tailoring charges	All tailoring, cleaning, repairing charges of clothes		Continuous variable			All HHS	/		
FOOTW	Footwear expenditures	Shoes, sandals, boots and slipper for men and women, excluding those for school	includes repairing and hire charges	Continuous variable			All HHS	/		
SCHLTH	School Clothes, Uniforms and Footwear			Continuous variable			All HHS	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
<b>HOUSEXP</b>	Housing and utilities	Expenses on housing (actual and imputed rentals and maintenance and repair of the dwelling), water (water supply and miscellaneous services relating to the dwelling), electricity, gas and other fuels. Renovation costs as well as expenditure on furniture are excluded, as well as expenditure on mortgage (both the capital and interest part). Ideally, corresponds to Code 04 of the COICOP classification.	ARHOUS + IMPREN + REPDW + WDWE + EDWE	Continuous variable			All HHS	A	v612	The total housing and utilities expenditure computed from the housing data file does not match the amount provided by the statistical agency in the expenditure data file. Therefore, only the actual rent was derived from the housing file and for the rest of the items, the aggregate provided was used.
<b>ARHOUS</b>	Actual rentals for housing	Actual rentals paid by tenants and other actual rentals	Rentals include payment for the use of the land on which the property stands, the dwelling occupied, the fixtures and fittings for heating, plumbing, lighting, etc., and, in the case of a dwelling let furnished, the furniture.	Continuous variable			All HHS	A	v_065	The actual rent was computed from the corresponding variable in the housing data file.
<b>IMPREN</b>	Imputed rentals for housing	Imputed rentals of owners occupying their main residence and other imputed rentals	Includes also imputed rentals for secondary residences and imputed rentals of households paying a reduced rental or housed free.	Continuous variable			All HHS	/		The value of the imputed rent is not provided, therefore the variable could not be generated.
<b>REPDW</b>	Maintenance and repair for the Dwelling	Materials and services for the maintenance and repair of the dwelling	Only expenditures which tenants and owner-occupiers incur on materials and services for minor maintenance and repair are part of individual consumption expenditure of households. Renovation costs as well as expenditure on materials and services for major maintenance and repair are excluded, as well as expenditure on mortgage (both the capital and interest part). Considered as expenses on non-durables	Continuous variable			All HHS	/		
<b>WDWE</b>	Water supply and miscellaneous services relating to the dwelling	Water supply, refuse collection, sewage collection and others	Includes also co-proprietor charges for caretaking, gardening, heating and lighting, etc. in multi-occupied buildings; security services	Continuous variable			All HHS	/		
<b>EDWE</b>	Electricity, gas and other fuels	Electricity, Gas, Liquid and solid fuels, Heat energy		Continuous variable			All HHS	/		
<b>EQUIPEXP</b>	Furniture & Housing equipment	Expenses on furnishings (furniture and furnishings, carpets and other floor coverings), household equipment (household textiles, household appliances, glassware, tableware and household utensils, tools and equipment for house and garden) and goods and services for routine household maintenance. Ideally, corresponds to Code 05 of the COICOP classification.	HSFUR + FURREP + HSTEX + MHAPL + SHAPL + RAPPL + HUST + MHOP E + SHOPE + HSGS	Continuous variable			All HHS	/		Expenditure on Furniture & Housing equipment is not provided in the raw data
<b>HSFUR</b>	Housing furnishings and furniture	Furniture and furnishings, carpets and other floor coverings	Beds, sofas, couches, tables, chairs, etc., lighting equipment, pictures, sculptures, screens, loose and fitted carpets, etc. Durables	Continuous variable			All HHS	/		
<b>FURREP</b>	Housing furnishings and furniture repair	Furniture and furnishings repair	This variable includes repair of furniture and furnishings Non-Durable	Continuous variable			All HHS	/		
<b>HSTEX</b>	Household textiles	Furnishing fabrics, bedding, bed linen table linen and bathroom linen and repair of such articles.	Non durables	Continuous variable			All HHS	/		
<b>MHAPL</b>	Major Household appliances	Major household appliances whether electric or not	- refrigerators, freezers and fridge-freezers; - washing machines, dryers, drying cabinets, dishwashers, ironing and pressing machines; - cookers, spit roasters, hobs, ranges, ovens and microwave ovens; - air-conditioners, humidifiers, space heaters, water heaters, ventilators and extractor hoods; - vacuum cleaners, steam-cleaning machines, carpet shampooing machines and machines for scrubbing, waxing and polishing floors; - other major household appliances such as safes, sewing machines, knitting machines, water softeners, etc. Includes: delivery and installation of the appliances when applicable. Excludes: such appliances that are built into the structure of the building Considered as expenses on durables	Continuous variable			All HHS	/

SHAPL	Small Household appliances	Small electric appliances	Coffee mills, coffee-makers, juice extractors, can-openers, food mixers, deep fryers, meat grills, knives, toasters, ice cream makers, hotplates, irons, electric blankets, etc. Excludes: small non-electric household articles and kitchen utensils etc. Non-durables	Continuous variable			All HHS	/		
RAPPL	Repair of appliances		Total value of the service (that is, both the cost of labor and the cost of materials are covered); charges for the leasing or rental of major household appliances. Excludes: separate purchases of materials made by households with the intention of undertaking the repair themselves Non-durables	Continuous variable			All HHS	/		
HUST	Glassware, tableware and household utensils	Glassware, crystal and ceramic ware, non-electric kitchen utensils etc. and their repair	Non-durables	Continuous variable			All HHS	/		
MHOPE	Major other housing equipment and operation	Major tools and equipment for house and garden	Motorized tools and equipment such as electric drills, saws, sanders and hedge cutters, garden tractors, lawnmowers, cultivators, chainsaws and water pumps; - repair of such articles. Includes: charges for the leasing or rental of do-it-yourself machinery and equipment. Considered as expenses on durables	Continuous variable			All HHS	/		
SHOPE	Small other housing equipment and operation	Small tools and miscellaneous accessories	Hand tools, garden tools, small electric accessories and their repair Non-durables	Continuous variable			All HHS	/		
HSGS	Goods and services for routine household maintenance	Non-durable household goods and domestic services	Cleaning products such as soaps, washing powder etc. Domestic & cleaning services such as cooks, maids, drivers, gardeners, dry clean etc. Non-durables	Continuous variable			All HHS	/		
MEDEXP	Health	Expenses on health, including medical products, appliances and equipment, outpatient services, and hospital services. Payments for health insurances are excluded. Ideally, corresponds to Code 06 of the COICOP classification.	PMEDP+TAEQ+MEDSERV+MEDABR	Continuous variable			All HHS	A	v614	Includes expenditure on health, hygiene and personal care
PMEDP	Pharmaceutical and other medical products	Medicinal preparations, drugs, vaccines, vitamins etc. and clinical thermometers, adhesive etc.	They are intended for consumption or use outside a health facility or institution. Non-durables	Continuous variable			All HHS	/		
TAEQ	Therapeutic appliances and equipment	Corrective eyeglasses and contact lenses, hearing aids, glass eyes, artificial limbs and other prosthetic devices, orthopedic braces and supports, orthopedic footwear, surgical belts, trusses and supports, neck braces, medical massage equipment and health lamps, powered and unpowered wheelchairs and invalid carriages, "special" beds, crutches, electronic and other devices for monitoring blood pressure, etc.;	They are intended for consumption or use outside a health facility or institution. Durables	Continuous variable			All HHS	/		
MEDSERV	Outpatient and Hospital services	Medical, dental and paramedical services delivered to outpatients by medical, dental and paramedical practitioners and auxiliaries. Services of general and specialist hospitals, the services of medical centers, maternity centers, nursing homes and convalescent homes which chiefly provide in-patient health care, the services of institutions serving old people in which medical monitoring is an essential component and the services of rehabilitation centers providing in-patient health care and rehabilitative therapy where the objective is to treat the patient rather than to provide long-term support	The services may be delivered at home, in individual or group consulting facilities, dispensaries or the outpatient clinics of hospitals and the like. Hospital day-care and home-based hospital treatment are included as are hospices for terminally ill persons.	Continuous variable			All HHS	/		
MEDABR	Expenses on medical services Abroad	Includes all expenses on trips for medical/therapy purposes other than those spent on transportation or accommodation		Continuous variable			All HHS	/

						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
<b>TRANEXP</b>	Transport	Expenses on transport, including purchase of vehicles, operation of personal transport equipment, and transport services. Ideally, corresponds to Code 07 of the COICOP classification.	TRVEH+OTEQ+TRSERV+SCHSERV	Continuous variable			All HHS	A	v615	
<b>TRVEH</b>	Purchase of transportation vehicles	Purchase of car, bicycles and animal trucked vehicles	Excludes purchases of recreational vehicles such as camper vans, caravans, trailers, and boats Durable	Continuous variable			All HHS	/		
<b>OTEQ</b>	Operation of personal transport equipment	Fuels, petrol and purchases of spare parts, accessories or lubricants made by households with the intention of undertaking the maintenance, repair or intervention and services paid to enterprise for carrying out the maintenance, repair or fitting		Continuous variable			All HHS	/		
<b>TRSERV</b>	Transportation services	Transportation by railway, road, air, sea and any other than school transport services	Ambulance services are excluded	Continuous variable			All HHS	/		
<b>SCHSERV</b>	School Transportation services		In some surveys, expenses on school transportation services might be lumped with transport services or education expenditures, in that case the variable would be missing	Continuous variable			All HHS	/		
<b>COMMEXP</b>	Communication	Expenses on communication, including postal services, telephone and telefax equipment, and telephone and telefax services. Ideally, corresponds to Code 08 of the COICOP classification.	PTTSERV+TTEQP	Continuous variable			All HHS	A	v616	
<b>PTTSERV</b>	Postal telephone and telefax services	Installation and subscription costs of personal telephone equipment: telephone calls etc. delivery of letters etc.		Continuous variable			All HHS	/		
<b>TTEQP</b>	Telephone and telefax equipment	Purchases of telephones, telefax machines, etc. and their repair	Durable	Continuous variable			All HHS	/		
<b>CULTEXP</b>	Recreation and culture	Expenses on recreation and culture, including audio-visual, photographic and information processing equipment, other major durables for recreation and culture, other recreational items and equipment, gardens and pets, recreational and cultural services, newspapers, books and stationery, package holidays. Ideally, corresponds to Code 09 of the COICOP classification.	CULDUR+CULEQP+CULSER+SCHCUL	Continuous variable			All HHS	A	v618	
<b>CULDUR</b>	Durables for recreation and culture	Audio-visual, photographic and information processing equipment, Camper vans, boats, horse and pony etc.	Durable	Continuous variable			All HHS	/		
<b>CULEQP</b>	Recreation and cultural equipments	Games, toys and hobbies, Equipment for sport, camping and open-air recreation etc.		Continuous variable			All HHS	/		
<b>CULSER</b>	Recreation and culture services	cinemas, theatres, opera houses games, Newspapers, books and stationery, etc. holidays or tours which provide for travel, food, accommodation, guides	Excluding school books and stationery	Continuous variable			All HHS	/		
<b>SCHCUL</b>	School recreation and culture services	School books and stationery, etc.		Continuous variable			All HHS	/

<b>EDUCEXP</b>	Education	Expenses on education, including pre-primary and primary education, secondary education, post-secondary non-tertiary education, tertiary education, and education not definable by level. Ideally, corresponds to Code 10 of the COICOP classification. It covers educational services only and does not include expenditures on educational materials, such as books, catering and transport services etc.	PREUDUC+SEUDUC+TEUDUC+OEUDUC+EDUCABR	Continuous variable			All HHS	A	v617	
<b>PREUDUC</b>	Expenses on pre-primary and primary education	Includes also expenses on literacy programs for students too old for primary school, including private tutoring and tutoring groups		Continuous variable			All HHS	/		
<b>SEUDUC</b>	Expenses lower and upper-secondary education	Includes also out-of-school secondary education for adults and young people, private tutoring and tutoring groups		Continuous variable			All HHS	/		
<b>TEUDUC</b>	Expenses tertiary education	Expenses on first and second stage of tertiary education, including private tutoring and tutoring groups		Continuous variable			All HHS	/		
<b>OEUDUC</b>	Expenses on education not defined by level	Educational programs, generally for adults, which do not require any special prior instruction, in particular vocational training and cultural development.		Continuous variable			All HHS	/		
<b>EDUCABR</b>	Expenses on Education Abroad	Includes all expenses on trips for education purposes other than those spent on transportation or accommodation		Continuous variable			All HHS	/		
<b>RESTOEXP</b>	Restaurants and hotels	Expenses on restaurants (catering services) and hotels (accommodation services). Ideally, corresponds to Code 11 of the COICOP classification.	CATSERV+SCHRST+ACCOM	Continuous variable			All HHS	/		
<b>CATSERV</b>	Catering services	Meals, snacks, and drinks provided by restaurants, cafés, etc., including those provided: - in cultural, sporting or entertainment services: theatres, cinemas, sports stadiums, etc.; on public transport - ready to take food products and beverages, the sale of cooked dishes by catering contractors, -Catering services of works canteens, and canteens in schools, universities etc.		Continuous variable			All HHS	/		
<b>SCHRST</b>	School restaurants expenditures	Meals, snacks, and drinks provided in school restaurants	In many countries, those expenses are lumped with catering services.	Continuous variable			All HHS	/		
<b>ACCOM</b>	Accommodation and hotel expenses	Accommodation services of: - hotels, boarding houses, motels, inns and establishments offering "bed and breakfast"; - holiday villages and holiday centers, camping and caravan sites, youth hostels and mountain chalets; - boarding schools, universities and other educational establishments; - public transport (trains, boats, etc.) when priced separately; - hostels for young workers or immigrants.		Continuous variable			All HHS	/		

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
<b>MISCEXP</b>	Miscellaneous goods and services	Expenses on miscellaneous goods and services, such as personal care, personal effects n.e.c., social protection, insurance, financial services n.e.c., other services n.e.c. Ideally, corresponds to Code 12 of the COICOP classification.	Some surveys may report information on taxes and remittances without clear specification of the nature of the tax expenses... these expenditures are included in this part. <b>PCEXP+SPEXP+FEXP+FEES+PTRANSF</b>	Continuous variable			All HHS	A	other expenses	"Other expenses" added to miscellaneous expenditure represent the difference between the total expenditure amounts provided by the statistical agency and the summation of amounts of different aggregates by type of expenditure.
<b>PCEXP</b>	Personal care and personal effects	Hairdressing salons and appliances for personal care, Jewellery, clocks and miscellaneous personal articles	Electric razors, hairdryers, electric toothbrushes etc. are included in this subgroup	Continuous variable			All HHS	/		
<b>SPEXP</b>	Social protection	Covers assistance and support services provided to persons who are elderly, disabled, unemployed, homeless, low-income earners, immigrants, refugees, etc. It also covers assistance and support services provided to families and children.		Continuous variable			All HHS	/		
<b>FEXP</b>	Insurance and financial services	Service charges for insurance such as life insurance and non-life insurance (that is, insurance in connection with the dwelling, health, transport, etc.). Service charges for multi-risk insurance covering several risks should be classified on the basis of the cost of the principal risk if it is not possible to allocate the service charges to the various risks covered. Actual charges for the financial services of banks	Service charge for insurance is defined as the difference between claims due and premiums earned and premium supplement	Continuous variable			All HHS	/		
<b>FEES</b>	Penalties and other fees	Financial penalties, traffic violation fees etc., fees for issuing passport ID cards, visas, birth certificate, driving license etc. membership fees.. And other non specified fees		Continuous variable			All HHS	/		
<b>PTRANSF</b>	Private transfers given	Remittances inside and outside the country, gifts to relatives cash or in-kind, charities, zakat, Alimony etc.		Continuous variable			All HHS	/		
<b>TOTFOOD</b>	Total food expenditures		In case where the own produced food items are also included in code 01 we need to abstract from OWP <b>FOODEXP+CATSER+SCHRST</b>	Continuous variable			All HHS	A		
<b>TNFOOND</b>	Total expenditures on non-food and non-durables		Alcoholic and tobacco expenditures are included here <b>TOTEXP-(FOODEXP+TDUR+THOUS)</b>	Continuous variable			All HHS	A		Non-durables could not be excluded since the provided aggregates do not allow for the computation of the total amount spent on durables.
<b>TDUR</b>	Total expenses on durables		<b>HSFUR+MHAPL+MHOPE+TAEQ+TRVEH+TTEQP+CULDUR</b>	Continuous variable			All HHS	/		The total amount spent on durables could not be computed since the aggregates provided from the statistical agency do not allow for it.
<b>THOUS</b>	Actual and imputed rentals for housing		<b>ARHOUS+IMPREN</b>	Continuous variable			All HHS	A		This variable includes only amounts spent on actual rent and could be derived from the housing data file, while the imputed rent amounts are not available.
<b>TOTEXP</b>	Total expenditures	Individual consumption expenditure of household. Ideally, corresponds to Codes 01 to 12 of the COICOP classification	In cases where the original survey provides expenditures according to the COICOP classification, this variable is the sum over the expenditure variables above. Otherwise, it is either derived from the "total expenditures" variable in the original survey (if available) or is left blank. <b>FOODEXP+ALCOEXP+APPEXP+HOUSEXP+EQUIPEXP+MEDEXP+TRANEXP+COMMEXP+CULTEXP+EDUCEXP+RESTOEXP+MISCEXP</b>	Continuous variable			All HHS	A		
<b>LUMP</b>	Lumpy expenses	Expenses on marriage, dowries, mahr, funeral, birth etc lump sum divorce (excluding alimony) payment and any other occasional expenses		Continuous variable			All HHS	/		
<b>INTER</b>	Interests paid on consumption and loans	Interest paid on loans for the purchase of consumption or durable goods	These expenses should not be part of consumption aggregates	Continuous variable			All HHS	/		
<b>TAX</b>	Expenditures on taxes and levies	Taxes on consumption and durable goods, property taxes etc.	Taxes should be included in consumption aggregates only if they are closely related to services provided such as households that are paying more tax are receiving more services. In that latter case (if there is enough detail in the survey about taxes) this category should be disaggregated according to the nature of taxes paid.	Continuous variable			All HHS	A	v_064 v_069	Tax amount was derived from the housing data file by summing the total annual property taxes paid for owned or rented dwellings.

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
<b>HOUSEHOLD INCOME</b>		Including when possible annual amounts of earnings from labor and the contributions paid on them, capital income and property, taxes, social insurance benefits, social assistance benefits and other (private) transfers	All income variables are recorded as yearly amounts. ERF annualizes the amounts, if not provided as such in original data. Annual income amounts should be reported in country national currency. As a rule, household-level income amounts are derived by summing the individual-level values for all individuals in the household. When individual data are not available, reported household amounts are used and these cases will be noted in the country-specific documentation. Where the household income variables are directly calculated from person-level income variables, these formulations are shown below, as are those instances when the variable is created by summing sub-categories within the household data. A check for outliers is necessary before conducting any analysis on the income data. Extreme cases were detected in the original variables; however the appropriate method to deal with it was left to the user's judgment.							
<b>FILE LEVEL: HOUSEHOLD</b>										
<b>IDEAL UNIVERSE: ALL HOUSEHOLDS</b>										
<b>IDEAL REFERENCE PERIOD: ONE YEAR</b>										
<b>CATEGORY: ANNUAL INCOME</b>										
<b>GWAG</b>	Gross wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), gross of employee social insurance contributions/taxes but net of employer social insurance contributions/taxes.	When employer-provided sick pay can not be separated, it is included in the wages. In case there is no precision about whether the wage is net or gross we classify it under gross wage <b>If incomes are not available at the individual level, the variable is constructed directly from household level original information.</b>	Continuous variable			All HHS	/		
<b>NWAG</b>	Net wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), net of employer and employee social insurance contributions and taxes.		Continuous variable			All HHS	/		
<b>IKEAR</b>	In-kind earnings	In-kind income as a substitute or complement for cash wages. Includes, for example, the value of company cars, meals, housing, electricity, medical expenses, child care etc. paid or partly paid by the employer.	It does not exist on its own at the person level.	Continuous variable			All HHS	/		
<b>SINC</b>	Self-employment income	Profit/loss from unincorporated enterprises. The income is recorded gross of social insurance contributions (but net of expenses).	Self-employment income is often collected with a different reference period than other more regular incomes; for example, it could refer to the last financial year for which business accounts for the purposes of taxation were prepared. Includes imputed income from owner occupied dwellings and own produced food for home consumption <b>If farm and non-farm self-employment income are not supplied separately, users can try to split them at the individual level</b>	Continuous variable			All HHS	/		
<b>RENTAL</b>	Income less expenses from rentals	Rentals from dwellings, business buildings, vehicles, equipment, etc excludes rent from land		Continuous variable			All HHS	/		
<b>PROINC</b>	Property income	Interest received less interest paid Dividends Rent from land		Continuous variable			All HHS	/		
<b>TRANSF</b>	Current transfers received	Social insurance, assistance, inter-household transfers, regular support received such as charities, remittances received, gifts received disability pensions, allowances, benefits etc. Child/family benefits		Continuous variable			All HHS	/		
<b>TRPAID</b>	Current transfers paid	Employers' social insurance contributions Employees' social insurance contributions Taxes on income less refund Regular taxes on wealth Regular inter-household cash transfers Regular cash transfers to charities	In some datasets mandatory social insurance contributions are recorded together with the taxes and are, therefore, included here. If the original data only has one tax variable with all the taxes lumped together, the variable is included here. If the original survey only asked for net incomes, this variable usually remains empty. In many datasets, income taxes are not asked directly to the respondents but simulated through a taxation micro simulation model.	Continuous variable			All HHS	/		
<b>TOTDINC</b>	Total disposable income		<b>GWAG+SINC+RENTAL+PROINC+TRANSF</b>	Continuous variable			All HHS	/		
<b>TOTINC</b>	Total income		<b>TOTDINC+TRPAID</b>	Continuous variable			All HHS	/

<b>PERSONS</b>										
FILE LEVEL: PERSON IDEAL UNIVERSE: ALL INDIVIDUALS IDEAL REFERENCE PERIOD: AT PRESENT CATEGORY: IDENTIFICATION										
PNUM	Person identifier	Person identification number (usually the person line number in the household)	This identifier is unique within each household. In order to uniquely identify an individual, both CASENUM and PNUM are required.	Ordered discrete variable			All INDs	A	v_201	
FILE LEVEL: PERSON IDEAL UNIVERSE: ALL INDIVIDUALS IDEAL REFERENCE PERIOD: AT PRESENT CATEGORY: FILE INFORMATION										
PWEIGHT	Person weight	Data-provider person weight.	Very few data providers construct a different weight for each member of the household. If a person weight exists in the original dataset, we do report it here (even though it turns out to be the same for all household members in most cases), otherwise we assign the household weight to all household members. All statistical analysis performed should use the appropriate weight.	Continuous variable			All INDs	/		
FILE LEVEL: PERSON IDEAL UNIVERSE: ALL INDIVIDUALS IDEAL REFERENCE PERIOD: AT PRESENT CATEGORY: DEMOGRAPHICS										
PAGE	Age	Age in years.	In some datasets, age may be calculated at a certain reference date (e.g., 31 December of last year). When the original dataset has only age categories, age is calculated as the midpoint of the range provided. In some datasets, AGE is top coded by the data provider (e.g., a value of 95 represents 95 years of age or over).	Ordered discrete variable			All INDs	A	v_210	According to the provided methodology: 98 indicates those aged 98 years or older . 99 indicates that the respondent doesn't know his/her age and the interviewer is unable to estimate the age. Therefore, the 18 cases coded "99" were recoded "missing".
PSEX	Gender	Indicator for gender of individual.		Harmonized Categorical variable	1 Male 2 Female	1 Male 2 Female	All INDs	A	v_205	
PMART	Marital status [Standardized version]	Legal administrative status concerning marriage & partnership (even if not married, a person can be still legally recognized as being in a relationship).	There is no Polygamous status for females. Generally the information about polygamous status is available only for the head (male). For the other individuals we consider those having the status married as monogamous.	Harmonized Categorical variable	1 Never married 2 Married monogamous 3 Married polygamous 4 Divorced/Separated 5 Widowed 99 Not stated	1 Single 2 Married 3 Widowed	All INDs	A	v_215	Multiple spouse is forbidden in Tunisia by law as a result the category "Married polygamous" is never identified
PMART_D	Marital status [Detailed version]	Legal administrative status concerning marriage & partnership (even if not married, a person can be still legally recognized as being in a relationship); detailed coding.	There is no Polygamous status for females. Generally the information about polygamous status is available only for the head (male). For the other individuals we consider those having the status married as monogamous.	Harmonized Categorical variable	100 Never married 200 Married monogamous 210 Legally married 220 Married 300 Married polygamous 400 Divorced/Separated 410 Separated 420 Divorced 500 Widowed 999 Not stated	1 Single 2 Married 3 Widowed 4 Divorced	All INDs	A	v_215	Multiple spouse is forbidden in Tunisia by law as a result the category "Married polygamous" is never identified

FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: FATHER'S AND MOTHER'S CHARACTERISTICS										
FPRES	Father present at home	Indicates whether the father is present at home, not a household member or dead.	In case there is no information available about whether the father is dead or not we just use code 2 (not a HH member). In case, the relationship to head variable indicates that the brother of the head is living in the HH with nephews/nieces of the head we assume that these last are the sons/daughters of the head's brother.	Harmonized categorical variable	1 Yes 2 Father is not a household member 3 Father is dead		All INDS	A	v_203	All parents related variables were generated by ERF including the presence status generated using the relationship to head variable, therefore those dead could not be identified.
PMPRES	Mother present at home	Indicates whether the mother is present at home, not a household member or dead.	There might be a problem identifying the mother from the Roster in case of multiple spouses. This variable can be clearly identified only in the fathers'/mothers' ID is provided in the dataset. In case of only one spouse she is assumed to be the mother, unless the age checking is could identify those living with their step mother (mother died or divorced).	Harmonized categorical variable	1 Yes 2 Mother is not a household member 3 Mother is dead		All INDS	A		
PFATHID	ID of the father	Indicates the PNUM (the line number in the HH) of the father	This information is available for the son/daughter of the head, partially available for the head and brother/sister of the head and is missing for the other individuals (exception for Iraq). In case we have the brother of the head living in the HH with the nephew/niece of the head we assume that these last are the son (daughter) of the head's brother. Since very few surveys report this information. Value can be imputed from the roster (or individual file) but might be available only if PFPRES = 1.	Ordered discrete variable			All INDS	A	v_201	Father's and Mother's variables were generated for the head of the household's children and for the head's grandchildren if he/she has married sons/daughters or in laws living in the household. In some cases, children were linked to their parents based on the HH data entry order.  Since no distinction can be done between heads' and spouses' parents (code 6), the characteristics of the heads' parents could not be generated.
PMOTHID	ID of the mother	Indicates the PNUM (the line number in the HH) of the mother	Same as PMPRES Since very few surveys report this information. Value can be imputed from the roster (or individual file) but might be available only if PMPRES = 1.	Ordered discrete variable						
PFAGE	Age of the father			Ordered discrete variable			All INDS	A	v_210	According to the provided methodology: 98 indicates those aged 98 years or older . 99 indicates that the respondent doesn't know his/her age and the interviewer is unable to estimate the age. Therefore, the 18 cases coded "99" were recoded "missing".

FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: EDUCATION										
PLIT	Literacy status	This variable indicates whether the person is literate (can read and write) or not	A person is considered literate if they can both read and write and not just one or the other. A semi-literate person (one who can read, but cannot write) is said to be illiterate. In the case where the survey asks only whether a person can read but does not ask if they can write, and in case there no information in the questionnaire about the reading and writing ability literacy cannot be determined, these are coded as missing. If there are no questions about the read and write ability but the educational attainment is elementary or upper the individual is considered literate	Dummy variable	0 No	v_220=2 (Not currently attending school) & v_223=0 (None of school grades are completed)	INDs aged 3+	A	v_220 v_223	Those who are not currently enrolled and never completed one successful grade in any school level were assumed to be illiterate.
					1 Can read & write	v_220 = 1 (Currently attending school) v_220=2 (Not currently attending school) & v_223>0 (Completed a school grade in any level)				
EVERATTD	Ever attended school	This variable indicates whether the individual have ever attended school, academic, "Koranic" or any other formal or informal school	All persons of pre-primary school age or above. Primary school age will vary by country. Value must be missing for others. This is country-specific and depends on how school attendance is defined. Pre-school is included here. Also, in some countries, ever attended is yes only if the person attended for some minimum amount of time. The differences need to be carefully documented. One is not required to have completed any level of education to answer this question positively. By logic, EVERATTD, PEDUC and PATSCH have the following relationship: If PATSCH=1, EVERATTD=1 If PEDUC>=2 (and ≠ 99), EVERATTD=1 If PEDUC=99 & PATSCH=0, EVERATTD=0	Dummy variable	0 No	v_220=2 (Not currently attending school) & v_223=0 (None in school grade completed)	INDs aged 3+	A	v_220 v_223	Those who are not currently enrolled and never completed one successful grade in any school level were assumed to have never attended school.

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
PTYPSEC	Type of secondary school attended		Only individuals who answered codes 4 in PEDUC are eligible. For all others, it will be missing. If there is no indication about the type of secondary school the variable will be missing	Harmonized categorical variable	1 Academic 2 Technical or vocational		INDs aged .....+	/		
PYEDUC	Number of effective years of schooling	This is a continuous variable of the number of years of formal schooling completed.	The lower age cut-off at which information is collected will vary from country to country. If no grade level information exists, this variable will be missing. The variable does not take into account the actual number of years required to reach this level, in other words, first grade repeated three times still only counts as 1 year of schooling. If a person has completed a BA/BSc, MA/MSc or PhD, but no number of years is known, use country specific information for the number of years.	Ordered discrete variable			INDs aged 3+	A	v_220 v_221 v_222 v_223 v_224 v_228	Generated by ERF using the highest level of education completed.  Number of effective years of schooling was generated using v_221 and v_222 for those who are currently attending school and v_223, v_224 and v_228 for those who are not currently attending school. For those who are not currently attending school and no level of education is accomplished, but there is an indication that they can read and write, along with those who can read & write or were enrolled in any informal education, number of effective years of education was recoded "2".  The number of years of education could not be estimated for those currently enrolled in KG, Koranic schools (Kouttab) or the preparation stage for elementary education; and for those who reported "None" in the highest level of education completed.  For those who are currently enrolled in basic education, the effective years of schooling was computed to equal the grade level the individual is currently attending reduced by "one" to indicate the number of years successfully completed in basic education.
PATSCH	School attendance status	Indicates whether the individual is currently attending school	If person on short school holiday when interviewed, he or she is considered to be at school. However, if the person is on the holiday between two years of schooling, one cannot assume that he/she will continue schooling into the next year. Variable can be created using either attendance or enrolment question (since typically just one of them is available in each survey). In the case that both questions were available, attendance question MUST be used. This variable must ALWAYS have a note specifying which question (attendance/ enrolment) had been used to create it. Does not include pre-school or kindergarten programs. Value must be missing for others. Does not require one to have completed any level. Adults currently attending literacy programs are considered as attending school (PATSCH = 1) In case the person is not currently attending school but there is no information on whether he attended school and left or never attended school use information from PEDUC to impute the right value.	Dummy variable	0 No 1 Yes	2 No 1 Yes	INDs aged 3+	A	v_220	
PENROL	Level of schooling presently attending	PENROL ideally provides information on the level of education in which the individual is enrolled.	For persons presently attending school (PATSCH=1), value missing for others. For secondary school, if not specified in the questionnaire, it is assumed that it is an academic secondary school. For the surveys where is no distinction between university and post university they are considered as university As with PEDUC, we recommend that PENROL be restructured as a categorical variable appropriate to the analysis.	Harmonized Categorical variable	1 Primary 2 Lower secondary 3 Higher secondary- academic 4 Higher Secondary-technical/vocational 5 Post secondary technical 6 University 7 Postgraduate 8 Other	4 Basic education & v_222<=6 (completed <=6 years) 4 Basic education & v_222>6 (completed >6 years) 5 Secondary Education 8 Vocational Education 9 Certificate of Professional Competence (CAP) 10 Certificate of Professional Technician (BTP) 12 Professional Education 13 Other professional education 11 Certificate of higher Technician (BTS) 6 University-short period 7 University-long period 1 kindergarten 2 Kouttab 3 Preparatory stage for basic education 16 Illiteracy courses 14 Preparation for professional life 15 Professional continued education	Currently enrolled INDs aged 3+	A	v_221	Those currently enrolled in one of the Tunisian Agency for Employment programs for the professional life preparation or continued formation were coded other in PENROL. They can originally be graduate of secondary, post secondary or higher education.  The primary stage was eliminated from the new Tunisian education system. The current system starts at the basic education level, equivalent to the lower secondary level in other countries, and consisting of 9 years. Therefore, all students attending the basic education were coded 2 "lower secondary".

FILE LEVEL: PERSON										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT PRESENT										
CATEGORY: LABOR										
PCLFS	Labor force status in the current period	Current labor force status that distinguishes between the employed, the unemployed, and those not in the labor force.	Variable is constructed for all persons administered this module in each questionnaire. For this reason the lower age cut-off (and perhaps upper age cut-off) at which information is collected will vary from country to country. All persons are considered active in the labor force if they presently have a job (formal or informal, i.e. are employed) or do not have a job but are actively seeking work (i.e. unemployed). Those unemployed and do not search for a job are considered inactive, hence their previous employment information, if they were ever active, is recoded missing.	Harmonized Categorical variable	1 Active 2 Inactive 99 Not stated	v230=1 Employed during last week v232=1 Sick/rest leave v232=2 Bad weather v232=3 Activity of the enterprise stopped temporary v232=4 Military service v232=5 Preparatory stage of launching a project/promised to start work v232=6 Lack of work v232=12 Has income and managing own property v232=7 Does not want to work v232=8 Household work v232=9 Student v232=10 Retired v232=11 Unable to work/ Disabled/ old v232=13 Inactive income earner v232=14 Other cases	INDs aged 15+	A	v_230 v_232	
PCMAS	Main activity status in the current period [Standardized version]	Main activity status with respect to the labor force, that distinguishes between the employed and the not employed. The employed are those for whom work is the main activity, while for all the others, the main activity should attempt to distinguish between pensioners, students, and homemakers.	The reference period might be the last 12 months or the current time period. Unlike PCLFS, the main distinction in PCMAS is between: - "Employed" -those who, during the reference period, carried out ANY employment (any type or any extent) - even just one occasional hour of paid work or irregular unpaid family work (ILO definition). Among the employed, the variable should distinguish, if available, between those employed at work and those on leave - "Not Employed". The rationale is that individuals do not generally spend their time "being unemployed", but use the time in unemployment to participate in other activities (e.g., attending school or being a housewife). Unemployment will generally be considered the primary activity only if the individual states that unemployment is his/her primary activity (e.g., unemployed and actively searching for a job) or if the individual is registered as unemployed and does not indicate significant participation in any other activity. In these cases, the individuals will be assigned to their own category among the "Not Employed". Accordingly, "Not Employed" are classified into: - Unemployed - individuals who are not employed according to the definition above, and who report that they are unemployed. - Not in Labor Force / Inactive – individuals identifiable as being neither employed nor unemployed, by the definitions above. If possible, the inactive category should distinguish between the retired, students, and homemakers. - Not Employed / Unemployed or Not in Labor Force - In some cases, it is not possible to distinguish between those who are unemployed and those who are inactive, but it is possible to determine that they are not employed. In those cases where it is not feasible to determine unemployed versus inactive status, these individuals will be coded as "Not Employed". In some surveys individuals are classified as employed students (or employed housewives) in that case they are considered as active in PCLFS and classified student (or housewives) in PCMAS. A cross tab between the two variables will permit to distinguish employed students (or housewives) from inactive ones. A proper documentation should particularly be done for those cases during harmonization process	Harmonized Categorical variable	1 Employed 2 Unemployed 3 Homemaker (Housewife) 4 Student 5 Pensioners/retired/disabled 6 Others 99 Not stated	v230=1 Employed during last week v232=1 Sick/rest leave v232=2 Bad weather v232=3 Activity of the enterprise stopped temporary v232=12 Has income and managing own properties v232=5 Preparatory stage of launching a project / promised to start work v232=4 Military service v232=6 Lack of work v232=8 Household work v232=9 Student v232=10 Retired v232=11 Unable to work/ Disabled/ old v232=7 Does not want to work v232=13 Inactive income earner v232=14 Other cases	INDs aged 15+	A	v_230 v_232

Variable Name	Variable Label	Contents	General Comments / Warnings /Formula- if ERF generated /Recommendations	Variable type	Standardized Values and Value Labels	Tunisia, EBCNV 2005				
						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
PCEMS	Status of Employment	Detailed description of the employment status (employee, own-account workers, employer, unpaid family worker, etc.) in (current or last held) job, ideally following the ICSE classification.	<p>The lower age cutoff (and perhaps upper age cutoff) at which information is collected will vary from country to country. Definitions taken from the International Labor Organizations Classification of Status in Employment with some revisions to take into account the data available.</p> <p>Employee includes anyone whose basic remuneration is not directly dependent on the revenue of the unit they work for, typically remunerated by wages and salaries but may be paid for piece work or in-kind. The continuous criteria used in the ILO definition is not used here as data are often absent and due to country specificity.</p> <p>Public includes quasi-government organizations.</p> <p>Employer is a business owner (whether alone or in partnership) with employees. If the only people working in the business are the owner and contributing family workers, the person is not considered an employer (as has no employees) and is, instead classified as own account.</p> <p>Own account or self-employment: jobs are those where remuneration is directly dependent from the goods and service produced (where home consumption is considered to be part of the profits) and have not engaged any permanent employees to work for them on a continuous basis during the reference period.</p> <p>Members of producers cooperatives are workers who hold a self-employment job in a cooperative producing goods and services.</p> <p>Contributing family workers are those workers who hold a self-employment job in a market-oriented establishment operated by a related person living in the same households who cannot be regarded as a partner because of their degree of commitment to the operation of the establishment, in terms of working time or other factors, is not at a level comparable to that of the head of the establishment.</p> <p>Workers not classifiable by status (code 6) include those for whom insufficient relevant information is available and/or who cannot be included in any of the preceding categories.</p> <p>The variable should generally cover the active sample (employed and unemployed if previously employed). While for Unemployed never previously employed, the variable was coded missing.</p> <p>Active sample reported as "not stated (code 99)" should normally include employed for whom the status was not identified and unemployed previously employed if status in last job is not reported.</p> <p>Those unemployed and do not search for a job are considered inactive, hence their previous employment information, if they were ever active, is recoded missing.</p>	Harmonized Categorical variable	1 Employee	3 Employed 4 Trainee	Ever-employed Active INDs aged 15+	A	v_245	
					2 Employer	1 Employer				
					3 Own account, self-employed	2 self-employed/independent

					5 Member of producers cooperatives					
					6 Workers not classifiable by status (other)	6 Other				
					99 Not stated	(Ever-employed active members aged >=15 years for whom v_245=missing)				
POCC	Occupation classification for the main job [Standardized version]	Occupation classification for the main (current or last held) job, standardized on a 1-digit coding level.	<p>The lower age cut-off (and perhaps upper age cut-off) at which information is collected will vary from country to country. Classifies the main job of any individual with a job (EMPLOYED=1) and is missing otherwise. As most surveys collected detailed information and then coded it using national classifications, and the original data is not in the data bases, no attempt has been made to correct or check the original coding.</p> <p>The variable should generally cover the active sample (employed and unemployed if previously employed). While for Unemployed never previously employed, the variable was coded missing.</p> <p>Active sample reported as "not stated (code 999)" should normally include employed for whom the status was not identified and unemployed previously employed if status in last job is not reported.</p> <p>Those unemployed and do not search for a job are considered inactive, hence their previous employment information, if they were ever active, is recoded missing.</p>	Harmonized Categorical variable	10 Legislators, senior officials and managers	1 Managers	Ever-employed Active INDs aged 15+	A	v_241	The code "0" has no label either in the provided questionnaire or in the data files. 						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
POCC_unrecoded	Occupation classification for the main job [Unrecoded version]	Occupation classification for the main (current or last held) job, an unrecoded version presenting codes as collected and received in the original dataset	The variable should generally cover the active sample (employed and unemployed if previously employed). While for Unemployed never previously employed, the variable was coded missing. Active sample reported as "not stated (code 9999)" should normally include employed for whom the status was not identified and unemployed previously employed if status in last job is not reported. Those unemployed and do not search for a job are considered inactive, hence their previous employment information, if they were ever active, is recoded missing.	Categorical variable			Ever-employed Active INDS aged 15+	A	v_241	
PIND	Industry classification for the main job [Standardized version]	Industry classification for the main (current or last held) job, standardized on a 1-digit coding level.	In many datasets national classifications are used. The variable should generally cover the active sample (employed and unemployed if previously employed). While for Unemployed never previously employed, the variable was coded missing. Active sample reported as "not stated (code 999)" should normally include employed for whom the status was not identified and unemployed previously employed if status in last job is not reported. Those unemployed and do not search for a job are considered inactive, hence their previous employment information, if they were ever active, is recoded missing.	Harmonized categorical variable	10 Agriculture and Fishing 20 Mining 30 Manufacturing 40 Electricity and Utilities 50 Construction 60 Commerce 70 Transportation, Storage and Communication 80 Financial, Insurance and Real Estate 90 Public Administration 100 Other Services 998 Unspecified 999 Not stated	1 or 2 or 5 11 thru 14 15 thru 37 40 thru 41 45 50 thru 52, 55 60 thru 64 65 thru 74 75 80 , 85, 90 thru 93, 95 thru 99 3 thru 4, 6 thru 9, 38 thru 39, 42 thru 43, 46, 48, 54, 56 thru 58, 82, 86 thru 89, 94 0 Not stated (Ever-employed active members aged >=15 years for whom v_252=missing)	Ever-employed Active INDS aged 15+	A	v_252	The economic activity variable codes were labeled following the International Standard Industrial Classification of all Economic Activities (ISIC Rev.3). This is based on the activity classification document provided with the survey data, which indicated that the codes are originally labeled following NAT1996 derived from the above mentioned classification. Some unidentified codes in ISIC Rev.3, representing 0.1% of the total sample size, were recoded unspecified. Hotels and restaurants are included in commerce. Education, health and social work are included in other services
PIND_ISIC3_2	Industry classification for the main job [ISIC Rev. 3- 2 digits]	Industry classification for the main (current or last held) job, following the 2-digits International Standard Industrial Classification of All Economic Activities, Revision 3 (ISIC Rev.3).	The variable should generally cover the active sample (employed and unemployed if previously employed). While for Unemployed never previously employed, the variable was coded missing. Active sample reported as "not stated (code 9999)" should normally include employed for whom the status was not identified and unemployed previously employed if status in last job is not reported. Those unemployed and do not search for a job are considered inactive, hence their previous employment information, if they were ever active, is recoded missing.	Harmonized categorical variable	--- ISIC- Rev. 3- 2 digits coding 9998 Unspecified codes 9999 Not Stated		Ever-employed Active INDS aged 15+	A	v_252	The economic activity variable codes were labeled following the International Standard Industrial Classification of all Economic Activities (ISIC Rev.3). This is based on the activity classification document provided with the survey data, which indicated that the codes are originally labeled following NAT1996 derived from the above mentioned classification.
PTYPEWK	Sector of employment [Standardized version]	Sector of employment (i.e. private versus public sector workers) of the (current or last held) primary job.	Cooperative includes also employee in joint ventures. Other include workers in national NGOs and in private households Foreign includes workers in international NGOs Quali public sectors are considered as public. In case there is no distinction between Government and public (the survey mixes both categories) we use the classification used in the original data. The variable should generally cover the active sample (employed and unemployed if previously employed). While for Unemployed never previously employed, the variable was coded missing. Active sample reported as "not stated (code 99)" should normally include employed for whom the status was not identified and unemployed previously employed if status in last job is not reported. 						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
PTENURE	Tenure in current job	Duration of time worked in main (current or last held) job.	PTENURE may be provided directly in the data or may be calculated from calendar data or a combination of questions. The variable should generally cover the active sample (employed and unemployed if previously employed). While for Unemployed never previously employed, the variable was coded missing. Those unemployed and do not search for a job are considered inactive, hence their previous employment information, if they were ever active, is recoded missing.	Semi-standardized continuous variable when information is provided in continuous years			Ever-employed Active INDs aged .....+	/		
PWEEKTL	Total weeks worked	Number of weeks worked in a year	PWEEKTL provides the number of weeks worked in any job (full- or part-time) during the reference period. The variable should generally cover the active sample (employed and unemployed if previously employed). While for Unemployed never previously employed, the variable was coded missing. Those unemployed and do not search for a job are considered inactive, hence their previous employment information, if they were ever active, is recoded missing.	Semi-standardized continuous variable when provided weeks are continuous			Ever-employed Active INDs aged 15+	A	v_256	Number of weeks worked was generated using the variable provided (v_256) on number of working months. The available variable was multiplied by 4 to compute the number of working weeks.

						Survey Values and Value Labels	Universe	Key	Variable(s) used from the survey	Country specific comments
<b>FILE LEVEL: PERSON</b>										
<b>IDEAL UNIVERSE: ALL INDIVIDUALS</b>										
<b>IDEAL REFERENCE PERIOD: ONE YEAR</b>										
<b>CATEGORY: ANNUAL INCOME</b>										
		All income variables are recorded as yearly amounts. ERF annualizes the amounts, if not provided as such in original data. Annual income amounts should be reported in country national currency. Non-existing social benefits or other income sources are recorded as 0. A check for outliers is necessary before conducting any analysis on the income data. Extreme cases were detected in the original variables; however the appropriate method to deal with it was left to the user's judgment.								
PGWAG	Gross wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), gross of employee social insurance contributions/taxes but net of employer social insurance contributions/taxes.	When employer-provided sick pay can not be separated, it is included in the wages. In case there is no precision about whether the wage is net or gross we assume it is gross wage If incomes are not available at the individual level, the variable is constructed directly from household level original information.	Continuous variable			Income earners	/		
PNWAG	Net wages and salaries	Cash wage and salary income (including employer bonuses, 13th month bonus, etc.), net of employer and employee social insurance contributions and taxes.		Continuous variable			Income earners	/		
PIKEAR	In-kind earnings	In-kind income as a substitute or complement for cash wages. Includes, for example, the value of company cars, meals, housing, electricity, medical expenses, child care etc. paid or partly paid by the employer.	It does not exist on its own at the person level.	Continuous variable			Income earners	/		
PSINC	Self-employment income	Profit/loss from unincorporated enterprises. The income is recorded gross of social insurance contributions (but net of expenses).	Self-employment income is often collected with a different reference period than other more regular incomes; for example, it could refer to the last financial year for which business accounts for the purposes of taxation were prepared. Includes imputed income from owner occupied dwellings and own produced food for home consumption If farm and non-farm self-employment income are not supplied separately, users can try to split them at the individual level	Continuous variable			Income earners	/		
PRENTAL	Income less expenses from rentals	Rentals from dwellings, business buildings, vehicles, equipment, etc excludes rent from land		Continuous variable			Income earners	/		
PPROINC	Property income	Interest received less interest paid Dividends Rent from land		Continuous variable			Income earners	/		
PTRANSF	Current transfers received	Social insurance, assistance, inter-household transfers, regular support received such as charities, disability pensions, allowances, benefits etc. Child/family benefits		Continuous variable			Income earners	/		
PTRPAID	Current transfers paid	Employers' social insurance contributions Employees' social insurance contributions Taxes on income less refund Regular taxes on wealth Regular inter-household cash transfers Regular cash transfers to charities	In some datasets mandatory social insurance contributions are recorded together with the taxes and are, therefore, included here. If the original data only has one tax variable with all the taxes lumped together, the variable is included here. If the original survey only asked for net incomes, this variable usually remains empty. In many datasets, income taxes are not asked directly to the respondents but simulated through a taxation micro simulation model.	Continuous variable			Income earners	/		
PTOTDINC	Total disposable income		PGWAG+PSINC+PRENTAL+ PPROINC+PTRANSF	Continuous variable			Income earners	/		
PTOTINC	Total income		PTOTDINC+PTRPAID	Continuous variable			Income earners	/
