Data Dictionary (Version 1), Harmonized Labor Force Survey (HLFS), Jordan, EUS 2010

Important notes:
- All cells shaded in orange indicate country-specific information, standard values generated by ERF or values of a scale variable
- All variables' names are in upper cases in the data dictionary and the SPSS format data files, and in lower cases in the STATA format data files
- Under column "Key":
-A: indicates a variable that is available in/can be generated from the survey dataset
-/: indicates a variable that is not available in/cannot be generated from the survey dataset

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: ALL IDEAL UNIVERSE: ALL OBSERVATIONS (HOUSEHOLDS/INDIVIDUALS) CATEGORY: FILE IDENTIFICATION AND INFORMATION										
The variables in this section exist in both the household and the individual data files.										
COUNTRY	Country	A numeric variable representing the country and coded per the UN's Dec. 2012, country classification.	This variable exists in both the household and the individual files and is necessary when concatenating different data files.	Numeric discrete variable			All HHs/ All INDs	A	-	Generated by ERF
YEAR	Survey year	Year during which the survey was performed.	This variable exists in both the household and the individual files and is necessary when concatenating cross-sectional data. In the case of panel data, the Panel Identifier should be used to merge the datasets across years.	Ordered discrete variable			All HHs/ All INDs	A	-	Generated by ERF
ROUND	Survey round	This variable indicates the round during which the household was observed.	The data collection of the LFSs might be conducted over several rounds during the survey year. This variable will be then generated in the datasets for which the collection was done over at least 2 rounds to indicate the round number during which each household was observed. In the case of panel data, the same household ID may have different round numbers indicating different observations of the same household during the survey year.	Ordered discrete variable			All HHs/ All INDs	A	Q117	
DTYPE	Data type	This variable should indicate whether the survey data is cross-sectional or panel.	The value of this variable should be constant for the same dataset, indicating one type of data (cross-sectional or panel). This variable might be useful when combining datasets to identify different types of data before using them for analysis.	Categorical variable	1 Cross-sectional 2 Panel		All HHs/ All INDs	A	-	Generated by ERF taking the code 1 since the data is cross-sectional
DREP	Household repetition over rounds	For the panel as well as the fresh sample, this variable should indicate the round(s) over which a certain household was interviewed.	This variable is generated only in the case of panel data. In case of cross-sectional data, this variable should typically be similar to the "ROUND" variable.	Harmonized Categorical variable	1 First round only 2 Second round only 3 Third round only 4 Fourth round only 12 First and second rounds 13 First and third rounds 14 First and fourth rounds 23 Second and third rounds 24 Second and fourth rounds 34 Third and fourth rounds		All HHs/ All INDs	/	-	
CASESER	Unique household identifier	Sequential anonymous household identifier, usually provided in the dataset.	This variable exists both in the household and the individual files and is necessary when merging the two files. When combining different countries or years, it is necessary to use the CASESER variable in combination with the COUNTRY, YEAR and ROUND variables in order to uniquely identify the households. When merging household and individual level files from the same dataset, this variable can be used to link each individual to the right household.	Ordered discrete variable			All HHs/ All INDs	A	Q101 Q108 Q109 Q110 Q117 Q113	A household serial is generated by ERF, using the variables Q101, Q108, Q109, Q110, Q117, and Q113 to uniquely identify each household.
HPNLID	Household panel identifier	This variable should indicate the identifiers of paneled households only, either those observed across different rounds during the survey year or across two successive years, depending on the sampling design.	This identifier should be available for the paneled households only, and is unique within EACH round. It should be used to merge the panel data of households observed over several rounds. In some datasets, for the paneled households only, this variable might be similar to CASESER.	Ordered discrete variable			Paneled HHs/ Paneled INDs	/		
HWEIGHT	Household weight	Data provider household weight.	The household weight can correct just for sample bias, or also for non-sampling errors (such as response bias and adjustment to population distribution). In many cases, the weight is a population weight, which means that the weight will inflate the result to reflect the total population. We strongly recommend that all statistical analysis be performed using the data weights.	Continuous variable			All HHs/ All INDs	A	WT_REL	

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: ALL IDEAL UNIVERSE: ALL OBSERVATIONS (HOUSEHOLDS/INDIVIDUALS) IDEAL REFERENCE PERIOD: AT THE TIME OF THE INTERVIEW CATEGORY: GEOGRAPHICAL CHARACTERISTICS										
REG	Region	Region of residence.	To generate the Region and Area of residence, the original variables will be recoded to include the country UN standardized 3 digits code (already used in COUNTRY) in addition to the REG or AREA code, standardized on 3 digits as well. This is to avoid possible mismatches between these two variables' codes across different countries when the datasets are merged.	Categorical variable	CNT+COD Country (UN 3 digits) + Region codes (3 digits code)		All HHs/ All INDs	A	Q101	
AREA	Area	Second geographical variable identifying another aspect of the location of the unit not described in REG such as city or village.		Categorical variable	CNT+COD Country (UN 3 digits) + Area codes (3 digits code)		All HHs/ All INDs	/		
PSUNUM	Primary Sampling Unit identifier	Anonymous Primary Sampling Unit identifier provided in the dataset.		Ordered discrete variable			All HHs/ All INDs	/		
RURURB	Urban/Rural residence	Indicates whether the region is urban/rural.	In case the country has refugee camps (as in Palestine), the "refugee camp" category is coded "2".	Harmonized categorical/ dummy variable	0 Rural	2 Rural	All HHs/ All INDs	A	UR_RL	
					1 Urban	1 Urban				
					2 Refugee camps					

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
HOUSEHOLD-LEVEL VARIABLES										
FILE LEVEL: HOUSEHOLD IDEAL UNIVERSE: ALL HOUSEHOLDS IDEAL REFERENCE PERIOD: AT THE TIME OF THE INTERVIEW CATEGORY: HOUSEHOLD COMPOSITION										
TPNUM	Total number of household members		The variables should count all household members (males/females), including those reported as head's non-relative (including domestic workers). These variables should be constructed by aggregating the data provided on the individual-level. In general, summation over all individuals in the household. TPNUM = FEMNUM + MALNUM	Ordered discrete variable			All HHs	A	Q204	Generated by ERF
MALNUM	Total number of males in the household						All HHs	A		Generated by ERF
FEMNUM	Total number of females in the household						All HHs	A		Generated by ERF
FILE LEVEL: HOUSEHOLD IDEAL UNIVERSE: ALL HOUSEHOLDS IDEAL REFERENCE PERIOD: AT THE TIME OF THE INTERVIEW CATEGORY: LFS CLASSIFICATION OF HOUSEHOLD MEMBERS										
MALUNEMP_PW	Number of unemployed 15+ males who have previously worked		These variables should be generated for household members who are in the working age population (aged 15 years or older). In the case where no identification can be done between those who have previously worked and those who have never worked before, the household members who are unemployed but reported a previous work experience are identified as "unemployed who have previously worked," and those with no work experience are identified as "never worked before." These variables should be constructed by aggregating the data provided on the individual-level. In general, summation over all unemployed individuals in the household aged 15+ (worked previously and never worked before). HUNEMP_PW=FEMUNEMP_PW+MALUNEMP_PW HUNEMP_NW=FEMUNEMP_NW+MALUNEMP_NW	Ordered discrete variable			All HHs	A	Q204 Q225 Q226 Q227	Generated by ERF
MALUNEMP_NW	Number of unemployed 15+ males who have never worked						All HHs	A		Generated by ERF
FEMUNEMP_PW	Number of unemployed 15+ females who have previously worked						All HHs	A		Generated by ERF
FEMUNEMP_NW	Number of unemployed 15+ females who have never worked						All HHs	A		Generated by ERF
HUNEMP_PW	Number of 15+ unemployed household members who have previously worked						All HHs	A	Q225 Q226 Q227	Generated by ERF
HUNEMP_NW	Number of 15+ unemployed household members who have never worked						All HHs	A		Generated by ERF
MALINLF	Number of 15+ males in the labor force		These variables should be generated for household members who are in the working age population (aged 15 years or older), and reported to be either employed or unemployed and seeking a job (active) during the short reference period. These variables should be constructed by aggregating the data provided on the individual-level. In general, summation over all individuals 15+ in the labor force in the household. HINLF = FEMINLF + MALINLF	Ordered discrete variable			All HHs	A	Q204 Q213 Q214 Q226 Q227 Q228	Generated by ERF
FEMINLF	Number of 15+ females in the labor force						All HHs	A		Generated by ERF
HINLF	Number of 15+ household members in the labor force						All HHs	A	Q213 Q214 Q226 Q227 Q228	Generated by ERF
MALOUTLF	Number of 15+ males out of labor force		These variables should be generated for household members who are in the working age population (aged 15 years or older) and inactive with respect to their relation to the labor force during the short reference period (unemployed and able to work but neither want nor seeking work, student, housewife, homemaker, retired, disabled, old age, etc.). These variables should be constructed by aggregating the data provided on the individual-level. In general, summation over all individuals 15+ and out of labor force in the household. HOUTLF = FEMOUTLF + MALOUTLF	Ordered discrete variable			All HHs	A	Q204 Q226 Q228 Q232	Generated by ERF
FEMOUTLF	Number of 15+ females out of labor force						All HHs	A		Generated by ERF
HOUTLF	Number of 15+ household members out of labor force						All HHs	A	Q226 Q228 Q232	Generated by ERF

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: HOUSEHOLD IDEAL UNIVERSE: ALL HOUSEHOLDS IDEAL REFERENCE PERIOD: AT THE TIME OF THE INTERVIEW CATEGORY: HEAD'S AND SPOUSE'S CHARACTERISTICS										
AGEHD	Age of the head	Age in completed years.	See AGE When the original dataset has only age categories, age is calculated as the midpoint of the range provided.	Ordered discrete variable			All Heads	A	Q203 Q206	In few cases, large age differences were detected between the head's, the spouse's and the son's/daughter's ages; in households number: 327, 1420, 1837, 3813, 4550, 11164, 27224, 34562, 42454 and 42715 .
AGESP	Age of the spouse		If the head has multiple spouses, a variable for each spouse will be generated, and named AGESP_# where # is the spouse number.				All Spouses			
SEXHD	Gender of the head	Gender.	See SEX	Harmonized categorical variable	1 Male	Structured the same as SEX	All Heads	A	Q203 Q204	
SEXSP	Gender of the spouse		If the head is male and has multiple spouses, a variable for each spouse will be generated and will be named SEXSP_# where # is the spouse number. For all spouses except the first spouse, the gender will be always 2 (female).		2 Female		All Spouses			
MARTHD	Marital status of the head [Standardized version]	Legal administrative status concerning marriage.	This variable should not be imputed for household members for whom the information was not collected (i.e. it can only be generated for those to whom the question was asked since the youngest age at which the information is collected may differ depending on the survey). Married only refers to formal marriages (including legally married). Polygamous unions include males with multiple spouses. The number of spouses in the household can be used to indicate polygamy.	Harmonized Categorical variable	1 Never married 2 Married monogamous 3 Married polygamous 4 Divorced/Separated 5 Widowed 99 Not stated	Structured the same as MART	Heads aged 15 +	A	Q203 Q212	The "married polygamous" category was generated for the head of the household only, if the number of spouses exceeds "1".
MARTHD_D	Marital status of the head [Detailed version]	Legal administrative status concerning marriage (detailed version of coding).		Harmonized Categorical variable		Structured the same as MART_D	Heads aged 15 +	A	Q203 Q212	The "married polygamous" category was generated for the head of the household only, if the number of spouses exceeds "1".
NATHD	Ethnicity/nationality of the head [Standardized version]	Ethnicity or nationality.	See ETHNAT	Categorical variable	0 Non-citizen	Structured the same as ETHNAT	All Heads	A	Q203 Q207	
NATSP	Ethnicity/nationality of the spouse [Standardized version]		In the case that the head has multiple spouses, a variable for each spouse will be generated and will be named NATSP_# where # is the spouse number.		1 Citizen		All Spouses			
					99 Not stated					
NATHD_D	Ethnicity/nationality of the head [Detailed version]	Ethnicity or nationality (detailed version of coding).	See ETHNAT_D	Harmonized Categorical variable	001-894 Standardized UN country codes 990 Other Arab countries 991 Other non-Arab countries 998 Without citizenship 999 Not stated	Structured the same as ETHNAT_D	All Heads	A	Q203 Q207	
NATSP_D	Ethnicity/nationality of the spouse [Detailed version]		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named NATSP_#_D where # is the spouse number.		All Spouses					
IMMIGRHD	Immigration status of the head	Ideally indicates whether an individual is born in the country or has an immigrant background, and, if possible, how recently he/she arrived. Other migration status information may be included if available.	See IMMIGR	Harmonized categorical variable	1 Immigrant (from abroad)	Structured the same as IMMIGR	All Heads	/		
IMMIGRSP	Immigration status of the spouse		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named IMMIGRSP_# where # is the spouse number.		2 Migrant (from another region inside the country)		All Spouses			
					3 No					
BIRHD	Is the head born in his residence place	This variable indicates whether the individual is born in his/her current place of residence.	See BIR	Dummy variable	0 No	Structured the same as BIR	All Heads	/		
BIRSP	Is the spouse born in her residence place		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named BIRSP_# where # is the spouse number.		1 Yes		All Spouses			
BIRPLHD	Place of birth of the head	This variable includes the country or the region/ governorate where the individual was born.	See BIRPL Very few surveys contain this information	Categorical variable	001-894 Standardized UN country codes (for immigrants) CNT+COD Country (UN 3 digits)+Birth place codes (for migrants and residents)	Structured the same as BIRPL	All Heads	/		
BIRPLSP	Place of birth of the spouse		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named BIRPLSP_# where # is the spouse number.				All Spouses			

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
LITHD	Literacy status of the head	This variable indicates whether the person is literate (can read and write) or not.	See LIT	Dummy variable	0 No	Structured the same as LIT	Heads aged 15+	A	Q203 Q210	
LITSP	Literacy status of the spouse		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named LITSP_# where # is the spouse number.		1 Can read & write		Spouses aged 15+			
					99 Not stated					
EDUHD	Educational level of the head [Standardized version]	Highest level of education attained.	See EDUC	Harmonized categorical variable	1 None	Structured the same as EDUC	Heads aged 15+	A	Q203 Q210	The older education system consisted of 3 cycles; primary (grades one through six); preparatory (grades seven through nine); and secondary (grades ten through twelve). The new education system consists of 2 cycles only; basic education (10 years); and secondary education (2 years).
					2 Primary/Lower secondary					
					3 Secondary					
					4 Post secondary or equivalent					
					5 University					
					6 Postgraduate					
					99 Not stated					
EDUHD_D	Educational level of the head [Detailed version]	Highest level of education attained (detailed version of coding).	See EDUC_D	Harmonized categorical variable		Structured the same as EDUC_D	Heads aged 15+	A	Q203 Q210	The older education system consisted of 3 cycles; primary (grades one through six); preparatory (grades seven through nine); and secondary (grades ten through twelve). The new education system consists of 2 cycles only; basic education (10 years); and secondary education (2 years).
EDUSP_D	Educational level of the spouse [Detailed version]		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named EDUSP_#_D where # is the spouse number.				Spouses aged 15+			
MASHD	Main activity status of the head [Standardized version]	Main activity status during the survey period.	See MAS	Harmonized categorical variable	1 Employed	Structured the same as MAS	Heads aged 15+	A	Q203 Q213 Q214 Q226 Q227 Q228 Q232	For the 15+ heads and spouses reported inactive (students, housewife, with means, etc.), if they are willing to work but not actively searching for a job, and if a reason for not searching is reported, they should be considered "Other" (code 6) in the standardized version, and "Discouraged unemployment" (code 620) in the detailed version. For other inactive 15+ heads and spouses who are neither willing nor seeking a job, their initial inactivity status is identified in both MAS and MAS_D and reported as the main reason for not searching a job/being inactive in NOTSRCH_R (codes 15 to 18).
					2 Unemployed					
					3 Homemaker (Housewife)					
					4 Student					
					5 Pensioners/retired/disabled					
					6 Others					
					99 Not stated					
MASHD_D	Main activity status of the head [Detailed version]	Main activity status during the survey period (detailed version of coding).	See MAS_D	Harmonized categorical variable		Structured the same as MAS_D	Heads aged 15+	A	Q203 Q213 Q215 Q225 Q226 Q227 Q228 Q232	
MASSP_D	Main activity status of the spouse [Detailed version]		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named MASSP_#_D where # is the spouse number.				Spouses aged 15+			
EMPSHD	Status of employment of the head [Standardized version]	Detailed description of the employment status.	See EMPS	Harmonized categorical variable	1 Employee	Structured the same as EMPS	Employed Heads aged 15+	A	Q203 Q223	The original variable indicating the work status (Q223) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
					2 Employer					
					3 Own account, self-employed					
					4 Contributing (unpaid) family workers					
					5 Member of producers cooperatives					
					6 Workers not classifiable by status (other)					
					99 Not stated					
OCCHD	Occupation classification of the main job of the head [Standardized version]	Standardized occupation classification of the main job.	See OCC	Harmonized categorical variable	10 Legislators, senior officials and managers	Structured the same as OCC	Employed Heads aged 15+	A	Q203 Q222	The original variable indicating the occupation (Q222) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
					20 Professionals					
					30 Technicians and associate professionals					
					40 Clerks					
					50 Service workers and shop and market sales workers					
					60 Skilled agricultural and fishery workers					
					70 Craft and related trades workers					
					80 Plant and machine operators and assemblers					
					90 Elementary occupations					
					100 Armed Forces					
					998 Other/unspecified					
					999 Not stated					
OCCHD_ISCO08_3	Occupation classification of the main job of the head [ISCO 2008-3 digits]	Occupation classification of the main job, following the 3-digits International Standard Classification of Occupations for the year 2008 (ISCO-08).		Harmonized categorical variable	--- ISCO 2008-3 digits coding 9998 Unspecified codes 9999 Not Stated	Structured the same as OCC_ISCO08_3	Employed Heads aged 15+	A	Q203 Q222	The original variable indicating the occupation (Q222) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
OCCSP_ISCO08_3	Occupation classification of the main job of the spouse [ISCO 2008-3 digits]		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named OCCSP_#_xxx where # is the spouse number and xxx is the occupation classification.				Employed Spouses aged 15+			

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
INDHD	Economic activity classification of the main job of the head [Standardized version]	Standardized economic activity classification of the main job.	See IND	Harmonized categorical variable	10 Agriculture, forestry and fishing 20 Mining and quarrying 30 Manufacturing 40 Electricity, gas and water supply 50 Construction 60 Wholesale and retail trade 70 Transportation and storage 80 Accommodation and food service activities 90 Information and communication 100 Financial and insurance activities 110 Real estate, professional and support service activities 120 Public administration and defence 130 Education 140 Human health and social work activities 150 Other activities 998 Unspecified 999 Not stated	Structured the same as IND	Employed Heads aged 15+	A	Q203 Q221	The original variable indicating the economic activity (Q221) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
INDSP	Economic Activity classification of the main job of the spouse [Standardized version]		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named INDSP_# where # is the spouse number.				Employed Spouses aged 15+			
INDHD_ISIC4_3	Economic activity classification of the main job of the head [ISIC Rev.4-3 digits]	Economic activity classification of the main job, following the 3-digits International Standard Industrial Classification of All Economic Activities, Revision 4 (ISIC Rev.4).		Harmonized categorical variable	--- ISIC-Rev. 4-3 digits coding 9998 Unspecified codes 9999 Not Stated	Structured the same as IND_ISIC4_3	Employed Heads aged 15+	A	Q203 Q221	The original variable indicating the economic activity (Q221) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
INDSP_ISIC4_3	Economic activity classification of the main job of the spouse [ISIC Rev.4-3 digits]		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named INDSP_#_xxx where # is the spouse number and xxx is the economic activity classification.				Employed Spouses aged 15+			
SECTORHD	Sector of employment of the head [Standardized version]	Sector of employment (i.e. private versus public sector workers) in the main job.	See SECTOR	Harmonized categorical variable	1 Government 2 Public sector 3 Private sector 4 Joint/Cooperative 5 Foreign sector 6 Other 99 Not stated	Structured the same as SECTOR	Employed Heads aged 15+	A	Q203 Q219	The original variable indicating the sector of employment (Q219) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
SECTORSP	Sector of employment of the spouse [Standardized version]		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named SECTORSP_# where # is the spouse number.				Employed Spouses aged 15+			
SECTORHD_D	Sector of employment of the head [Detailed version]	These variables distinguish between different types of public and private sector employment, as well as other types of sectors (foreign, cooperative, etc.).	See SECTOR_D	Harmonized categorical variable		Structured the same as SECTOR_D	Employed Heads aged 15+	A	Q203 Q219	The original variable indicating the sector of employment (Q219) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
SECTORSP_D	Sector of employment of the spouse [Detailed version]		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named SECTORSP_#_D where # is the spouse number.				Employed Spouses aged 15+			
EMPSTABHD	Employment stability in the main job of the head	These variables indicate whether the employed individual is engaged in a regular or an irregular job.	See EMPSTAB	Harmonized categorical variable	1 Full time/Regular 2 Part time/Temporary 3 Seasonal/Irregular 99 Not stated	Structured the same as EMPSTAB	Employed Heads aged ...+	/		
EMPSTABSP	Employment stability in the main job of the spouse		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named EMPSTABSP_# where # is the spouse number.				Employed Spouses aged ...+			
TOTWAGHD	Total monthly wage from the regular main job of the head	This variable indicates the total monthly wage the employee received from the main job, including bonuses, benefits, allowances, profits, etc.	See TOTWAG When the original dataset has only wage categories, the total wage is calculated as the midpoint of the range provided.	Continuous variable		Structured the same as TOTWAG	Waged Workers Heads aged 15+	A	Q203 Q223 Q224	The original variable indicates the wage category only, thus, the generated variable is calculated as the midpoint of the ranges provided. The original variable indicating the total number of working hours (Q224) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is reported missing.
TOTWAGSP	Total monthly wage from the regular main job of the spouse		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named TOTWAGSP_# where # is the spouse number.				Waged Workers Spouses aged 15+			
IRRGWAGHD	Total daily wages from seasonal/irregular jobs of the head		See IRRGWAG When the original dataset has only wage categories, the total wage is calculated as the midpoint of the range provided.	Continuous variable		Structured the same as IRRGWAG	Irregular Waged Workers Heads aged ...+	/		
IRRGWAGSP	Total daily wages from seasonal/irregular jobs of the spouse		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named IRRGWAGSP_# where # is the spouse number.				Irregular Waged Workers Spouses aged ...+			

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
EMPINCHD	Total monthly income of the head if reported employer		See EMPINC When the original dataset has only income categories, the total income is calculated as the midpoint of the range provided.	Continuous variable		Structured the same as EMPINC	Heads reported employers aged 15+	A	Q203 Q223 Q224	The original variable indicates the income category only, thus, the generated variable is calculated as the midpoint of the ranges provided. The original variable indicating the total number of working hours (Q224) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded missing.
EMPINCSP	Total monthly income of the spouse if reported employer		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named EMPINCSP_# where # is the spouse number.				Spouses reported employers aged 15+			
SEMPINCHD	Total monthly income of the head if reported self-employed		See SEMPINC When the original dataset has only income categories, the total income is calculated as the midpoint of the range provided.	Continuous variable		Structured the same as SEMPINC	Self-employed Heads aged 15+	A	Q203 Q223 Q224	The original variable indicates the income category only, thus, the generated variable is calculated as the midpoint of the ranges provided. The original variable indicating the total number of working hours (Q224) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is reported missing.
SEMPINCSP	Total monthly income of the spouse if reported self-employed		In the case that the head has multiple spouses a variable for each spouse will be generated and will be named SEMPINCSP_# where # is the spouse number.				Self-employed Spouses aged 15+			

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010													
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments									
FILE LEVEL: HOUSEHOLD IDEAL UNIVERSE: ALL HOUSEHOLDS IDEAL REFERENCE PERIOD: AT THE TIME OF THE INTERVIEW CATEGORY: DWELLING CHARACTERISTICS																			
HHTYPE	Household type	Identifying collective and non-collective households.	Collective households are mostly composed of a number of non-relatives (residents/non-residents) who are of the same gender, living together, and employed and/or students. No head is identified for collective households and the relationship to the head variable will be recoded as missing for all household members. Non-collective households are mostly residents who have the regular structure of a family (head, spouse, etc.).	Dummy variable	0 Non-collective	All other HHs for which a head is identified	All HHs	A	Q203	13 collective households were detected. No head is identified for such HHs. Thus, the relation of all members to the head in those HHs is recoded missing.									
					1 Collective	if Q203= 8 (others non-relatives) for all individuals in the household and there is no head identified for them													
DWLTYP	Type of dwelling [Standardized version]	Type of the dwelling.	This variable mainly distinguishes between villas, apartments and others. "House" includes traditional, modern, or Arabic houses etc. "Villa" includes palaces, villas, floor in a villa, or duplex etc. "Others" includes clay/reed house, primitive houses, caravans, etc.	Harmonized categorical variable	1 House		All HHs	/											
					2 Villa														
					3 Apartment														
					4 Others														
DWLTYP_D	Type of dwelling [Detailed version]	Type of the dwelling (detailed version of coding).	This variable is the detailed version of the above type of dwelling variable (DWLTYP). It mainly distinguishes between different types of houses, villas, apartments and other residential units.	Harmonized categorical variable	100 House		All HHs	/											
					110 Countryside house														
					120 Arabic house														
					130 Traditional house														
					140 Modern house														
					150 Public or part of a public house														
					160 Small house (part of a villa)														
					170 House in an agency														
					180 House built in bricks or rocks or concrete														
					190 "1" Floor building														
					200 Villa														
					210 Villa or floor in a villa														
					220 Part of a villa														
					230 Palace														
					300 Apartment														
					310 More than one apartment														
					320 Studio														
					400 Others														
					410 One or more separate rooms														
					420 One or more rooms in a housing unit														
					430 Tent, hut, shack, slum, grotto, shebra, caravan, Barakia (marginal), ...														
					440 Clay or reed house														
					450 Other place not suitable for residence														
					460 Residence in cemetery area														
DWLTEN	Tenure of dwelling [Standardized version]	Type of tenure.	This variable distinguishes between owned or rented living quarters.	Harmonized categorical variable	1 Rented		All HHs	/											
					2 Owned														
					3 Provided free														
					4 Others														
DWLTEN_D	Tenure of dwelling [Detailed version]	Type of tenure (detailed version of coding).	This variable distinguishes between different types of owned, rented, provided free or other forms of tenure for living quarters.	Harmonized categorical variable	100 Rented		All HHs	/											
					110 Unfurnished rent														
					120 Furnished rent														
					130 Old law rent														
					140 New law rent														
					150 Rent with key money														
					200 Owned														
					210 Unit owned (privately or jointly)														
					220 Unit bought														
					230 In the process of being acquired														
					240 Mortgage with or without rent														
					300 Provided free														
					310 Provided free by employer or by work														
					320 Subsidized rent, without payment, from work														
					330 Gift/granted														
					340 In-kind benefit														
					350 Without payment														
					400 Others														
					410 Free agreement														
					420 No agreement														
					430 Provided for work														
					ARHOUS	Actual rentals for housing					Actual rentals paid by tenants and other actual rentals.	Rentals include payment for the use of the land on which the property stands, the dwelling occupied, the fixtures and fittings for heating, plumbing, lighting, etc., and, in the case of a furnished dwelling, rented furniture.	Continuous variable			All HHs	/		
					IMPREN	Imputed rentals for housing					Imputed rentals of owners occupying their main residence and other imputed rentals.	Also includes imputed rentals for secondary residences and imputed rentals for households paying a reduced rental or who are housed free.	Continuous variable			All HHs	/		

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
ROOM	Number of rooms	Number of rooms excluding bathroom and kitchen.	In some surveys, there is no indication whether the bathroom and the kitchen are counted in the number of rooms or not. We assume they are excluded.	Ordered discrete variable			All HHS	/		
ELECT	Connection to electricity	This variable indicates if the dwelling is connected to electricity or not.	This variable is often generated from the source of lighting. Dwellings having a private generator, are considered connected to electricity.	Dummy variable	0 No 1 Electricity		All HHS	/		
SLIGHT	Source of energy for lighting	This variable distinguishes between public and private sources of electricity and other sources of energy used for lighting.	Private sources of electricity include community and private generators and cooperative networks. "Others" may include sources that are presented independently in the standardized value if the survey is not detailed enough (examples are gas and kerosene).	Harmonized categorical variable	0 No lighting 1 Public network 2 Private 3 Gas 4 Kerosene 8 Others		All HHS	/		
SCOOK	Source of energy for cooking	This variable distinguishes between different sources of energy used for cooking.		Harmonized categorical variable	0 No cooking 1 Electricity 2 Gas 3 Kerosene 4 Wood & coal 8 Others		All HHS	/		
SHEAT	Source of energy for heating	This variable distinguishes between different sources of energy used for heating.		Harmonized categorical variable	0 No heating 1 Electricity 2 Gas 3 Kerosene 4 Wood & coal 8 Others		All HHS	/		
WAT	Water facility [Standardized version]	This variable should indicate the main source of drinking water for the dwelling.	Piped supply includes public and private networks; public tap includes fountains and springs; wells are either with or without private or public pumps etc.; Tanker includes water purchased indoor or outdoor; others include lakes, rivers, rainwater, etc.	Harmonized categorical variable	1 Piped supply 2 Public tap 3 Well 4 Tanker 8 Others		All HHS	/		
WAT_D	Water facility [Detailed version]	This variable should indicate the main source of drinking water for the dwelling (detailed version of coding).		Harmonized Categorical variable	100 Piped supply 110 Public network 120 Private network 200 Public tap 210 Public tap connected to public network 220 Public tap not connected to public network 230 Fountains 240 Unequipped fountains 250 Equipped fountains 260 Springs 300 Well 305 Covered/protected well 310 Uncovered/unprotected well 315 Well with pump 320 Well without pump 325 Covered/protected well with pump 330 Uncovered/unprotected well with pump 335 Covered/protected well without pump 340 Uncovered/unprotected well without pump 345 Public well 350 Equipped public well 355 Unequipped public well 360 Private well 365 Equipped private well 370 Unequipped private well 400 Tanker 410 Public tanker 420 Private tanker 430 Water vendor 800 Others 810 River 820 Lake 830 Rain water 840 Valley 850 Water tap, spring or well at the disposal of water association		All HHS	/		
SEWAGE	Sewage Facility	This variable should indicate the type of household connection to sewage facility.		Harmonized categorical variable	0 No sewage facility 1 Public network 2 Private network 3 Septic tank 4 Pit or latrine 5 Other		All HHS	/

						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
TOIF	Toilet facility	This variable should indicate whether the household has access to a toilet facility.		Dummy variable	0 No		All HHs	/		
					1 Yes					
TOIF_SH	Toilet facility shared	This variable should indicate whether or not the household shares the toilet facility.	In case we don't have information on whether the toilet is shared or no but we do know if the toilet is inside or outside the dwelling we can consider that all toilets outside the dwelling are shared toilets	Harmonized categorical variable	1 Private toilet		All HHs	/		
					2 Shared toilet					
					3 No toilet facility					
BATHF_SH	Bathroom facility shared	This variable should indicate whether the household has access to a private or shared bath facility.	If no information is provided on whether the facility is private or shared, it should be considered private.	Harmonized categorical variable	1 Private bath		All HHs	/		
					2 Shared bath					
					3 No bath facility					
KTCHF_SH	Kitchen facility shared	This variable should indicate whether the household has access to a private or shared kitchen facility.	If no information is provided on whether the facility is private or shared, it should be considered private.	Harmonized categorical variable	1 Private kitchen		All HHs	/		
					2 Shared kitchen					
					3 No kitchen facility

CAMERA	Has a photo or video camera	Indicates if the household owns or has free access to one or more photo or video cameras.		Dummy variable	0 None		All HHs	/		
					1 One or more					
CAMERA_N	Number of photo or video cameras	Indicates the number of photo or video cameras the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
GAME	Has any type of video or electronic games	Indicates if the household owns or has free access to any type of video or electronic games (Play Station, Gameboy, Wii, etc.).		Dummy variable	0 None		All HHs	/		
					1 One or more					
GAME_N	Number of video or electronic games	Indicates the number of any type of video or electronic games (Play Station, Gameboy, Wii, etc.) the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
TELPH	Has a landline or cell phone	Indicates if the household owns or has free access to one or more landlines or cell phones.	These variables are generated when the original data does not distinguish between the type of telephones owned (landline/cell)	Dummy variable	0 None		All HHs	/		
					1 One or more					
TELPH_N	Number of landline or cell phones	Indicates the number of landlines or cell phones the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
TELPHL	Has a landline phone	Indicates if the household owns or has free access to one or more landline phones		Dummy variable	0 None		All HHs	/		
					1 One or more					
TELPHL_N	Number of landline phones	Indicates the number of landline phones the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
TELPHC	Has a cell phone	Indicates if the household owns or has free access to one or more cell phones		Dummy variable	0 None		All HHs	/		
					1 One or more					
TELPHC_N	Number of cell phones	Indicates the number of cell phones the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
FAX	Has a fax line or fax machine	Indicates if the household owns or has free access to one or more fax lines or fax machines		Dummy variable	0 None		All HHs	/		
					1 One or more					
FAX_N	Number of fax lines or fax machines	Indicates the number of fax lines or fax machines the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
COMPUTER	Has a computer or laptop connected or not to an internet connection	Indicates if the household owns or has free access to one or more computers or laptops connected or not connected to an internet connection.		Dummy variable	0 None		All HHs	/		
					1 One or more					
COMPUTER_N	Number of computers or laptops connected or not connected to an internet connection	Indicates the number of computers or laptops, connected or not connected to an internet connection, the household owns or has free access to.		Continuous variable			HHs reported ownership	/		

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
INTERNET	Has an internet line and related equipment	Indicates if the household owns or has free access to one or more internet connections and related equipment (router, USB, etc.).		Dummy variable	0 None		All HHs	/		
					1 One or more					
INTERNET_N	Number of internet lines and related equipment	Indicates the number of internet connections and related equipment (router, USB, etc.) the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
REFRG	Has a refrigerator, freezer, water cooler, etc.	Indicates if the household owns or has free access to one or more refrigerators, freezers, water coolers, etc.		Dummy variable	0 None		All HHs	/		
					1 One or more					
REFRG_N	Number of refrigerators, freezers, water coolers, etc.	Indicates the number of refrigerators, freezers, water coolers, etc. the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
COOKER	Has a cooker, stove, oven, etc.	Indicates if the household owns or has free access to one or more gas or electric cookers, stoves, ovens, etc.		Dummy variable	0 None		All HHs	/		
					1 One or more					
COOKER_N	Number of cookers, stoves, ovens, etc.	Indicates the number of gas or electric cookers, stoves, ovens, etc. the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
MICROWAVE	Has a microwave, grill, fryer etc.	Indicates if the household owns or has free access to one or more microwaves, grills, fryers, etc.		Dummy variable	0 None		All HHs	/		
					1 One or more					
MICROWAVE_N	Number of microwaves, grills, fryers, etc.	Indicates the number of microwaves, grills, fryers, etc. the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
SKITAPP	Has a food processor, kitchen machine, blender, grinder etc.	Indicates if the household owns or has free access to any of small kitchen appliances like a food processor, kitchen machine, blender, grinder etc.		Dummy variable	0 None		All HHs	/		
					1 One or more					
SKITAPP_N	Number of food processors, kitchen machines, blenders, grinders, etc.	Indicates the number of small kitchen appliances like a food processor, kitchen machine, blender, grinder etc. the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
WASH	Has a washing machine	Indicates if the household owns or has free access to one or more manual or automatic washing machines.		Dummy variable	0 None		All HHs	/		
					1 One or more					
WASH_N	Number of washing machines	Indicates the number of manual or automatic washing machines the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
DRYER	Has a clothes dryer	Indicates if the household owns or has free access to one or more clothes dryers.		Dummy variable	0 None		All HHs	/		
					1 One or more					
DRYER_N	Number of clothes dryers	Indicates the number of clothes dryers the household owns or has free access to.		Continuous variable			HHs reported ownership	/

DSHWSH	Has a dishwasher	Indicates if the household owns or has free access to one or more dishwashers.		Dummy variable	0 None		All HHs	/		
					1 One or more					
DSHWSH_N	Number of dishwashers	Indicates the number of dishwashers the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
COND	Has an air conditioner	Indicates if the household owns or has free access to one or more air conditioners.		Dummy variable	0 None		All HHs	/		
					1 One or more					
COND_N	Number of air conditioners	Indicates the number of air conditioners the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
FAN	Has an electric fan	Indicates if the household owns or has free access to one or more electric fans.		Dummy variable	0 None		All HHs	/		
					1 One or more					
FAN_N	Number of electric fans	Indicates the number of electric fans the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
HEATER	Has a heater	Indicates if the household owns or has free access to one or more gas, electric or solar heaters.		Dummy variable	0 None		All HHs	/		
					1 One or more					
HEATER_N	Number of heaters	Indicates the number of gas, electric or solar heaters the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
WAHEAT	Has a water heater	Indicates if the household owns or has free access to one or more solar, gas or electric water heaters.		Dummy variable	0 None		All HHs	/		
					1 One or more					
WAHEAT_N	Number of water heaters	Indicates the number of solar, gas or electric water heaters the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
SEWING	Has a sewing machine	Indicates if the household owns or has free access to one or more sewing machines.		Dummy variable	0 None		All HHs	/		
					1 One or more					
SEWING_N	Number of sewing machines	Indicates the number of sewing machines the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
VACUUM	Has a vacuum cleaner	Indicates if the household owns or has free access to one or more vacuum cleaners.		Dummy variable	0 None		All HHs	/		
					1 One or more					
VACUUM_N	Number of vacuum cleaners	Indicates the number of vacuum cleaners the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
IRON	Has an iron	Indicates if the household owns or has free access to one or more irons.		Dummy variable	0 None		All HHs	/		
					1 One or more					
IRON_N	Number of irons	Indicates the number of irons the household owns or has free access to.		Continuous variable			HHs reported ownership	/		
ODUR	Has other durables	Indicates if the household owns or has free access to any other household appliance.		Dummy variable	0 None		All HHs	/		
					1 One or more					
ODUR_N	Number of other durables	Indicates the number of any other appliances the household owns or has free access to.		Continuous variable			HHs reported ownership	/		

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
INDIVIDUAL-LEVEL VARIABLES										
FILE LEVEL: INDIVIDUAL										
IDEAL UNIVERSE: ALL INDIVIDUALS										
IDEAL REFERENCE PERIOD: AT THE TIME OF THE INTERVIEW										
CATEGORY: FILE IDENTIFICATION AND INFORMATION										
PNUM	Individual identifier	Individual identification number (usually the individual line number in the household).	This identifier is unique within each household. In cross-sectional datasets, both CASESER and PNUM are used to uniquely identify an individual. While in panel data, the ROUND, CASESER and PNUM are required to uniquely identify a certain individual.	Ordered discrete variable			All INDs	A	Q201	
PPNLID	Individual panel identifier	This variable contains the panel identification number of all surveyed individuals over more than one round during the survey year (or across two successive surveys).	This variable, in addition to HPNLID, is used to track paneled individuals only across the survey rounds/years. Thus, this identifier should be available for the paneled individuals only, and is unique within EACH round/household. It should be used, together with the HPNLID, to merge the panel data of the individuals interviewed over several rounds. In some datasets, for the paneled individuals only, this variable might be similar to PNUM.	Ordered discrete variable			Paneled INDs	/		
PWEIGHT	Individual weight	Data-provider individual weight.	Very few data providers construct a different weight for each member of the household. If an individual weight exists in the original dataset, we do report it here (even though it turns out to be the same for all household members in most cases), otherwise we assign the household weight to all household members. All statistical analysis performed should use the appropriate weight.	Continuous variable			All INDs	/		

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: INDIVIDUAL IDEAL UNIVERSE: ALL INDIVIDUALS IDEAL REFERENCE PERIOD: AT THE TIME OF THE INTERVIEW CATEGORY: DEMOGRAPHICS										
AGE	Age	Age in completed years.	In some datasets, the age may be calculated at a certain reference date (e.g., 31 December of the year preceding the survey). When the original dataset has only age categories, age is calculated as the midpoint of the range provided. In some datasets, AGE is top coded by the data provider (e.g., a value of 95 represents 95 years of age or over). In some surveys, the date of birth is reported instead of reporting the age value. In such cases, it should be computed based on the date of birth and the survey year.	Ordered discrete variable			All INDs	A	Q206	In few cases, large age differences were detected between the head's, the spouse's and the son's/daughter's ages; in households number: 327, 1420, 1837, 3813, 4550, 11164, 27224, 34562, 42454 and 42715 .
SEX	Gender	Indicator for the gender of the individual.		Harmonized Categorical variable	1 Male	1 Male	All INDs	A	Q204	
					2 Female	2 Female				
MART	Marital status [Standardized version]	Legal administrative status concerning marriage & partnership (even if not married, an individual can still be legally recognized as being in a relationship).	There is no polygamous status for females. Generally the information about polygamous status is available only for the male head. For the other individuals, we consider those having the status married as monogamous.	Harmonized Categorical variable	1 Never married	1 Never married	INDs aged 15+	A	Q212	The "married polygamous" category was generated for the head of the household only if the number of spouses exceeds "1".
					2 Married monogamous	2 Married				
					3 Married polygamous	2 Married (for heads only if number of spouses> 1)				
					4 Divorced/Separated	3 Divorced 5 Separated				
					5 Widowed	4 Widowed				
					99 Not stated	(15+ INDS for whom this variable is missing)				
MART_D	Marital status [Detailed version]	Detailed legal administrative status concerning marriage & partnership (even if not married, an individual can still be legally recognized as being in a relationship).	There is no polygamous status for females. Generally the information about polygamous status is available only for the male head. For the other individuals we consider those having the status married as monogamous. This variable distinguishes also between legal marriage and marriage, and between separation and divorce.	Harmonized Categorical variable	100 Never married	1 Never married	INDs aged 15+	A	Q212	The "married polygamous" category was generated for the head of the household only, if the number of spouses exceeds "1".
					200 Married monogamous	2 Married				
					210 Legally married					
					220 Married					
					300 Married polygamous	2 Married (for heads only if number of spouses>1)				
					400 Divorced/Separated					
					410 Separated	5 Separated				
					420 Divorced	3 Divorced				
					500 Widowed	4 Widowed				
999 Not stated	(15+ INDS for whom Q212 is missing)									
REL	Relationship to head [Standardized version]	Relationship to the head of household, where the value '1' always stands for the head of the household him/herself. The value "other relatives" includes nephew and niece, grandparents, sons/daughters in law, etc.		Harmonized Categorical variable	1 Head of household	0 Head of the household	All INDs	A	Q203	
					2 Spouse	1 Husband/wife				
					3 Son/daughter	2 Son/daughter				
					4 Father/mother (parents)	3 Father/mother				
					5 Brother/sister	5 Brother/sister				
					6 Grandchildren	4 Grandson/granddaughter				
					7 Other relatives	6 Other relative				
					8 Other non-relatives	7 Maid 8 Others				
REL_D	Relationship to head [Detailed version]	Relationship to the head of household, where the value '100' always stands for the head of the household him/herself. Detailed coding indicates different relations for other relatives and other non-relatives to the head.		Harmonized Categorical variable	100 Head of household	0 Head of the household	All INDs	A	Q203	
					200 Spouse	1 Husband/wife				
					300 Son/daughter	2 Son/daughter				
					310 Adopted children					
					400 Father/mother (parents)	3 Father/mother				
					500 Brother/sister	5 Brother/sister				
					600 Grandchildren	4 Grandson/granddaughter				
					700 Other relatives	6 Other relative				
					710 Son/daughter in law					
					720 Grandparents					
					730 Father/mother in law					
					740 Brother/sister in law					
					750 Nephew/niece					
					800 Other non-relatives	8 Others				
					810 Servants	7 Maid				
					820 Doorkeeper					
					830 Driver					
					840 Shepherd					
					850 Farmer					

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: INDIVIDUAL IDEAL UNIVERSE: ALL INDIVIDUALS IDEAL REFERENCE PERIOD: AT THE TIME OF THE INTERVIEW CATEGORY: NATIONALITY AND IMMIGRATION										
ETHNAT	Ethnicity/nationality [Standardized version]	Ethnicity or nationality.	The content of this variable is not uniform. In many datasets where information on ethnicity or nationality is not available in the original survey, this variable may be indicated by country of birth, race, ancestry or mother tongue.	Harmonized Categorical variable	0 Non-citizen	2 Egyptian 3 Syrian 4 Iraqi 5 Other Arab countries 6 Other non-Arab countries	All INDs	A	Q207	
					1 Citizen	1 Jordanian				
					99 Not stated	(INDS for whom Q207 is missing)				
ETHNAT_D	Ethnicity/nationality [Detailed version]	Coded per the UN's Dec. 2012 country classification.		Harmonized categorical variable	001-894 Standardized UN country codes 990 Other Arab countries 991 Other non-Arab countries 998 Without citizenship 999 Not stated		All INDs	A	Q207	
IMMIGR	Immigration status	Ideally indicates whether an individual is born in the country or has an immigrant background, and if possible, how recently he/she arrived. Other migration status information may be included if available.	The content of this variable is not uniform. Through other migration statuses we attempt to capture those who migrate from one region to another inside the country (if the place of birth is different from the place of residence inside the country).	Harmonized categorical variable	1 Immigrant (from abroad)		All INDs	/		
					2 Migrant (from another region inside the country)					
					3 No					
BIR	Is the individual born in his/her current residence place	This variable indicates whether the individual is born in his/her current place of residence.	The code "0" indicates individuals who have changed their place of residence since birth.	Dummy variable	0 No		All INDs	/		
					1 Yes					
BIRPL	Place of Birth	This variable includes the country or the region/governorate where the individual was born	This variable indicates the code of the country of birth for immigrant individuals, while it indicates the code of the region/governorate of birth for individuals born in the survey country.	Categorical variable	001-894 Standardized UN country codes (for immigrants) CNT+COD Country (UN 3 digits)+Birth place codes (for migrants and residents)		All INDs	/		
CURRESD_Y	Moving year to the current place of residence	This variable indicates the year during which the individual has moved to his/her current place of residence.	The universe of this variable should cover those who previously changed their place of residence, whether from the place of birth or from another residence place preceding the current one (for whom BIR=0).	Ordered discrete variable			INDs who changed their place of residence	/		
CURRESD_R	Reason for moving to the current place of residence	This variable indicates the reason for which the individual has moved to his/her current place of residence.	The universe of this variable should cover those who previously changed their place of residence, whether from the place of birth or from other residence place preceding the current one (for whom BIR=0).	Harmonized categorical variable	10 Work		INDs who changed their place of residence	/		
					20 Study					
					30 Marriage					
					40 Divorce/Widowhood					
					50 Accompany					
					60 Immigration					
					90 Others					
PRVRES	Moved to a previous place of residence before the current one	This variable indicates whether the individual previously moved to a residence place different from his/her place of birth before moving to his/her current place of residence.	The universe of this variable covers those for whom BIR=0. The code "1" indicates individuals whose previous residence place is not the place of birth or the current place of residence. For those who were born in the current residence place and never moved, this variable is coded missing (for whom BIR=1).	Dummy variable	0 No		INDs who have moved from their place of birth	/		
					1 Yes					
PRVRESDPL	Previous place of residence before the current one	This variable includes the country or region/ governorate of the previous residence that precedes the current one.	This variable universe are those for whom PRVRES=1.	Categorical variable	001-894 Standardized UN country codes (for immigrants) CNT+COD Country (UN 3 digits) + Previous Residence place codes		INDs who have moved from their place of birth and reported a previous place of residence	/		

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: INDIVIDUAL IDEAL UNIVERSE: ALL INDIVIDUALS IDEAL REFERENCE PERIOD: AT THE TIME OF THE INTERVIEW CATEGORY: EDUCATION										
LIT	Literacy status	This variable indicates whether the individual is or is not literate (can read and write).	An individual is considered literate if he/she can both read and write and not just one or the other. A semi-literate individual (one who can read, but cannot write) is said to be illiterate. In the case where the survey only asks whether an individual can read but does not ask if they can write, and in the case that there is no information in the questionnaire about the reading and writing ability, the literacy status cannot be determined, and these are coded as missing. If there are no questions about the reading and writing abilities, but the educational attainment is elementary or upper, the individual is considered literate.	Dummy variable	0 No	1 Illiterate	INDs aged 15+	A	Q210	
					1 Can read & write	2 Read and write 3 Elementary 4 Preparatory 5 Basic education 6 Vocational apprenticeship 7 Secondary 8 Intermediate diploma 9 B.A, B.Sc. 10 Higher diploma 11 M.A., M.Sc. 12 PhD				
					99 Not stated	(15+ INDS for whom Q210 is missing)				
EVERATTD	Ever attended school	This variable indicates whether the individual has ever attended school - academic, Koranic, or any other formal or informal education.	This variable is valid for all individuals in the pre-primary school age or above while it is coded missing for others. Primary school age will vary by country. This is a country-specific standard that depends on how school attendance is defined. Pre-school may be included here. Also, in some countries, the ever attended school variable could be coded yes even if the individual has attended school for a minimum amount of time. The differences need to be carefully documented. One is not required to have completed any level of education to answer this question positively. By logic, EVERATTD, EDUC and ATTSCH have the following relationship: If ATTSCH=1, EVERATTD=1 If EDUC>=2 (and ≠ 99), EVERATTD=1 If EDUC=99 & ATTSCH=0, EVERATTD=0	Dummy variable	0 No	3 No	INDS aged 15+	A	Q208	
					1 Yes	1 Yes, currently enrolled 2 Yes, ever enrolled				
					99 Not stated	(15+ INDS for whom Q208 is missing)				
ATTSCH	School attendance status	This variable indicates whether the individual is attending school at the time of the survey.	If a person is on a short school holiday when interviewed, he or she is considered to be at school. However, if the person is on the holiday between two years of schooling, one cannot assume that he/she will continue schooling into the next year. The variable can be created using either the attendance or the enrolment question (since typically just one of them is available in each survey). The generation of this variable does not require one to have completed any level to be considered currently attending school. Adults currently attending literacy programs are considered as attending school (ATTSCH = 1). In the case that the person is not currently attending school but there is no information on whether he/she attended school and left or never attended school use information from EDUC to impute the right value.	Dummy variable	0 No	2 Yes, ever enrolled 3 No	INDs aged 15+	A	Q208	
					1 Yes	1 Yes, currently enrolled				
					99 Not stated	(15+ INDS for whom Q208 is missing)				
TYP SCH	Type of school attended	Type of school attended by the individual.		Harmonized categorical variable	1 Koranic		INDs aged ...+	/		
					2 Academic					
					3 Adult education or literacy program					
					4 Vocational or other

						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: INDIVIDUAL IDEAL UNIVERSE: ALL INDIVIDUALS IDEAL REFERENCE PERIOD: WITHIN 7 DAYS OF THE INTERVIEW CATEGORY: CURRENT LABOR STATUS										
LFS	Labor force status in the reference period	The current labor force status should distinguish between the active (employed or unemployed) and inactive individuals (out of the labor force).	Individuals are considered "active" in the labor force if they presently have a job (formal or informal, i.e. are employed) or do not have a job but are actively seeking work (i.e. unemployed). Those unemployed and do not seek a job are considered inactive.	Harmonized Categorical variable	1 Active	Q213=1 (Employed during last week) Q214=1 (Temporary absent from work) Q228=1 (Waiting to return to previous job) Q228=2 (Found a job which will join later on) Q226=1 & Q227=1 (Unemployed, seeking a job)	INDS aged 15+	A	Q213 Q214 Q226 Q227 Q228 Q232	
					2 Inactive	Q232=1 (Student) Q232=2 (Housemaker) Q232=3 (With means) Q232=4 (Disabled) Q232=5 (Other)				
					99 Not stated	(15+ INDS for whom these variables are missing)				
MAS	Main activity status in the reference period [Standardized version]	Main activity status with respect to the labor force, which distinguishes between the employed and the not employed. The employed are those for whom work is the main activity, while for all the others the main activity should attempt to distinguish between pensioners, students, and homemakers.	Unlike LFS, the main distinction in MAS is between "employed" and "not employed." - "Employed": refers to those who, during the reference period, experienced any employment (any type or any extent) - even just one occasional hour of paid work or irregular unpaid family work (ILO definition). - "Not Employed": The rationale is that the individuals do not generally spend their time "being unemployed," but use the unemployment time to participate in other activities (e.g., attending school or being a housewife). Unemployment will generally be considered the primary activity only if the individual states that unemployment is his/her primary activity (e.g., unemployed and actively searching for a job) or if the individual is registered as unemployed and does not indicate significant participation in any other activity. In these cases, the individuals will be assigned their own category among the "Not Employed." Accordingly, "Not Employed" is classified into: - Unemployed - individuals who are not employed comprise all who are "not in employment" but "currently available to take up employment" and carry out "activities to seek employment", and who report that they are unemployed. - Not in Labor Force / Inactive – individuals identifiable as being neither employed nor unemployed, by the definitions above. If possible, the inactive category should distinguish between the retired, students, homemakers, pensioners, disabled, etc.	Harmonized Categorical variable	1 Employed	Q213=1 (Employed during last week) Q214=1 (Temporary absent from work) Q228=1 (Waiting to return to previous job) Q228=2 (Found a job which will join later on)	INDS aged 15+	A	Q213 Q214 Q226 Q227 Q228 Q232	For the 15+ individuals reported inactive (students, housewife, with means, etc.), if they are willing to work but not actively searching for a job, and if a reason for not searching is reported, they should be considered "Other" (code 6) in the standardized version, and "Discouraged unemployment" (code 620) in the detailed version. For other inactive 15+ individuals who are neither willing nor seeking a job, their initial inactivity status is identified in both MAS and MAS_D and reported as the main reason for not searching a job/being inactive in NOTSRCH_R (codes 15-18) .
					2 Unemployed	Q226=1 & Q227=1 (Unemployed, seeking a job)				
					3 Homemaker (Housewife)	Q226=2 or Q228=8 & Q232=2 (Housemaker)				
					4 Student	Q226=2 or Q228=8 & Q232=1 (Student)				
					5 Pensioners/retired/disabled	Q226=2 or Q228=8 & Q232=4 (Disabled)				
					6 Others	Q226=2 or Q228=8 & Q232=3 (With means) Q226=2 or Q228=8 & Q232=5 (Other) Q228=3 thru 7 (Dicouraged)				
					99 Not stated	(15+ INDS for whom these variables are missing)				

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
MAS_D	Main activity status in the reference period [Detailed version]	Main activity status with respect to the labor force, which distinguishes between the employed and the not employed. The employed are those for whom work is the main activity, while for all the others the main activity should attempt to distinguish between pensioners, students, and homemakers. This detailed variable also distinguishes between different types of employment and unemployment.	<p>Among the employed, the variable should distinguish between those who are actually employed, those who are temporarily absent from work (by reason of absence if available), those managing their own properties and those who are engaged in a job opportunity but are temporarily unpaid.</p> <p>Similarly, for the unemployed, the variable, if possible, should identify those who have worked before and those who have never worked, in addition to the unemployed who are not seeking a job, with the reason for why the individual is not looking for a job opportunity.</p> <p>The code 113 indicating temporary stoppage of the industry may also indicate an activity reduction or a temporary closure, which means that the employing entity might not be working in full capacity. This might be due to a lack in the number of customers or to a shortage in demand. In both cases, this should always imply that the individual is still employed (temporarily absent) since he/she is still paid/earn income.</p> <p>The reasons for which the person is identified to be a discouraged unemployed (Code 620) are reported in detail in the variable (NOTSRCH_R).</p> <p>Discouraged unemployment includes those who are available and want to work but given up on searching for a job because they found no suitable employment options and/or were met with lack of success when applying.</p> <p>Family responsibilities includes taking caring for children, the incapacitated or elderly.</p>	Harmonized Categorical variable	100 Employed	Q213=1 (Employed during last week)	INDS aged 15+	A	Q213 Q215 Q225 Q226 Q227 Q228 Q232	For the 15+ individuals reported inactive (students, housewife, with means, etc.), if they are willing to work but not actively searching for a job, and if a reason for not searching is reported, they should be considered "Other" (code 6) in the standardized version, and "Discouraged unemployment" (code 620) in the detailed version. For other inactive 15+ individuals who are neither willing nor seeking a job, their initial inactivity status is identified in both MAS and MAS_D and reported as the main reason for not searching a job/being inactive in NOTSRCH_R (codes 15-18).

						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: INDIVIDUAL IDEAL UNIVERSE: EMPLOYED IDEAL REFERENCE PERIOD: WITHIN 7 DAYS OF THE INTERVIEW CATEGORY: EMPLOYMENT IN MAIN JOB										
EMPS	Status of employment in the main job during the reference period	Detailed description of the employment status (employee, own-account workers, employer, unpaid family worker, etc.) in the main job, ideally following the ICSE classification (1993).	Definitions are taken from the ILO Classification of Status in Employment with some revisions to take into account the available data. - Employee includes anyone who works for a public or private employer and whose basic remuneration is not directly dependent on the revenue of the unit they work for, typically remunerated by wages and salaries but may be paid for piece work or in-kind. The payment is based on an explicit (written or oral) or implicit employment contract. The continuous criteria used in the ILO definition is not used here as data are often absent and due to country specificity. Public includes quasi-government organizations. - Employer is a business owner (whether alone or in partnership) with employees. If the only people working in the business are the owner and contributing family workers, the individual is not considered an employer (as they have no employees) and is, instead classified as own account. Employer is termed as a self-employed worker with hired employees. - Own account or self-employment: jobs are those where remuneration is directly dependent on the goods and services produced (where home consumption is considered to be part of the profits) and have not engaged any permanent employees to work for them on a continuous basis during the reference period (e.g., freelancer, individual who gives private lessons or apprentices without payment). - Members of producers’ cooperatives are workers who hold a self-employment job in a cooperative that produces goods and services. In the cooperative, hired workers and these workers have an employment contract that gives them a basic remuneration that does not depend on the revenue of the cooperative. Such workers are defined as employees and the members of the cooperative are considered as self-employed while the cooperative as an institution is defined to be the employer. - Contributing family workers are those workers who hold a self-employment job in a market-oriented establishment operated by a related individual living in the same household (or in a house located on the same plot of land and has the same household interests) who cannot be regarded as a partner because of their degree of commitment to the operation of the establishment, in terms of working time or other factors, is not at a level comparable to that of the head of the establishment. These workers often receive remuneration in a form of fringe benefits and payments in kind when the business is owned or operated by the individuals themselves or a relative. This category does not include: unpaid voluntary work done for charity or a relative living elsewhere but coming to help with the business without pay in cash or in kind. Relatives who receive any remuneration (including payments in kind) should be classified as employees. - Workers not classifiable by status (code 6) include those for whom insufficient relevant information is available and/or who cannot be included in any of the preceding categories.	Harmonized Categorical variable	1 Employee	1 Employee	Employed INDs aged 15+	A	Q223	The original variable indicating the work status (Q223) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
					2 Employer	2 Employer				
					3 Own account, self-employed	3 Own-account worker				
					4 Contributing (unpaid) family worker	4 Unpaid family worker				
					5 Member of producers cooperatives					
					6 Workers not classifiable by status (Others)	5 Unpaid worker				
					99 Not stated	(15+ Employed INDS for whom Q223 is missing)				
OCC	Occupation classification of the main job [Standardized version]	Standardized occupation classification of the main job.	In many datasets, national classifications are used to code the detailed data collected. In such cases, if the aggregated data is provided by the statistical office, no attempt to correct the original variable is done.	Harmonized Categorical variable	10 Legislators, senior officials and managers	111 thru 141	Employed INDs aged 15+	A	Q222	The original variable indicating the occupation (Q222) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".

						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
OCC_ISCO08_3	Occupation classification of the main job [ISCO 2008-3 digits]	Occupation classification of the main job, following the 3-digits International Standard Classification of Occupations for the year 2008 (ISCO-08).		Harmonized Categorical variable	--- ISCO 2008-3 digits coding 9998 Unspecified codes 9999 Not Stated		Employed INDs aged 15+	A	Q221	The original variable indicating the occupation (Q222) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
IND	Economic activity classification of the main job [Standardized version]	Standardized economic activity classification of the main job.	In many datasets, national classifications are used to code the detailed data collected. In such cases, if the aggregated data is provided by the statistical office, no attempt to correct the original variable is done. The category "Wholesale and retail trade" includes the repair activities of motor vehicles and motorcycles. The category "Real estate, administrative, professional and support service activities" includes: Real estate, renting and business activities; professional, scientific and technical activities; in addition to administrative and support service activities.	Harmonized categorical variable	10 Agriculture, forestry and fishing 20 Mining and quarrying 30 Manufacturing 40 Electricity, gas and water supply 50 Construction 60 Wholesale and retail trade 70 Transportation and storage 80 Accommodation and food service activities 90 Information and communication 100 Financial and insurance activities 110 Real estate, professional and support service activities 120 Public administration and defense 130 Education 140 Human health and social work activities 150 Other activities 998 Unspecified 999 Not stated	11 thru 32 81 thru 89 101 thru 331 351 thru 370 410 thru 433 451 thru 479 491 thru 532 551 thru 563 581 thru 639 641 thru 661 681 thru 829 841 thru 843 851 thru 854 861 thru 889 900 thru 990 (15+ Employed INDS for whom Q221 is missing)	Employed INDs aged 15+	A	Q221	The original variable indicating the economic activity (Q221) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
IND_ISIC4_3	Economic activity classification of the main job [ISIC Rev.4-3 digits]	Economic activity classification of the main job, following the 3-digits International Standard Industrial Classification of All Economic Activities, Revision 4 (ISIC Rev.4).		Harmonized categorical variable	--- ISIC-Rev. 4-3 digits coding 9998 Unspecified codes 9999 Not Stated		Employed INDs aged 15+	A	Q221	The original variable indicating the economic activity (Q221) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
SECTOR	Sector of employment of the main job [Standardized version]	Sector of employment (i.e. private versus public sector workers) in the main job.	Quasi-public sectors are considered as public. In the case that there is no distinction between Government and Public, in the original survey, we use the classification as provided. Cooperative includes employees in joint ventures. Foreign includes workers in international NGOs. Others includes workers in national NGOs and in private households.	Harmonized categorical variable	1 Government 2 Public sector 3 Private sector 4 Joint/Cooperative 5 Foreign sector 6 Others 99 Not stated	1 Public sector 2 Private Sector-Organized 3 Private Sector-Non-organized 4 International bodies (Employed 15+ INDS for whom Q219 is missing)	Employed INDs aged 15+	A	Q219	The original variable indicating the sector of employment (Q219) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated".
SECTOR_D	Sector of employment of the main job [Detailed version]	This variable distinguishes between different types of public and private sectors as well as other types of sectors (foreign, cooperative, etc.).	The classification of those working inside or outside an establishment in different sectors can be further studied using the variable "ESTAB".	Harmonized categorical variable	100 Government 110 Government-National 120 Government-Foreign 130 Government-Federal 140 Government-Local 200 Public sector 210 Economic institutions 300 Private sector 310 Private-Investment 320 Private-National 321 Private-National inside establishment 322 Private-National outside establishment 330 Private-Foreign 331 Private-Foreign inside establishment 332 Private-Foreign outside establishment 340 Private-Inside establishment 350 Private-Outside establishment 360 Private-Families 400 Joint/Cooperative 410 Joint 420 Cooperative 430 Joint local sector 500 Foreign sector 510 Diplomatic bodies 600 Others 610 Non-governmental organizations 620 Non-profit associations 630 Charitable associations 640 Outside establishment 650 Outside the country 660 UNRWA 999 Not stated	1 Public sector 2 Private Sector-Organized 3 Private Sector-Non-organized 4 International bodies (Employed 15+ INDS for whom Q219 is missing)	Employed INDs aged 15+	A	Q219	The original variable indicating the sector of employment (Q219) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated". Organized private sector was assumed to be inside an establishment; while the non-organized one was coded private sector outside an establishment.

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
WRKPLC	Workplace of the main job	This variable provides information on the place where the individual actually carries out the main job work, whether it is inside or outside an establishment.	<p>- All individuals working at/from their own homes or at someone else's home can be denoted home-based workers or home workers.</p> <p>- The typical workplace for domestic workers is "someone else's home."</p> <p>-Premises adjacent to home are a separate unit attached to the respondent's home (e.g. a doctor's clinic, or farmer's field or building, adjacent to the place of residence).</p> <p>- Exclusive premises include ministry, department, commercial store, office, factory, school, hospital, hotel, restaurant, workshop, company etc.</p> <p>Most of the exclusive premises, except for the governmental entities, might be public, private, foreign or mixed.</p> <p>- Workers in transportation and construction sites, codes 8 and 9, undertake their activities in the streets but they should not be combined with street vendors.</p> <p>For those working outside an establishment, this variable can serve in identifying those working in the informal sector.</p>	Harmonized categorical variable	1 In individual's home		Employed INDs aged ...+	/		
					2 In someone else's home					
					3 In premises adjacent to home					
					4 In exclusive premises					
					5 Street vendor with fixed/semi-fixed location					
					6 Street vendor with mobile location					
					7 Kiosk/hut					
					8 Transportation vehicle					
					9 Construction site					
					10 Agriculture land/maritime area					
					90 Others					
					99 Not stated					
GWRKPLC	Geographical workplace of the main job	This variable provides information about the geographical place of work (e.g. district/ governorate/ region) of the main job.	The geographical workplace is generated using the highest level of aggregation provided in the original data, and broke down by urban/rural if possible.	categorical variable	CNT+COD Country (UN 3 digits) + Work place codes 777777 Working abroad 888888 Mobile workers 999999 Not stated		Employed INDs aged ...+	/		
TENURE	Tenure in the main job	Duration of time worked in main job.		Semi-standardized continuous variable when information is provided in continuous years			Employed INDs aged ...+	/		
EMPSTAB	Employment stability in the main job	This variable indicates whether the employed individual is engaged in a regular or an irregular job.		Harmonized categorical variable	1 Full time/Regular		Employed INDs aged ...+	/		
					2 Part time/Temporary					
					3 Seasonal/Irregular					
					99 Not stated					
EMPCONT	Employment contract in the main job	This variable should indicate whether the individual has an explicit (written or oral) or an implicit employment contract.	<p>- Those reported to be officially hired are permanent workers at their main job. However, no official contract should be signed between them and their employers (e.g., governmental employees).</p> <p>- Employees with a written contract for a limited duration are those for whom the main job will terminate after a fixed period of time or upon completion of a certain project/task.</p> <p>- Employees with verbal or oral contracts are those for whom the main job started on the basis of a spoken agreement. Oral contracts are difficult to prove and enforce.</p> <p>- The individuals for whom an employment contract would not be applicable given their employment status, should be coded 200 "No contract."</p> <p>-This variable is important for measuring work stability, quality and decency.</p>	Harmonized categorical variable	100 Yes		Employed INDs aged ...+	/		
					110 Officially hired					
					120 Written contract for an unlimited duration					
					130 Written contract for a limited duration					
					140 Collective agreement					
					150 Verbal agreement					
					200 No contract					
					999 Not stated					
BENEFIT_X	Individual benefits from/receives X ... from employer	This variable provides information on the types of benefits the employed individual may receive from his/her employer. <i>X denotes the type of benefit.</i>		Dummy variables (0 No, 1 Yes)	X=1 Contribution to the pension/end of service funding		Employed INDs aged ...+	/		
					X=2 Leave in-lieu/paid annual leave					
					X=3 Paid sick leave					
					X=4 Paid maternity vacation (women only)					
					X=90 Others					
HLTHINS	Has health insurance	This variable indicates whether the employed individual has health insurance.		Dummy variable	0 No		Employed INDs aged ...+	/		
					1 Yes					
					99 Not stated					
SOCSEC	Has social security coverage	This variable indicates whether the employed individual is covered by a social security/insurance system.		Dummy variable	0 No		Employed INDs aged ...+	/		
					1 Yes					
					99 Not stated					

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
SYDUN	Affiliated to a syndicate or a vocational union	This variable indicates whether the employed individual is affiliated to syndicates or vocational unions.		Dummy variable	0 No		Employed INDs aged ...+	/		
					1 Yes					
					99 Not stated					
ESTAB	Working in an establishment at the main job	This variable indicates whether the individual is working in an establishment in his/her main job.		Dummy variable	0 No		Employed INDs aged ...+	/		
					1 Yes					
					99 Not stated					
ESTTAX	Establishment registered in tax administration	This variable indicates whether the enterprise where the individual works is registered in a tax administration.	The enterprises which are still in the process of being registered are coded "1"- yes.	Dummy variable	0 No 1 Yes 99 Not stated		Employed in establishment INDs aged ...+	/		
NUMWRK	Number of workers in establishment of the main job	This variable indicates the number of workers in the enterprise/establishment in which the respondent is employed in his/her main job.		Categorical variable	100 1 thru 9		Employed in establishment INDs aged ...+	/		
					110 1					
					120 1 thru 4					
					130 2 thru 4					
					140 5 thru 9					
					200 10 thru 49					
					210 10 thru 19					
					220 20+					
					230 10 thru 24					
					240 25 thru 49					
					300 50 thru 99					
					400 100+					
					999 Not stated					
HRSWK	Total weekly working hours in the main job	This variable reports the total number of hours the individual usually works during the week on his/her main job.	The number of hours usually worked, as defined by the ILO, is the typical value (may be the modal value) of hours actually worked in the job during a certain reference period. This variable can help in assessing time-related underemployment (visible underemployment).	Continuous variable			Employed INDs aged 15+	A	Q216	The original variable indicating the total number of working hours (Q216) is not reported for those who are employed but temporary absent from their work, waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "0".
FHRSWK_R_X	Reason for few weekly working hours isX	This set of variables should provide the reason(s) for which an individual reported weekly working hours below a country specific threshold. <i>X indicates the reason.</i>	The threshold used in such a variable may vary from one dataset to another. The variable's universe will denote the threshold used in each country. Some of the reasons reported are called "involuntary reasons." They can be used with the criterion of usually working for hours below a certain threshold to define the "visible underemployment."	Dummy variables (0 No, 1 Yes)	X=1 Official working hours < threshold		Employed INDs aged ...+ and working weekly less than ... hours	/		
					X=2 Work conditions					
					X=3 Strike/Closure					
					X=4 Unavailability of additional work					
					X=5 Unsatisfactory wages					
					X=6 Time allocated to education or training					
					X=7 Family/Personal responsibilities					
					X=8 Temporary absence from work					
					X=9 Unwillingness to do extra work					
					X=90 Others					
SEEKWRK	Seeking additional employment during the reference period	This variable should identify those who are looking for additional work during the reference period.	The search reference period may be 1 week, 4 weeks or 6 months preceding the survey. This is country specific information, and is denoted in the comments.	Dummy variable	0 No		Employed INDs aged ...+	/		
					1 Yes					
					99 Not stated					
WNTCHJ	Want to change the main job/get an additional job	The variable indicates whether the individual wants to change his/her main job or wants to have an additional one.		Dummy variable	0 No	2 No	Employed INDs aged 15+	A	Q217	The original variable indicating the desire to change the main job or practice an additional one (Q217) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is recoded "not stated". The original variable was collected for a reference period of 4 weeks preceding the date of the interview.
					1 Yes	1 Yes				
					99 Not stated	(15+ Employed INDs for whom Q217 is missing)				
WNTCHJ_R	Reason for desiring to change the main job/get an additional job	The variable provides the main reason for which an individual reported desire to change his/her main job or get an additional one.	The "work place location" might be a reason for the desire to change the job if it is too far from the individual's residence area or if the transportation is too difficult.	Harmonized categorical variable	1 Insufficient earnings	1 Insufficient earnings or meager incentives	Employed INDs aged 15+ reported desire to change job/get additional one	A	Q218	
					2 Does not match the educational qualification	2 Does not suit the educational qualification				
					3 Bad work conditions	5 Work conditions				
					4 Inappropriate work place location	6 Place of work is far from residence 7 Transportation difficulties				
					5 Present job is seasonal/casual					
					6 Occupation is not suitable					
					7 Does not like present job	8 Does not like the present job				
					8 Inappropriate working hours	3 Short hours 4 Long hours				
					90 Others	9 Other				
					99 Not stated	(15+ Employed INDs for whom Q217=1 and Q218 is missing)				
DAYMNTH	Total number of working days per month in the main job	The total number of days usually worked during a month on the main job.		Continuous variable			Employed INDs aged ...+	/		
WKMNTH	Total number of working weeks per month in the main job	The total number of weeks usually worked during a month on the main job.		Continuous variable			Employed INDs aged ...+	/		

Variable Name	Variable Label	Contents	General Comments / Warnings / Recommendations / Formula- if ERF generated	Variable type	Standardized Values and Value Labels	Jordan, EUS 2010				
						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: INDIVIDUAL IDEAL UNIVERSE: EMPLOYED HAVING A MAIN JOB IDEAL REFERENCE PERIOD: WITHIN 7 DAYS OF THE INTERVIEW CATEGORY: WAGES AND INCOMES			All wages and incomes variables are recorded as monthly amounts. ERF unified the amounts, provided that they had not already been unified in the original data. Monthly amounts should be reported in a country's national currency. A check for outliers is necessary before conducting any analysis on the wages/incomes variables. Extreme cases were detected in the original variables; however, the appropriate method to deal with it was left to the user's judgment.							
BASWAG	Total monthly basic wage from the main regular job		When the original dataset has only wage categories, the variable's value is calculated as the midpoint of the range provided.	Continuous variable			Waged workers aged ...+	/		
ADDWAG	Total monthly additional work wage from the main regular job		When the original dataset has only wage categories, the variable's value is calculated as the midpoint of the range provided.	Continuous variable			Waged workers aged ...+	/		
ALLWNC	Total monthly allowances from the main regular job	This variable includes both cash and in-kind allowances.	When the original dataset has only wage categories, the variable's value is calculated as the midpoint of the range provided.	Continuous variable			Waged workers aged ...+	/		
BONUS	Total monthly bonus from the main regular job		When the original dataset has only wage categories, the variable's value is calculated as the midpoint of the range provided.	Continuous variable			Waged workers aged ...+	/		
INCENTV	Total monthly incentives from the main regular job	This variable includes both cash and in-kind incentives.	When the original dataset has only wage categories, the variable's value is calculated as the midpoint of the range provided.	Continuous variable			Waged workers aged ...+	/		
PROFIT	Total monthly profits from the main regular job		When the original dataset has only wage categories, the variable's value is calculated as the midpoint of the range provided.	Continuous variable			Waged workers aged ...+	/		
OTHEARN	Total other monthly earnings from the main regular job		When the original dataset has only wage categories, the variable's value is calculated as the midpoint of the range provided.	Continuous variable			Waged workers aged ...+	/		
TOTWAG	Total monthly wage from the regular main job	This variable indicates the total monthly wage the employee receives from his/her main job.	The value of the total wage reported in this variable should equal the value of the basic wage in addition to bonuses, benefits, allowances, profits, etc. TOTWAG=BASWAG+ADDWAG+ALLWNC+BONUS+INCENTV+PROFIT+OTHEARN When the original dataset has only wage categories, the total wage is calculated as the midpoint of the range provided.	Continuous variable		Q223=1 (employee) AND Q224=1 (less than 100) will be recoded "50" Q224=2 (100-199) will be recoded "150" Q224=3 (200-299) will be recoded "250" Q224=4 (300-499) will be recoded "400" Q224=5 (500+) will be recoded "750" Assuming that the upper limit of the last category is "1000"	Waged workers aged 15+	A	Q223 Q224	The original variable indicates the wage category only, thus, the generated variable is calculated as the midpoint of the ranges provided. The original variable indicating the total monthly wage (Q224) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is reported missing.
IRRGWAG	Total daily wages from seasonal/irregular jobs	This variable should provide the value of earnings for employed individuals in seasonal or irregular jobs.	This variable should typically cover the individuals reported to have irregular/seasonal jobs in EMPSTAB (code 3). When the original dataset has only wage categories, the total wage is calculated as the midpoint of the range provided.	Continuous variable			Irregular waged workers aged ...+	/		
EMPINC	Total monthly income (for employers) from the main job		When the original dataset has only income categories, the total income is calculated as the midpoint of the range provided.	Continuous variable		Q223=2 (employer) AND Q224=1 (less than 100) will be recoded "50" Q224=2 (100-199) will be recoded "150" Q224=3 (200-299) will be recoded "250" Q224=4 (300-499) will be recoded "400" Q224=5 (500+) will be recoded "750" Assuming that the upper limit of the last category is "1000"	Employer INDs aged 15+	A	Q223 Q224	The original variable indicates the income category only, thus, the generated variable is calculated as the midpoint of the ranges provided. The original variable indicating the total monthly income (Q224) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is reported missing.
SEMPINC	Total monthly income (for self-employed) from the main job		When the original dataset has only income categories, the total income is calculated as the midpoint of the range provided.	Continuous variable		Q223=3 (own-account worker) AND Q224=1 (less than 100) will be recoded "50" Q224=2 (100-199) will be recoded "150" Q224=3 (200-299) will be recoded "250" Q224=4 (300-499) will be recoded "400" Q224=5 (500+) will be recoded "750" Assuming that the upper limit of the last category is "1000"	Self-employed INDs aged 15+	A	Q223 Q224	The original variable indicates the income category only, thus, the generated variable is calculated as the midpoint of the ranges provided. The original variable indicating the total monthly income (Q224) is not reported for those who are waiting to resume previous work or found a job and waiting to start. Thus, the generated variable for those cases is reported missing.

FILE LEVEL: INDIVIDUAL IDEAL UNIVERSE: PREVIOUSLY EMPLOYED FOR AT LEAST 2 WEEKS IDEAL REFERENCE PERIOD: WITHIN LESS THAN 3 YEARS OF THE INTERVIEW CATEGORY: LAST HELD JOB CHARACTERISTICS										
This section provides information on the employment characteristics of the previous/last held job for all individuals who have previously been employed, whether employed, unemployed or inactive at the time of the survey. For the employed individuals, the last held job is the job preceding the present one (and is denoted previous job). All individuals for whom a "not stated" status is reported in any of the variables are those within the variable universe but whose information was not provided in the original data.										
PRVWRK	Previously worked during the reference period	This variable should identify those who have previously been employed for pay or for profit for a continuous period of time.	This information is collected for all individuals in the working-age population to identify those who have previously experienced any employment during the reference period.	Harmonized categorical variable	0 Never worked during the reference period		INDS aged ... +	/		
					1 Employed & reported a previous job					
					2 Not working & reported a last held job					
EMPSRV	Status of employment in the previous/last held job	Detailed description of the employment status (employee, own-account workers, employer, unpaid family worker, etc.) in the previous/last held job, ideally following the ICSE classification (1993).	See EMPS	Harmonized Categorical variable	1 Employee		Ever-employed INDs aged+	/		
					2 Employer					
					3 Own account, self-employed					
					4 Contributing (unpaid) family workers					
					5 Member of producers cooperatives					
					6 Workers not classifiable by status (other)					
					99 Not stated					
OCCPRV	Occupation classification of the previous/last held job [Standardized version]	Standardized occupation classification of the previous/last held job.	In many datasets, national classifications are used to code the detailed data collected. In such cases, if the aggregated data is provided by the statistical office, no attempt to correct the original variable is done.	Harmonized Categorical variable	10 Legislators, senior officials and managers		Ever-employed INDs aged+	/		
					20 Professionals					
					30 Technicians and associate professionals					
					40 Clerks					
					50 Service workers and shop and market sales workers					
					60 Skilled agricultural and fishery workers					
					70 Craft and related trades workers					
					80 Plant and machine operators and assemblers					
					90 Elementary occupations					
					100 Armed Forces					
					998 Other/unspecified					
999 Not stated										
OCCPRV_ISCO08_3	Occupation classification of the previous/last held job [ISCO 2008-3 digits]	Occupation classification of the previous/last held job, following the 3-digits International Standard Classification of Occupations for the year 2008 (ISCO-08).		Harmonized Categorical variable	--- ISCO 2008-3 digits coding 9998 Unspecified codes 9999 Not Stated		Ever-employed INDs aged+	/		
INDPRV	Economic activity classification of the previous/last held job [Standardized version]	Standardized economic activity classification of the previous/last held job.	In many datasets, national classifications are used to code the detailed data collected. In such cases, if the aggregated data is provided by the statistical office, no attempt to correct the original variable is done. The category "Wholesale and retail trade" includes the repair activities of motor vehicles and motorcycles. The category "Real estate, administrative, professional and support service activities" includes: Real estate, renting and business activities; professional, scientific and technical activities; in addition to administrative and support service activities.	Harmonized categorical variable	10 Agriculture, forestry and fishing		Ever-employed INDs aged+	/		
					20 Mining and quarrying					
					30 Manufacturing					
					40 Electricity, gas and water supply					
					50 Construction					
					60 Wholesale and retail trade					
					70 Transportation and storage					
					80 Accommodation and food service activities					
					90 Information and communication					
					100 Financial and insurance activities					
					110 Real estate, professional and support service activities					
					120 Public administration and defense					
					130 Education					
					140 Human health and social work activities					
					150 Other activities					
					998 Unspecified					
					999 Not stated					
INDPRV_ISIC4_3	Economic activity classification of the previous/last held job [ISIC Rev.4-3 digits]	Economic activity classification of the previous/last held job, following the 3-digits International Standard Industrial Classification of All Economic Activities, Revision 4 (ISIC Rev.4).		Harmonized categorical variable	--- ISIC-Rev. 4-3 digits coding 9998 Unspecified codes 9999 Not Stated		Ever-employed INDs aged+	/		
SECTORPRV	Sector of employment of the previous/last held job [Standardized version]	Sector of employment (i.e. private versus public sector workers) in the previous/last held job.	Quasi-public sectors are considered as public. In the case that there is no distinction between Government and Public, in the original survey, we use the classification as provided. Cooperative includes employees in joint ventures. Foreign includes workers in international NGOs. Others includes workers in national NGOs and in private households.	Harmonized categorical variable	1 Government		Ever-employed INDs aged ...+	/		
					2 Public sector					
					3 Private sector					
					4 Joint/Cooperative					
					5 Foreign sector					
					6 Others					
					99 Not stated

						Survey Values and Value Labels	Universe	Key	Var(s) used from the survey	Country specific comments
FILE LEVEL: INDIVIDUAL IDEAL UNIVERSE: UNEMPLOYED IDEAL REFERENCE PERIOD: WITHIN 3 MONTHS OF THE INTERVIEW CATEGORY: UNEMPLOYMENT CHARACTERISTICS										
All individuals for whom a "not stated" status is reported in any of the variables are those within the variable universe but whose information was not provided in the original data.										
UNEMPDUR	Unemployment duration in months	The variable reports the number of months during which the unemployed individual had stayed without work since graduation or since he/she left the last held job.		Continuous variable	xxx Unemployment duration in months 999 Not stated		Unemployed INDs aged ...+	/		
SRCHACT_X	Seeking a job by ...x	This set of dummy variables should indicate the activity(ies) undertaken by the unemployed in their search efforts to find a job during the reference period. X denotes the search activity.	"Searching for a private project" includes searching for a land, premises, machinery, supplies, farming inputs, etc. "Online search" includes placing or updating the résumé on professional or social networking sites. "Applying directly to the employer" includes checking worksites, farms, factories or other assembly places.	Dummy variables (0 No, 1 Yes)	X=1 Registering with government offices or ministries	Q227=1 & Q229_1 or_2 or_3 or_4=4 (Apply for work offices of the Ministry of Labour)	Unemployed INDs aged 15+	A	Q227 Q229_1 Q229_2 Q229_3 Q229_4	
					X=2 Registering with a public or private employment service	Q227=1 & Q229_1 or_2 or_3 or_4=5 (Apply for the civil service commission)				
					X=3 Participating in employment competitions					
					X=4 Arranging for financial resources, and applying for permits and licenses					
					X=5 Searching for a private project					
					X=6 Seeking the assistance of friends, relatives or other intermediaries	Q227=1 & Q229_1 or_2 or_3 or_4=3 (Seek assistance of relatives, friends, current or previous officials)				
					X=7 Applying directly to the employer	Q227=1 & Q229_1 or_2 or_3 or_4=2 (Visit establishments and work sites)				
					X=8 Reading/watching and responding to advertisements in newspapers or TV	Q227=1 & Q229_1 or_2 or_3 or_4=1 (Read/watch and respond to ads in newspapers, TV)				
					X=9 Online job searching					
					X=10 Waiting in a gathering place					
					X=90 Others not elsewhere classified	Q227=1 & Q229_1 or_2 or_3 or_4=6 (Other)				
SRCHDUR	Job search duration in months	The variable reports the number of months during which the unemployed individual has been searching for a job.	The period of search reported should be the last continuous period of active search without significant interruption (significant may imply active search efforts for a continuous period of at least four weeks).	Continuous variable	xxx Search duration in months 999 Not stated		Unemployed INDs aged 15+	A	Q227 Q231M Q231Y	Generated by summing two variables Q231M (job search duration in months) and Q231Y (job search duration in years), after multiplying the latter by 12 to convert the durations provided years to months.
GVUPJ	Ever refused a job opportunity during the job searching period	This variable identifies individuals who have previously refused a job opportunity during the job searching period.		Dummy variable	0 No		Unemployed INDs aged ...+			
					1 Yes					
GVUPJ_R	Reason for refusing a job opportunity during the job searching period	This variable indicates the main reason for which the individual has given up a job opportunity during the job searching period.		Harmonized Categorical variable	1 Low wage		Unemployed INDs aged ...+ ever given up a job opportunity			
					2 Distance to workplace					
					3 Work nature					
					4 Over qualified for the job					
					5 Waiting to find a better job opportunity					
					6 Work conditions					
					90 Others					
					99 Not stated

FILE LEVEL: INDIVIDUAL										
IDEAL UNIVERSE: INACTIVE INDIVIDUALS										
IDEAL REFERENCE PERIOD: WITHIN 4 WEEKS OF THE INTERVIEW										
CATEGORY: INACTIVITY REASON(S)										
NOTSRCH_R	Reason for not seeking a job during the reference period	For the "inactive" in the working age population, this variable should identify the main reason for which the individual is not searching for a job.	All reasons are provided by the inactive individuals who are not working nor seeking a job because of discouragement or due to any of the known reasons of inactivity.	Harmonized categorical variable	1 Failed to find a suitable job	Q228=6 (Couldn't find a suitable job)	Inactive INDS aged 15+	A	Q228 Q232	
					2 Lack of experience/qualifications	Q228=7 (Not qualified)				
					3 Lack of jobs matching personal skills or occupation					
					4 Lack of jobs with suitable wages					
					5 Considered too young or too old by prospective employers					
					6 Race/sex/religion discrimination					
					7 Lack of infrastructure (assets roads/transportations)					
					8 Lack of employment services					
					9 Lack of social relationships					
					10 Refusal by family					
					11 Do not know effective ways for job searching	Q228=5 (Doesn't know how to look for work)				
					12 Believed that no suitable job exists					
					13 No jobs are available	Q228=3 (No jobs are available)				
					14 Tired of looking for work	Q228=4 (Tired of looking for work)				
					15 Full time student	Q232=1 (Student)				
					16 Homemaker/housewife	Q232=2 (Housemaker)				
					17 Pensioners/retired/disabled	Q232=4 (Disabled)				
					18 Have income/revenue/means	Q232=3 (With means)				
					90 Others not elsewhere classified reasons	Q228=8 (Not seeking, others) Q232=5 (Other)				
					99 Not stated	(15+ Inactive INDS for whom Q228 is missing)
